<b>Prefix</b> SUR  <b>Number</b> 6387	(L = Lab Course; C = Combined Lecture/Lab; add if appropriate) <b>Lab Code</b> C	<b>Type of Course</b> <input checked="" type="checkbox"/> Lecture/Lab	<b>Course Title</b> Thermal Infrared Remote Sensing
<b>Credits</b> (Review <a href="#">Provost Memorandum</a> )  3	<b>Grading</b> (Select One Option)  <b>Regular</b> <input checked="" type="radio"/> <b>Sat/UnSat</b> <input type="radio"/>	<b>Course Description</b> (Syllabus must be attached; see <a href="#">Guidelines</a> )  Temperature is one of the most important physical variables. Temperature information with an appropriate spatial and temporal coverage is a key to addressing most of the environmental challenges on both local and regional scales. Measuring temperature remotely by thermal infrared is a new technology which has found a wide area of applications. In this course, students will learn the basic theory of sensors, data processing and analysis, and also investigate new applications of thermal infrared remote sensing on civil infrastructure and environmental systems monitoring.	
<b>Effective Date</b> (TERM & YEAR)  Fall of 2019		<b>Prerequisites</b>  GIS 4035C with minimum grade of "C" or Special permission from the instructor	<b>Corequisites</b>  None
		<b>Registration Controls</b> (Major, College, Level)  None	
<b>Prerequisites, Corequisites and Registration Controls are enforced for all sections of course</b>			
<b>Minimum qualifications needed to teach course:</b> Member of the FAU graduate faculty and has a terminal degree in the subject area (or a closely related field.)		<b>List textbook information in syllabus or here</b>  Thermal Infrared Remote Sensing Sensors, Method, Applications Claudia Kuenzer and Stefan Dech Springer; 2013 ISBN 978-94-007-6639-6

GRADUATE COLLEGE

MAR 12 2019

Received

**Department of Computer & Electrical Engineering  
and Computer Science  
Florida Atlantic University  
Course Syllabus**

<b>1. Course title/number, number of credit hours</b>	
Thermal Infrared Remote Sensing and Applications (SUR 6387)	3 credit hours
<b>2. Course prerequisites, corequisites, and where the course fits in the program of study</b>	
Prerequisite: 1 GIS 4035C with minimum grade of "C" or Special permission from the instructor	
<b>3. Course logistics</b>	
Term: Fall 2019 This is a live, on-line course with 2 lab demonstrations Class location and time Class time: Tuesday, 7:00 –10:00 PM Office Hour: Tuesday 9am-12pm in Room 223, also for laboratory demonstration	
<b>4. Instructor contact information</b>	
<i>Instructor's name</i>	Dr. Hongbo Su.
<i>Office address</i>	Building: 36, Room: 223
<i>Office Hours</i>	Boca Raton, FL
<i>Contact telephone number</i>	Phone: (561) 297 3936
<i>Email address</i>	E-mail: suh@fau.edu
<b>5. TA contact information</b>	
<i>TA's name</i>	N/A
<i>Office address</i>	
<i>Office Hours</i>	
<i>Contact telephone number</i>	
<i>Email address</i>	
<b>6. Course description</b>	
Temperature is one of the most important physical variables. Temperature information with an appropriate spatial and temporal coverage is a key to addressing most of the environmental challenges on both local and regional scales. Measuring temperature remotely by thermal infrared is a new technology which has found a wide area of applications. In this course, students will learn the basic theory of sensors, data processing and analysis, and also investigate new applications of thermal infrared remote sensing on civil infrastructure and environmental systems monitoring.	
<b>7. Course objectives/student learning outcomes/program outcomes</b>	
<i>Course objectives</i>	To provide an understanding of the advanced theoretical background of thermal infrared remote sensing and the geometrical calibration of thermographic cameras; To operate the thermal camera and do image processing of the thermal infrared images; To learn and design the thermal infrared remote sensing systems and their applications in environmental monitoring such as detection of energy leaks in building, urban heat island effects, industrial related thermal water pollution.

**GRADUATE COLLEGE**

**MAR 12 2019**

SUR6387 Thermal Infrared Remote Sensing  
Dr. Hongbo Su

Received

**Department of Computer & Electrical Engineering  
and Computer Science  
Florida Atlantic University  
Course Syllabus**

<i>Student learning outcomes &amp; relationship to ABET a-k objectives</i>	1. Graduate course, not relevant	
<b>8. Course evaluation method</b>		
Course attendance:	5%	<i>Note: The minimum grade required to pass the course is C.</i>
Assignments:	35%	
Midterm -	20%	
Final Examination -	40%	
<b>9. Course grading scale</b>		
Grading Scale: 90 and above: "A", 87-89: "A-", 83-86: "B+", 80-82: "B", 77-79: "B-", 73-76: "C+", 70-72: "C", 67-69: "C-", 63-66: "D+", 60-62: "D", 51-59: "D-", 50 and below: "F."		
<b>10. Policy on makeup tests, late work, and incompletes</b>		
<p>Makeup tests are given only if there is solid evidence of a medical or otherwise serious emergency that prevented the student of participating in the exam. Makeup exam should be administered and proctored by department personnel unless there are other pre-approved arrangements.</p> <p>Incomplete grades are against the policy of the department. Unless there is solid evidence of medical or otherwise serious emergency situation incomplete grades will not be given.</p>		
<b>11. Special course requirements</b>		
<p>All assigned homework must be submitted on or before the posted time. Per day 10% penalty will be enforced for late submissions.</p> <p>To succeed in this course all exams must be taken. The reasons for missing an exam must be documented, i.e. doctor's note etc. An unsatisfactory excuse will result in an F entered for that exam. Make-up exams will be administered for ONLY valid reasons.</p> <p>All exams will be taken on the honor system and must be done by the student ONLY with NO ASSISTANCE FROM ANYONE. A student MAY NOT provide assistance to another student.</p> <p>You are encouraged to work in groups to complete the homework assignments and/or to study together. However, the completed homework assignments must be your own work.</p>		
<b>12. Classroom etiquette policy</b>		
University policy requires that in order to enhance and maintain a productive atmosphere for education, personal communication devices, such as cellular phones and laptops, are to be disabled in class sessions.		
<b>13. Attendance Policy Statement</b>		
Students are expected to attend all of their scheduled University classes and to satisfy all academic objectives as outlined by the instructor. The effect of absences upon grades is determined by the instructor, and the University reserves the right to deal at any time with individual cases of non-attendance. Students are responsible for arranging to make up work missed because of legitimate class absence, such as illness,		

**Department of Computer & Electrical Engineering  
and Computer Science  
Florida Atlantic University  
Course Syllabus**

family emergencies, military obligation, court-imposed legal obligations or participation in University-approved activities. Examples of University-approved reasons for absences include participating on an athletic or scholastic team, musical and theatrical performances and debate activities. It is the student's responsibility to give the instructor notice prior to any anticipated absences and within a reasonable amount of time after an unanticipated absence, ordinarily by the next scheduled class meeting. Instructors must allow each student who is absent for a University-approved reason the opportunity to make up work missed without any reduction in the student's final course grade as a direct result of such absence.

**14. Disability Policy Statement**

In compliance with the Americans with Disabilities Act Amendments Act (ADAAA), students who require reasonable accommodations due to a disability to properly execute coursework must register with Student Accessibility Services (SAS) and follow all SAS procedures. SAS has offices across three of FAU's campuses – Boca Raton, Davie and Jupiter – however disability services are available for students on all campuses. For more information, please visit the SAS website at [www.fau.edu/sas/](http://www.fau.edu/sas/).

**15. Counseling and Psychological Services (CAPS) Center**

Life as a university student can be challenging physically, mentally and emotionally. Students who find stress negatively affecting their ability to achieve academic or personal goals may wish to consider utilizing FAU's Counseling and Psychological Services (CAPS) Center. CAPS provides FAU students a range of services – individual counseling, support meetings, and psychiatric services, to name a few – offered to help improve and maintain emotional well-being. For more information, go to <http://www.fau.edu/counseling/>

**16. Code of Academic Integrity Policy Statement**

Students at Florida Atlantic University are expected to maintain the highest ethical standards. Academic dishonesty is considered a serious breach of these ethical standards, because it interferes with the university mission to provide a high-quality education in which no student enjoys an unfair advantage over any other. Academic dishonesty is also destructive of the university community, which is grounded in a system of mutual trust and places high value on personal integrity and individual responsibility. Harsh penalties are associated with academic dishonesty. For more information, see University Regulation 4.001. If your college has particular policies relating to cheating and plagiarism, state so here or provide a link to the full policy—but be sure the college policy does not conflict with the University Regulation.

**17. Required texts/reading**

**Thermal Infrared Remote Sensing  
Sensors, Method, Applications  
Claudia Kuenzer and Stefan Dech**

Springer; 2013  
Language: English  
ISBN 978-94-007-6639-6

**18. Supplementary/recommended readings**

Journal papers distributed in the class

**19. Course topical outline, including dates for exams/quizzes, papers, completion of reading**

**Department of Computer & Electrical Engineering  
and Computer Science  
Florida Atlantic University  
Course Syllabus**

**Week 1: Theoretical background of Thermal Infrared Remote Sensing**

**Week 2: Geometric Calibration of Thermographic Cameras with lab demonstration**

**Week 3: Thermal Infrared Spectroscopy in the Laboratory and Field, assignments due**

**Week 4: Challenges and Opportunities for UAV-Borne Thermal Imaging with lab demonstration**

**Week 5: Spaceborne Thermal Infrared Observation, assignments due**

**Week 6: NASA's Hyperspectral Infrared Imager (HyspIRI)**

**Week 7: Thermal Remote Sensing of Sea Surface Temperature, mid-term exam**

**Week 8: Application of the Apparent Thermal Inertia Concept for Soil Moisture Estimation**

**Week 9: Thermal Infrared Remote Sensing of Surface and Underground Coal Fires**

**Week 10: Thermal Infrared Remote Sensing of Geothermal Systems**

**Week 11: Analysis of Surface Thermal Patterns in Relation to Urban Structure Types, assignments due**

**Week 12: Thermal Remote Sensing of Active Vegetation Fires and Biomass Burning Events**

**Week 13: Validation of Thermal Infrared Emissivity Spectra Using Pseudo-Invariant Sand Dune Sites**

**Week 14: Class project on applications of thermal infrared remote sensing**

**Week 15: Course review, final exam**
