

DIVISION OF RESEARCH  
FLORIDA ATLANTIC UNIVERSITY

## VIRTUAL RESEARCH IN ACTION

Increasing evidence shows a link between the immune system and the development of neuropsychiatric disorders, ranging from depression to schizophrenia.

Join Paula Kurdziel, Ph.D., as she discusses her latest research efforts identifying mechanisms that alter both the immune system and brain chemistry, and the resulting changes in behavior.

Learn more about this relationship and more, including:

- How the immune system and brain collaborate
- Unrealized strategies to treat brain disorders
- How the immune system signals both normal, health promoting behavior, as well as impact risk for psychiatric disorders

## Is Your Immune System Boss of Your Brain?

Presented by Paula Kurdziel, Ph.D.,  
postdoc fellow in the Charles E. Schmidt  
College of Science

1 – 2 P.M. EST  
THURSDAY, NOV. 3
