**Department of Computer & Electrical Engineering
and Computer Science
Florida Atlantic University
Course Syllabus**

1. Course title/number, number of credit hours		
Cryptographic Engineering, CDA 5326		3 credit hours
2. Course prerequisites, corequisites, and where the course fits in the program of study		
Prerequisites: Graduate standing		
3. Course logistics		
<i>Term:</i>		
<i>Class location and time</i>		
4. Instructor contact information		
<i>Instructor's name</i> <i>Office address</i> <i>Office Hours</i> <i>Contact telephone number</i> <i>Email address</i>		
5. TA contact information		
<i>TA's name</i> <i>Office address</i> <i>Office Hours</i> <i>Contact telephone number</i> <i>Email address</i>		
6. Course description		
This course provides an application perspective of cryptography and focuses on the computations, engineering and secure implementations. This is a course for students interested in hardware and software design in industry and real-world security and cryptographic applications.		
7. Course objectives/student learning outcomes/program outcomes		
<i>Course objectives</i>	This is a cryptography engineering course. The students learn about embedding cryptographic algorithms and architectures into security products such as embedded devices where they can use programming to prototype to verify and demonstrate concepts. They will learn about implementations on hardware and software platforms including FPGAs and CPUs.	
8. Course evaluation method		
5 Programming Assignments (9% each): Projects:	45% 25%	For the project, the students will identify a scientific paper for review and

**Department of Computer & Electrical Engineering
and Computer Science
Florida Atlantic University
Course Syllabus**

Final Exam:	30%	implementations. The students will prepare a 10-page technical report to discuss the problem in the paper, the methodology applied, implementations techniques in the paper, and their results. In addition, the students may propose a new approach to address the problem and compare their results with the methods found in the paper. The students will deliver a 15-minutes presentation and present their final work to the class. The project will be implemented in four phases: (i) proposing/identifying a paper, (ii) review of the paper, (iii) implementations in a target platform, (iv) final report and presentations. The assignments in this class will be programming with the help of the TA/Instructor in the class or lab.
-------------	-----	---

9. Course grading scale

Grading Scale:
90 and above: "A", 87-89: "A-", 83-86: "B+", 80-82: "B", 77-79 : "B-", 73-76: "C+", 70-72: "C", 67-69: "C-", 63-66: "D+", 60-62: "D", 51-59: "D-", 50 and below: "F."

10. Policy on makeup tests, late work, and incompletes

Penalties for late assignment submission will be 10% per day. Appropriate accommodations will be made for students having a valid medical excuse. Unless there exists an evidence of medical or emergency situation, incomplete grades will not be given.

Plagiarism will not be tolerated. Any copying and pasting without attribution and a reference will be considered plagiarism.

Penalties for late project submission will be 25% per day. The student will get zero after 4 days.

11. Special course requirements

N/A

12. Classroom etiquette policy

University policy requires that in order to enhance and maintain a productive atmosphere for education, personal communication devices, such as cellular phones and laptops, are to be disabled in class sessions.

FAU course management system (Canvas) will be the official communication tool between the instructor and the students, and it is the student's responsibility to regularly check the course shell for updates and announcements. This includes unforeseen changes to assignment/project deadlines. It is the student's responsibility to inform the professor, within the first week of class, of any conflict with important course dates. No accommodation will be made if these conflicts are not brought to our attention within the first week.

Students are strongly encouraged to ask questions during class. You may not use a PDA, PPC, laptop, netbook or other computer, IPOD or similar device in-class or during quizzes or exams.

**Department of Computer & Electrical Engineering
and Computer Science
Florida Atlantic University
Course Syllabus**

Cellular/PCS telephones, pagers, PDAs, etc. must be turned-off or put in vibrate mode during class. If your device disrupts the lecture, you may be asked to leave immediately. Upon a second offense, you will need to explain your actions to the CEECS Department Chair before being allowed to return. If you require an exception to this policy, please see me before creating a disturbance.

Although you are EXPECTED and ENCOURAGED to utilize a study-group, individual and original efforts are expected for all assignments and projects except when otherwise stated.

13. Attendance policy statement

Students are expected to attend all of their scheduled University classes and to satisfy all academic objectives as outlined by the instructor. The effect of absences upon grades is determined by the instructor, and the University reserves the right to deal at any time with individual cases of non-attendance. Students are responsible for arranging to make up work missed because of legitimate class absence, such as illness, family emergencies, military obligation, court-imposed legal obligations or participation in University-approved activities. Examples of University-approved reasons for absences include participating on an athletic or scholastic team, musical and theatrical performances and debate activities. It is the student's responsibility to give the instructor notice prior to any anticipated absences and within a reasonable amount of time after an unanticipated absence, ordinarily by the next scheduled class meeting. Instructors must allow each student who is absent for a University-approved reason the opportunity to make up work missed without any reduction in the student's final course grade as a direct result of such absence.

14. Disability policy statement

In compliance with the Americans with Disabilities Act Amendments Act (ADAAA), students who require reasonable accommodations due to a disability to properly execute coursework must register with Student Accessibility Services (SAS) and follow all SAS procedures. SAS has offices across three of FAU's campuses – Boca Raton, Davie and Jupiter – however disability services are available for students on all campuses. For more information, please visit the SAS website at www.fau.edu/sas/

15. Counseling and Psychological Services (CAPS) Center

Life as a university student can be challenging physically, mentally and emotionally. Students who find stress negatively affecting their ability to achieve academic or personal goals may wish to consider utilizing FAU's Counseling and Psychological Services (CAPS) Center. CAPS provides FAU students a range of services – individual counseling, support meetings, and psychiatric services, to name a few – offered to help improve and maintain emotional well-being. For more information, go to <http://www.fau.edu/counseling/>

16. Code of Academic Integrity Policy Statement

Students at Florida Atlantic University are expected to maintain the highest ethical standards. Academic dishonesty is considered a serious breach of these ethical standards, because it interferes with the university mission to provide a high quality education in which no student enjoys an unfair advantage over any other. Academic dishonesty is also destructive of the university community, which is grounded in a system of mutual trust and places high value on personal integrity and individual responsibility. Harsh penalties are associated with academic dishonesty. For more information, see [University Regulation 4.001](#).

17. Required texts/reading

**Department of Computer & Electrical Engineering
and Computer Science
Florida Atlantic University
Course Syllabus**

The course will not follow a particular textbook.

18. Supplementary/recommended readings

Materials will be provided in an ongoing basis. The following references will be optional to follow:

- Cetin Kaya Koc (Editor): Cryptographic Engineering. 1st edition, Springer, 2009
- Paar, Pelzl: Understanding Cryptography: A Textbook for Students and Practitioners. 1st edition, Springer, 2009 Hankerson, Menezes and Vanstone, Guide to Elliptic Curve Cryptography (Ch. 2, 3, 5)
- Menezes, van Oorschot and Vanstone, Handbook of Applied Cryptography (Chapters 2 and 14) (Available free online)
- Articles from IEEE Transactions on Computers, CHES/ECC workshops proceedings

19. Course topical outline, including dates for exams/quizzes, papers, completion of reading

Weekly Schedule	Topics
Week 01	Introduction to Computer Security and Cryptography
Week 02	Mathematical background: Number theory, abstract algebra, Finite fields.
Week 03	Finite Field, prime Field, modular arithmetic, quadratic fields and arithmetic. Assignment #1
Week 04	Finite Field, binary fields, binary extension fields, representation of field elements, polynomial basis, normal basis and Gaussian normal basis. Project phase (i)
Week 05	Multiplication over finite fields: super-serial, bit-level, digit-level, bit-parallel architectures
Week 06	Multiplication over finite field: Karatsuba, subquadratic multipliers, systolic array multipliers, hybrid-double multipliers. Assignment #2
Week 07	Multiplicative inversion, Fermat's little theorem, extended Euclidean Algorithm over prime and binary fields. Project phase (ii)
Week 08	Exponentiation over finite field, trace and half trace function over finite fields, constant-time and non-constant- time implementations.
Week 09	Public key cryptography, Diffie-Hellman key exchange, RSA, Elliptic curve cryptography (ECC). Assignment #3
Week 10	Implementations of RSA and Diffie-Hellman over binary fields and prime fields.
Week 11	Elliptic curves, generic curves, Montgomery curves, Edwards curves, Hassian and Huff curves.

**Department of Computer & Electrical Engineering
and Computer Science
Florida Atlantic University
Course Syllabus**

Week 12	Implementations of Elliptic Curve Cryptography over prime fields, Group law, group operations, point multiplication, coordinates systems. Assignment #4
Week 13	Implementations of Elliptic Curve Cryptography over binary fields (polynomial basis and normal basis). Side-channel attacks analysis, secure implementations, and countermeasures. Project Phase (iii)
Week 14	Digital Signature algorithms (ECDSA, El Gamal) and implementations, Security-level and key size, performance analysis on hardware and software platforms
Week 15	Introduction to quantum computation and post-quantum cryptography: Lattice based cryptography, isogeny-based cryptography, and other candidates. Assignment #5 Students' project presentations Project Phase (iv)

Subject:RE: CEECS - Course Perquisite Changes

Hello,

Sounds good. The proposed prerequisite of "Graduate Standing" makes the courses accessible to our graduate students, which is very welcome. There are no concerns from math w.r.t. this change. Thanks for checking.

Best,
Rainer

Subject:CEECS - Course Perquisite Changes

Hello Dr. Steinwandt,

CEECS department is changing prerequisites of the following graduate courses which are listed in the Cyber Security Certificate.

CDA5326 Cryptographic Engineering
CIS5371 Practical Aspects of Modern Cryptography

The prerequisites are changed to Graduate Standing.

Changing of the prerequisites for these courses were discussed in UGPC yesterday November 4th, and the UGPC committee asked us to check with the other colleges where we have joint interdisciplinary programs. The next meeting, UGC, is on November 13 from 10:00 AM.

Please let us know if Mathematical Sciences has any objections to these prerequisite changes.

Best regards,
Mihaela Cardei

Hello Dr. Wagner,

CEECs department is changing the prerequisites for the following courses which are listed in the MS DSA program:

CORE course in MS DSA:
CAP6673: Data Mining and Machine Learning

ELECTIVE courses in MS DSA:
CAP5615: Introduction to Neural Networks
CAP6315: Social Networks and Big Data Analytics

CAP6619: Deep Learning
CAP6776: Information Retrieval
CAP6777: Web Mining
CEN6405: Computer Performance Modeling

The prerequisites are changed as follows:
6000 level courses - change to no prerequisites
5000 level courses - change to Graduate Standing

These courses were discussed in UGPC yesterday November 4th, and the UGPC committee asked us to check with MS DSA Steering Committee if they have any objections. The next meeting, UGC, is on November 13 from 10:00 AM.

Please let us know if the MS DSA Steering Committee has any objections.

Best regards,
Mihaela Cardei

Subject:CEECS - Course Perquisite Changes

Hello Dr. Dinev,

CEECS department is changing prerequisites of the following graduate courses which are listed in the MS ITM and/or Big Data Analytics Certificate.

MS ITM:

CEN 5035 is a core in CEECS concentrations only.

Electives: CAP 5615, CAP 6315, CAP 6619, CAP 6640, CAP 6673, CAP 6776, CAP 6777, CEN 6405, CEN 5086

Big Data Certificate:

CAP 5615, CAP 6315, CAP 6619, CAP 6640, CAP 6673, CAP 6776, CAP 6777, CEN 6405.

The prerequisites are changed as follows:

6000 level courses - change to no prerequisites

5000 level courses - change to Graduate Standing

These courses were discussed in UGPC yesterday November 4th, and the UGPC committee asked us to check with the other colleges where we have joint interdisciplinary programs. The next meeting, UGC, is on November 13 from 10:00 AM.

Please let us know if ITOM has any objections to these prerequisite changes.

Best regards,
Mihaela Cardei
