and Computer Science
Florida Atlantic University
Course Syllabus**

1. Course title/number, number of credit hours	
Theory and Philosophy of Computation COT 6200	# of credit hours = 3
2. Course prerequisites, corequisites, and where the course fits in the program of study	
Prerequisites: MAD 2104 and COT4420, or permission of instructor	
3. Course logistics	
Term: Fall 2017 Location: TBD	
4. Instructor contact information	
<i>Instructor's name</i>	Feng-Hao Liu, PhD
<i>Office address</i>	Bldg. EE 96/ Room 529
<i>Office Hours</i>	TBD
<i>Contact telephone number</i>	561-297-2341
<i>Email address</i>	fenghao.liu@fau.edu
5. TA contact information	
<i>TA's name</i>	TBD
<i>Office address</i>	
<i>Office Hours</i>	
<i>Contact telephone number</i>	
<i>Email address</i>	
6. Course description	
<p>This course covers major topics in the theory of computation and their philosophical meanings. Specific topics include hardness/randomness in computation and applications to cryptography and game theory.</p> <p>Philosophy of Computation aims to understand the foundation of computation, which is linked to the question: "What are the fundamental capabilities and limitations of computers?" Particularly, we will study whether there is a task which is inherently hard for your computer, no matter how smart the algorithm designers are. If such a hard problem exists, what can we do with it? Can we utilize the limitation to achieve other important computational tasks? Interestingly the answer is yes -- we will demonstrate with several examples how to relate hardness to information security, and to more randomness efficient algorithm designs.</p> <p>To address these studies, we need to formalize how we measure hardness for computers. We will consider different angles of resources such as time, space, randomness, and interaction, which define different models of computation. Studying these models is not only of theoretical interests, but also gives deeper insights to algorithm designs that inspire developments in many other fields, such as cryptography, security and privacy, game theory, communication, machine learning, and others. We will explore several great ideas that significantly advanced our understanding of computer science.</p>

and Computer Science
Florida Atlantic University
Course Syllabus**

7. Course objectives/student learning outcomes/program outcomes	
<i>Course objectives</i>	To learn the power and limitations of computers, and how to utilize them in different scenarios.
8. Course evaluation method	
4 Homework assignments (20% each): 80% Project: 20%	For the project, students must first identify a related topic, either from the textbook or research papers, and get approved by the instructor. Then the students will present the essential/novel ideas and technical contributions. Students will submit a final report for the project.
9. Course grading scale	
Grading Scale: 90 and above: "A", 87-89: "A-", 83-86: "B+", 80-82: "B", 77-79: "B-", 73-76: "C+", 70-72: "C", 67-69: "C-", 63-66: "D+", 60-62: "D", 51-59: "D-", 50 and below: "F."	
10. Policy on makeup tests, late work, and incompletes	
Students are strongly suggested to inform the instructor in advance in the case of emergency (if possible). Makeup exams are given only if there is solid evidence of a medical or otherwise serious emergency that prevents the student of participating in the exam. Students must turn in homework, assignment and projects on time. Students will lose 25% (after 1 day) and 50% of marks (after 2 days) if they turn in late. Submissions are not accepted after 2 nd day of due date.	
11. Special course requirements	
NA	
12. Classroom etiquette policy	
University policy requires that in order to enhance and maintain a productive atmosphere for education, personal communication devices, such as cellular phones and laptops, are to be disabled in class sessions.	
13. Disability policy statement	
In compliance with the Americans with Disabilities Act Amendments Act (ADAAA), students who require reasonable accommodations due to a disability to properly execute coursework must register with Student Accessibility Services (SAS)—in Boca Raton, SU 133 (561-297-3880); in Davie, LA 131 (954-236-1222); or in Jupiter, SR 111F (561-799-8585)—and follow all SAS procedures.	
14. Honor code policy	
Students at Florida Atlantic University are expected to maintain the highest ethical standards. Academic dishonesty is considered a serious breach of these ethical standards, because it interferes with the university mission to provide a high quality education in which no student enjoys unfair advantage over

any other. Academic dishonesty is also destructive of the university community, which is grounded in a system of mutual trust and place high value on personal integrity and individual responsibility. Harsh penalties are associated with academic dishonesty. See University Regulation 4.001 at www.fau.edu/regulations/chapter4/4.001_Code_of_Academic_Integrity.pdf

15. Required texts/reading

Computational Complexity: A Modern Approach.
By S. Arora and B. Barak. Cambridge University Press 2009, ISBN 978-0-521-42426-4

16. Supplementary/recommended readings

NA

17. Course topical outline, including dates for exams/quizzes, papers, completion of reading

Weekly Schedule	Topics
Week 01	The Computational Model, efficiency measure, limitation of computation
Week 02	The class P and NP and their philosophical meaning, reduction, and NP completeness
Week 03	Continue on NP/NP Completeness HW ₁
Week 04	Diagonalization
Week 05	Space Complexity
Week 06	Circuits and Parallel Computation HW ₂
Week 07	Randomized Computation I
Week 08	Randomized Computation II Project Topic Selection
Week 09	Interactive Proofs I HW ₃
Week 10	Interactive Proofs II

**Department of Computer & Electrical Engineering
and Computer Science
Florida Atlantic University
Course Syllabus**

Week 11	Cryptographic Applications I
Week 12	Cryptographic Applications II HW4
Week 13	Probabilistic Checkable Proofs and Approximation Algorithms I
Week 14	Probabilistic Checkable Proofs and Approximation Algorithms II
Week 15	Quantum Computation Project Report Submission
