Graduate Programs—NEW COURSE PROPOSAL¹

DEPARTMENT: CIVIL, ENVIRONMENTAL AND
 GEOMATICS ENGINEERING

COLLEGE: ENGINEERING AND COMPUTER SCIENCE

RECOMMENDED COURSE IDENTIFICATION:

PREFIX _____ TTE _____ COURSE NUMBER 5501 LAB CODE (L or C) _____

(TO OBTAIN A COURSE NUMBER, CONTACT M.JENNING@FAU.EDU)

COMPLETE COURSE TITLE: **Transportation System Analysis**

EFFECTIVE DATE

(first term course will be offered)

CREDITS²: 3

TEXTBOOK INFORMATION: INTRODUCTION TO OPERATIONS RESEARCH, HILLIER AND LIEBERMAN, 2010, 9TH EDITION, MCGRAW-HILL

ISBN: 0073376299

GRADING (SELECT ONLY ONE GRADING OPTION): REGULAR SATISFACTORY/UNSATISFACTORY _____

COURSE DESCRIPTION, NO MORE THAN THREE LINES: THIS CLASS IS DESIGNED TO TEACH STUDENTS ABOUT FUNDAMENTAL CONCEPTS OF OPERATIONS RESEARCH USE VARIOUS OPERATIONS RESEARCH AND ENGINEERING TOOLS/SOFTWARE. THIS CLASS WILL TEACH STUDENTS TO DEVELOP VARIOUS PROGRAMMING MODELS, EXECUTE OPTIMIZATIONS, AND DEVELOP MATHEMATICAL PROBLEMS FROM DESCRIPTIVE TEXTS.

PREREQUISITES*: NONE

COREQUISITES*: NONE

REGISTRATION CONTROLS (MAJOR, COLLEGE, LEVEL)*:

* PREREQUISITES, COREQUISITES AND REGISTRATION CONTROLS WILL BE ENFORCED FOR ALL COURSE SECTIONS.

MINIMUM QUALIFICATIONS NEEDED TO TEACH THIS COURSE: PHD IN ENGINEERING OR CLOSELY RELATED FIELDS

Faculty contact, email and complete phone number:
 DR. ALEKSANDAR STEVANOVIC, ASSIST.
 PROFESSOR, ENGINEERING WEST (EG-36) BLDG.,
 ROOM 225, 561-297-3743, ASTEVAANO@FAU.EDU

Please consult and list departments that might be affected by the new course and attach comments.³
 No other departments affected.

Approved by:

Department Chair: _____
 College Curriculum Chair: _____
 College Dean: _____
 UGPC Chair: _____
 Graduate College Dean: _____
 UFS President: _____
 Provost: _____

Date: 9/29/14
9/29/14
10/1/14
10/8/14
10-15-14

1. Syllabus must be attached; see guidelines for requirements: www.fau.edu/provost/files/course_syllabus.2011.pdf
2. Review Provost Memorandum: **Definition of a Credit Hour** www.fau.edu/provost/files/Definition_Credit_Hour_Memo_2012.pdf
3. Consent from affected departments (attach if necessary)

Email this form and syllabus to UGPC@fau.edu one week before the University Graduate Programs Committee meeting so that materials may be viewed on the UGPC website prior to the meeting.

**Department of Civil Environmental and Geomatics Engineering
Florida Atlantic University
Course Syllabus**

1. Course title/number, number of credit hours	
Transportation System Analysis – TTE 5501	3 credit hours
2. Course prerequisites, corequisites, and where the course fits in the program of study	
Prerequisites: None	
3. Course logistics	
<p>Term: Fall 2014 This is a classroom lecture course. Class location and time: TBD Credit hour assignments: Lectures – 16 weeks, 160 minutes each week; Homework assignments – 12 weeks, about 200 minutes each week; Class project – 12 weeks, 120 minutes each week; Total in-class instruction per credit hour: 1 hour (56 minutes) per week, for 15 weeks Total out-of-class assignments per credit hour: 2 hours and 3 minutes per week, for 15 weeks</p>	
4. Instructor contact information	
<i>Instructor's name</i>	Dr. Aleksandar Stevanovic, Assistant Professor
<i>Office address</i>	Engineering West (EG-36) Bldg., Room 225
<i>Office Hours</i>	M-W 9:00 -11:00 AM
<i>Contact telephone number</i>	561-297-3743
<i>Email address</i>	astevano@fau.edu
5. TA contact information	
<i>TA's name</i>	N/A
<i>Office address</i>	
<i>Office Hours</i>	
<i>Contact telephone number</i>	
<i>Email address</i>	
6. Course description	
This class is designed to teach students about fundamental concepts of Operations Research use various Operations Research and engineering tools/software. This class will teach students how to develop various programming models, execute optimizations, and develop mathematical problems from descriptive texts.	
7. Course objectives/student learning outcomes/program outcomes	
<i>Course objectives</i>	I. Introduce students to the fundamental concepts of linear programming, simplex method, and duality theory. II. Establish student's understanding of fundamental concepts applied in the analysis, design, modeling and operation of transportation systems. III. Develop students' ability to solve network optimization problems

**Department of Civil Environmental and Geomatics Engineering
Florida Atlantic University
Course Syllabus**

	<p>including minimum cost problems, maximum flow problems, minimum path problems, shortest spanning tree problems, etc.</p> <p>IV. Develop student's ability to solve project management, decision analysis, and queuing theory and inventory theory applications.</p> <p>V. Prepare students for engineering work in design and management of transportation systems.</p>
8. Course evaluation method	
<p>Mid Term Exam: 20%</p> <p>Class Project: 25%</p> <p>Final Exam: 30%</p> <p>Homework Assignments: 25%</p>	<p><i>Note:</i> The minimum grade required to pass the course is C.</p>
9. Course grading scale	
<p>There is not any fix criteria for the grading scale. The overall performance as related to course objectives and outcomes is evaluated and considered during grading.</p>	
10. Policy on makeup tests, late work, and incompletes	
<p><i>Late homework submissions will get (if 100% correct) only 75% of the original points. Late class project submissions are unacceptable.</i></p> <p><i>Incomplete grades are against the policy of the department. Unless there is solid evidence of medical or otherwise serious emergency situation incomplete grades will not be given.</i></p> <p><i>Assignments are submitted through Blackboard ONLY and they are always due before beginning of the class in the corresponding week. Assignments can be written manually and scanned as a pdf file; or they can be developed in word processing programs (or spreadsheets) and converted to pdf files. Each assignment should be submitted as a SINGLE pdf file through Blackboard. Late assignments will be accepted but with a penalty – they will be given only 75% of the earned score. No assignments will be accepted through any other means (email, in-hand, etc.) except through Blackboard.</i></p>	
11. Special course requirements	
<p>This class is designed to be a class structured as a learning community. Students and instructor expect to learn from each other and challenge each other to think about the critical issues in transportation and the solutions from different perspectives. Lectures by the instructor and limited speakers will include presentation of background information, description of current transportation challenges, solution mechanisms and class discussions. Software necessary for this course can be downloaded from link "Web Links" in your Blackboard and it is included in zipped package IOR Tutorial.</p>	
12. Classroom etiquette policy	
<ol style="list-style-type: none"> 1. Cell phones and beepers should have the ringers turned off as a courtesy to the instructor and your fellow classmates. 2. Computers must be closed and turned off in class 3. You can leave only on breaks 4. Exams will be given only at the scheduled times and places. No make-ups, except in documented emergencies. No one is exempt from the final examination. 5. Attendance to class is required. You are expected to attend and participate in all class sessions. Final grades will be reduced by one letter for every three (3) unexcused absences (as determined by the instructor). Attendance to at least one (1) professional meeting is required. 6. You are expected to complete the assigned reading prior to the date indicated on the class schedule, to do all homework assignments, and to participate fully in the group projects. 	

**Department of Civil Environmental and Geomatics Engineering
Florida Atlantic University
Course Syllabus**

7. Assignments are due at the beginning of class on the date indicated on the assignment sheet. University policy requires that in order to enhance and maintain a productive atmosphere for education, personal communication devices, such as cellular phones and laptops, are to be disabled in class sessions. You are expected to complete the assigned reading prior to the date indicated on the class schedule, to do all homework assignments, and to participate fully in the group projects

13. Disability policy statement

In compliance with the Americans with Disabilities Act (ADA), students who require special accommodations due to a disability to properly execute coursework must register with the Office for Students with Disabilities (OSD) located in Boca Raton campus, SU 133 (561) 297-3880 and follow all OSD procedures.

14. Honor code policy

Consultation with your classmates on assignments is expected and encouraged; however what you turn in must be your own work. Representing the work of others as your own is unethical and may result in sanctions (see the FAU Policy on Academic Honesty). FAU is committed to a policy of honesty in academic affairs. The instructor's duty is to pursue any reasonable allegation, taking action where appropriate, as described in the appropriate section of the FAU Catalog (<http://www.fau.edu/ug-cat/academic.htm#irregular>) and the Florida Administrative Code. Please be advised that the copying of material from the world wide web or any other written material is considered plagiarism and is also a breach of the Honor Code.

Students at Florida Atlantic University are expected to maintain the highest ethical standards. Academic dishonesty is considered a serious breach of these ethical standards, because it interferes with the university mission to provide a high quality education in which no student enjoys unfair advantage over any other. Academic dishonesty is also destructive of the university community, which is grounded in a system of mutual trust and place high value on personal integrity and individual responsibility. Harsh penalties are associated with academic dishonesty. See University Regulation 4.001 at www.fau.edu/regulations/chapter4/4.001_Honor_Code.pdf.

Florida Atlantic University

Regulation 4.001 Code of Academic Integrity

(1) Purpose. Students at Florida Atlantic University are expected to maintain the highest ethical standards. Dishonesty is considered a serious breach of these ethical standards, because it interferes with the University mission to provide a high quality education in which no student enjoys an unfair advantage over any other. Dishonesty is also destructive of the University community, which is grounded in a system of mutual trust and places high value on personal integrity and individual responsibility.

(2) Definitions. The FAU Code of Academic Integrity prohibits dishonesty and requires a faculty member, student, or staff member to notify an instructor when there is reason to believe dishonesty has occurred in a course/program requirement. The instructor must pursue any reasonable allegation, taking action where appropriate. Examples of academic dishonesty include, but are not limited to, the following:

(A) Cheating

1. The unauthorized use of notes, books, electronic devices, or other study aids while taking an examination or working on an assignment.
2. Providing unauthorized assistance to or receiving assistance from another student during an examination or while working on an assignment.
3. Having someone take an exam or complete an assignment in one's place.
4. Securing an exam, receiving an unauthorized copy of an exam, or sharing a copy of an exam.

(B) Plagiarism

**Department of Civil Environmental and Geomatics Engineering
Florida Atlantic University
Course Syllabus**

1. The presentation of words from any other source or another person as one's own without proper quotation and citation.
2. Putting someone else's ideas or facts into your own words (paraphrasing) without proper citation.
3. Turning in someone else's work as one's own, including the buying and selling of term papers or assignments.

(C) Other Forms of Dishonesty

1. Falsifying or inventing information, data, or citations.
2. Failing to comply with examination regulations or failing to obey the instructions of an examination proctor.
3. Submitting the same paper or assignment, or part thereof, in more than one class without the written consent of both instructors.
4. Any other form of academic cheating, plagiarism, or dishonesty.

(3) Procedures.

(A) If the instructor determines that there is sufficient evidence to believe that a student engaged in dishonesty, the instructor will meet with the student at the earliest possible opportunity and provide notice to the student of the instructor's perception of the

facts, the charges against the student, and the sanction. The instructor may not remove the student from the course until the appeal process has come to a conclusion.

(B) If, after this meeting, the instructor continues to believe that the student engaged in dishonesty, the instructor will provide the student written notice of the charges and the penalty. A copy of this statement shall be sent to the chair of the department or director of the school/program administering the course.

(C) The student is entitled to an opportunity to be heard at a meeting with the instructor and chair/director to review and discuss the instructor's charges/statement. Such request for a meeting must be made in writing and received by the chair/director within five (5) business days of receipt of the instructor's charges/statement. The purpose of the meeting is to discuss the facts and to advise the student of the appeal process. The chair/director will provide the student, the instructor, and the dean of the college administering the course a summary of both the student's position and the instructor's position.

(D) The student may appeal in writing to the dean of the college administering the course. The appeal must be received by the dean within five (5) business days of receipt of the chair/director's summary from the review meeting. The dean will convene a Faculty-Student Council ("Council"), which will be composed of the dean (or designee), two faculty members, and two students. The dean (or designee) will act as chair of the Council, direct the hearing, and maintain the minutes and all records of the appeal hearing, which will not be transcribed or recorded. The hearing is an educational activity subject to student privacy laws/regulations, and the strict rules of evidence do not apply. The student may choose to be accompanied by a single advisor, but only the student may speak on her/his own behalf. The student and instructor may present testimony and documents on his/her behalf. Additional witnesses may be permitted to speak at the dean's (or designee's) discretion and only if relevant and helpful to the Council. The Council will deliberate and make a recommendation to the dean to affirm or void the instructor's findings of academic dishonesty. The dean (or designee) will inform the student and instructor in writing of his/her findings of academic dishonesty after receipt of the Council's recommendation.

(E) The student may request an appeal in writing of the dean's findings of academic dishonesty to the University Provost (or designee) and include relevant documentation in support of such appeal. The University Provost (or designee) will notify the student, dean, and instructor of his/her decision in writing. This decision by the Provost (or designee) constitutes final University action.

**Department of Civil Environmental and Geomatics Engineering
Florida Atlantic University
Course Syllabus**

(F) If there is a finding that the Code of Academic Integrity has been violated, the chair will notify the University Registrar that the following notation be included on both the student's official transcript and on the student's internal record: "Violation of Code of Academic Integrity, University Regulations 4.001." If such violation is appealed and overturned, the dean or University Provost (or their designees) will notify the University

Registrar that such notation should be removed from the student's transcript and internal record.

(4) Penalties.

(A) The instructor will determine the penalty to be administered to the student in the course. Penalty grades cannot be removed by drop, withdrawal, or forgiveness policy. Students should be aware that, in some Colleges/programs, failure in a course or a finding of dishonesty may result in other penalties, including expulsion or suspension from the College/program.

(B) In the case of a first offense, the student may elect to complete a peer counseling program administered by the Division of Student Affairs by the end of the semester following the semester in which the dishonesty occurred. Upon successful completion of this program, the notation regarding violation of the Code of Academic Integrity will be expunged from the student's official transcript. The grade, however, will remain unchanged and cannot be removed by drop or forgiveness policy. Also, the notation will remain in internal University student records.

(C) In the case of a repeat offense, even if the notation of violation of the Code of Academic Integrity from the first offense had been expunged from the official transcript as a result of successful completion of the peer counseling program, the student will be expelled from the University.

Specific Authority: Article IX of the Florida Constitution, 1001.706, 1001.74 F.S., Board of Governors Regulations 1.001, 6.010, and 6.0105. History–New 10-1-75, Amended 12-17-78, 3-28-84, Formerly 6C5-4.01, Amended 11-11-87. Formerly 6C5-4.001. Amended 5-26-10

See University Regulation 4.001 at www.fau.edu/regulations/chapter4/4.001_Honor_Code.pdf.

15. Required texts/reading

1. "Introduction to Operations Research", Hillier and Lieberman, 2010, 9th Edition, McGraw-Hill

16. Supplementary/recommended readings

- 1) TBD

17. Course topical outline, including dates for exams/quizzes, papers, completion of reading

Lectures	
Date	Topic
Week 1	Introduction to Linear Programming.
Week 2	SIMPLEX Method.
Week 3	Duality Theory & Sensitivity Analysis.
Week 4	Transportation and Assignment Problems.
Week 5	Dynamic Programming & Integer Programming.
Week 6	Network Optimization Models.
Week 7	Non-linear Programming.
Week 8	*Mid-Term Exam*

**Department of Civil Environmental and Geomatics Engineering
Florida Atlantic University
Course Syllabus**

Week 9	Metaheuristics.
Week 10	Queuing Theory.
Week 11	Inventory Theory.
Week 12	Project Management.
Week 13	Reliability Theory.
Week 14	Markov Chains.
Week 15	Forecasting.
Week 16	Decision Analysis.
Final Exam Week	***** *Final Exam*
