<i>Office Hours</i>	
<i>Contact telephone number</i>	
<i>Email address</i>	
<b>6. Course description</b>	
The sensing and characterization of biological entities, processes and events, with novel nanoscale devices and nano-object mediated modalities, will have immediate and far reaching impacts. This course covers the fundamentals of nanotechnology in biological and biomedical research. The course work is approached from an engineering perspective offering insights on the details of nanoscale fabrication processes as well as cell biology. The basics of biology and chemistry, with focus on how to engineer the behavior of molecules at the nanoscale, are also introduced and analyzed. Concepts and processes related to BioMEMS and microfluidics will also be explained.	
<b>7. Course objectives/student learning outcomes/program outcomes</b>	
<i>Course objectives</i>	To introduce the students to the concepts of nanobiotechnology and its applications in biological and biomedical engineering, pharmaceuticals, diagnostics, and public health. Students will also learn material properties of natural and synthetic materials and their applications in biomedical engineering.
<b>8. Course evaluation method</b>	
5 Homework assignments (4% each): 20%	For key paper review, each student has to find a key paper in nanobiotechnology which has first reported some fundamentally novel mechanism,
Key paper review: 20%	
Group research proposal: 20%	

**Department of Computer & Electrical Engineering  
and Computer Science  
Florida Atlantic University  
Course Syllabus**

Midterm exam:	20%	method, or technique which laid the foundation of significant work later on. Student has to make a presentation on this paper and present in class.
Final exam:	20%	
		For group research proposal, students will be divided into groups of 2-3 students. Each group will propose an interesting topic related to latest key advances in the field of Silicon Integrated Circuit Fabrication. Each group will present and defend their proposal topic in class.
<b>9. Course grading scale</b>		
Grading Scale: 90 and above: "A", 87-89: "A-", 83-86: "B+", 80-82: "B", 77-79: "B-", 73-76: "C+", 70-72: "C", 67-69: "C-", 63-66: "D+", 60-62: "D", 51-59: "D-", 50 and below: "F."		
<b>10. Policy on makeup tests, late work, and incompletes</b>		
Students are strongly suggested to inform the instructor in advance in the case of emergency (if possible). Makeup exams are given only if there is solid evidence of a medical or otherwise serious emergency that prevents the student of participating in the exam.		
Students must turn in homework, assignment and projects on time. Students will lose 25% (after 1 day) and 50% of marks (after 2 days) if they turn in late. Submissions are not accepted after 2 <sup>nd</sup> day of due date.		
<b>11. Special course requirements</b>		
NA		
<b>12. Classroom etiquette policy</b>		
University policy requires that in order to enhance and maintain a productive atmosphere for education, personal communication devices, such as cellular phones and laptops, are to be disabled in class sessions.		
<b>13. Disability policy statement</b>		
In compliance with the Americans with Disabilities Act Amendments Act (ADAAA), students who require reasonable accommodations due to a disability to properly execute coursework must register with Student Accessibility Services (SAS)—in Boca Raton, SU 133 (561-297-3880); in Davie, LA 131 (954-236-1222); or in Jupiter, SR 111F (561-799-8585)—and follow all SAS procedures.		
<b>14. Honor code policy</b>		
Students at Florida Atlantic University are expected to maintain the highest ethical standards. Academic dishonesty is considered a serious breach of these ethical standards, because it interferes with the university mission to provide a high quality education in which no student enjoys unfair advantage over any other. Academic dishonesty is also destructive of the university community, which is grounded in a system of mutual trust and place high value on personal integrity and individual responsibility. Harsh penalties are associated with academic dishonesty. See University Regulation 4.001 at <a href="http://www.fau.edu/regulations/chapter4/4.001_Code_of_Academic_Integrity.pdf">www.fau.edu/regulations/chapter4/4.001_Code_of_Academic_Integrity.pdf</a>

**Department of Computer & Electrical Engineering  
and Computer Science  
Florida Atlantic University  
Course Syllabus**

**17. Course topical outline, including dates for exams/quizzes, papers, completion of reading**

<b>Weekly Schedule</b>	<b>Topics</b>
Week 01	Introduction to Nanobiotechnology, historical prospective, solid-state fabrication, Moore's law and its implication in bioengineering.  Basic semiconductor materials, Crystal structure, Miller indices, Crystalline materials.
Week 02	Standard fabrication processes and modules, oxidation (wed and dry), oxide properties, Photolithography  Projection Lithography, Pitch limit and diffraction, Light sources
Week 03	Doping, Diffusion, Ion Implantation, dry etching, wet etching, Isotropic and anisotropic etching.  Deep reactive ion etching, LPCVD, PECVD, PVD  <b>HW-1</b>
Week 04	Trade-offs in lithography, next generation lithography.  X-Ray lithography, XPS, Auger electron spectroscopy, EUV lithography, Proximal X-ray lithography
Week 05	E-beam lithography, Focused ion beam lithography, Projection e-beam and ion beam lithography  Scanning probe lithography, atomic force lithography  <b>Key paper review nomination</b>
Week 06	Dip pen lithography, AFM lithography by local probe oxidation, STM lithography  Soft lithography, contact printing, PDMS properties  <b>HW-2</b>
Week 07	Micro transfer molding, replica molding, PDMS issues, CD based fluidics  Nanoimprint lithography, step and flash lithography
Week 08	Biomolecules, cells and organelles, chemical structure of phospholipids  Functional groups, structure of nucleic acids, genes, electronics properties of nucleic acids, aptamers  <b>HW-3</b>
Week 09	DNA structure and fundamentals, human genome project  <b>Midterm Exam</b>
Week 10	<b>Presentations for Key Paper Reviews</b>

**Department of Computer & Electrical Engineering  
and Computer Science  
Florida Atlantic University  
Course Syllabus**

<b>Week 11</b>	<p>DNA microarrays, Integration of bionano, need to biosensing, electronic properties of biomaterials</p> <p>Molecular sensing, DNA hybridization, Annealing, Polymerase chain reaction (PCR), DNA replication and amplification.</p> <p><b>HW-4</b></p>
<b>Week 12</b>	<p>Real-time PCR, SYBR staining, Taqman, Scorpion, RT-PCR, PCR on-chip, microfluidics</p> <p>Next generation sequencing, ion torrent technology, Solid-state and biological nanopores for DNA analysis</p>
<b>Week 13</b>	<b>Group Research Proposal Presentations</b>
<b>Week 14</b>	<p>Gene translation and expression (mRNA, tRNA, rRNA)</p> <p>Types and structure of protein, types of amino acids, surface functionalization with protein and DNA/RNA probes</p> <p><b>HW-5</b></p>
<b>Week 15</b>	<p>Nanowires, synthesis, nanowire biosensors</p> <p>Quantum dot confinement, carbon nanotubes and graphene, synthesis and their applications in biomedical engineering</p>
	<b>Final Exam</b>

Dear Professor Asghar,

Thanks for sending me syllabus of new course you proposed.

This appears to be an excellent course and I look forward it being offered.

Best

Joe

Dear Dr. Su,

The Department of Computer & Electrical Engineering and Computer Science (CEECS) is proposing a new course: EEE 5425 - Nano Biotechnology. Please see the attached syllabus for this course.

I heard that you have taught a course on "nanotechnology" before, just wondering if you can look at the attached syllabus and send me an email in the support of this course (if you like it) which may be helpful during the course approval process. I will be happy to hear if you have any suggestions.

Thanks  
Waseem

Dear Dr. Asghar,

Our apologies for the delay. On behalf of Dr. Rod Murphey, I am writing to confirm that the Department of Biological Sciences supports this proposal.

All the best,

Michelle

Hi Michelle,

Just wondering if you get a chance to talk to Dr. Murphey about the new course proposal (see below email for further details). Thank you

Dear Dr. Murphey,

The Department of Computer & Electrical Engineering and Computer Science (CEECS) is proposing a new course: EEE 5425 - Nano Biotechnology. Please see the attached syllabus for this course.

We need your approval that Department of Biological Sciences has no objection to this new course proposal. Can you please review the syllabus and email me your decision on approval? Thank you for your time.

Thanks

Waseem
