

# Mote Aquaculture Research Park: Marine Finfish Infrastructure, Resources and Partnership Opportunities

Kevan L. Main, Nicole R. Rhody, Matthew Resley,  
Michael J. Nystrom, Ron Hans & Ryan Schloesser

Mote Aquaculture Research Park

Mote Marine Laboratory

Sarasota, Florida, USA

[kmain@mote.org](mailto:kmain@mote.org)

# **MOTE** MARINE LABORATORY & AQUARIUM

**Leading the Way in Global  
Marine Science and Education**

# Mote Aquaculture Research Park

## Sustainable Land-based Fish Farming

- Fish reproduction, larval rearing & on-growing technologies for stock enhancement and food production
- Development of land-based recirculating aquaculture systems (RAS) & integrated aquaculture systems (IAS)

# INFRASTRUCTURE: Mote Aquaculture Research Park

Property: 100 hectares  
Covered Infrastructure: >125K sq ft  
Zero-discharge Marine RAS

Fresh  
Wastewater  
Filtration

Red Tide Mesocosm Lab

Freshwater Fish Production

Coral Gene  
Bank

Maintenance  
& Shop

Larval  
Rearing  
& Live  
Feeds

Storage

Freshwater  
Fish

Marine  
Broodstock

Wetland  
Plants

Microbiome Lab  
& Fingerling Hatchery

Marine Aquaponics

Marine Growout

Marine  
Wastewater  
Filtration

Stock  
Enhancement  
Research

Brackish Wastewater  
Filtration

Snook  
Pond

# Commercial-Scale Indoor RAS for all production stages

**Large-scale Freshwater  
Fish Growout**

**Marine Growout**

**Marine Broodstock**

# Broodstock (Group) Maturation & Spawning Tanks

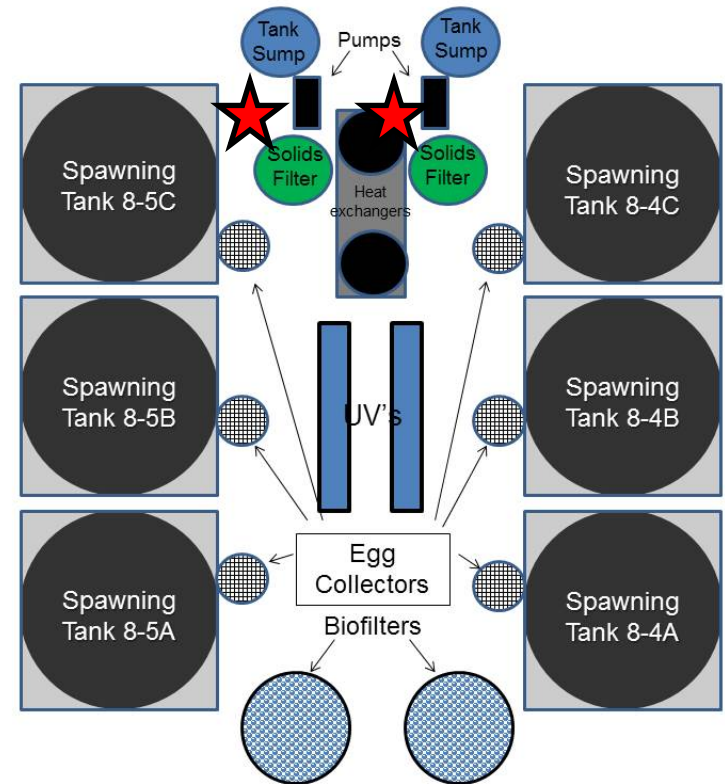

7 independent systems:  
three 44.5 m<sup>3</sup> tanks  
four 25-m<sup>3</sup> tanks

# Denitrification

# Individual Broodstock Spawning Tanks

2 independent systems:  
three 3.3 m<sup>3</sup> tanks

# Larval experimental tanks

Three 4-tank (100 L) RAS systems

Four 6-tank (130 L) RAS systems

# Larval Production Tanks

Two 3-tank (3.3 m<sup>3</sup>) tank systems

# Fingerling Production/Experimental Tanks

3 Systems: 18 1-m<sup>3</sup> tanks, 12 1-m<sup>3</sup> tanks + 12 2-m<sup>3</sup> tanks

# Growout Production/ Experimental Systems

Six 8.9 m<sup>3</sup> tanks +

One 35.7 m<sup>3</sup> tank

Linked to a large-scale RAS  
Filtration System

- Solids - drum filter & foam fractionator
- Biofiltration - moving bed bioreactor
- CO<sub>2</sub> degassing
- Disinfection -UV
- Oxygen injection

# Integrated Aquaculture/Aquaponic RAS System

Redfish

Sea purslane

Saltwort

# MARINE FINFISH RESOURCES

# Maturation & Spawning Technology with Common Snook

Large-scale production of snook for  
marine stock enhancement

A close-up photograph showing a person's hands holding a Florida Pompano fish. The fish is silver with a prominent dark stripe along its side and a large, dark eye. The hands are positioned to support the fish from the sides, with fingers visible. The background is a solid blue color, likely the interior of a bucket or container. The text is overlaid on the top half of the image.

**Maturation & Spawning Technology with  
Florida Pompano  
*Trachinotus carolinus***

**Expand Supply of Emerging Marine Finfish  
Fingerlings for Land-based Aquaculture**

# Red Drum (Redfish) *Sciaenops ocellatus*

**Production of Marine Finfish Fingerlings for  
Land-based Aquaculture & Stock  
Enhancement**

**Maturation & Spawning Technology with  
Almaco Jack *Seriola rivoliana***

**Expand Supply of Emerging Marine Finfish  
Fingerlings for Offshore Aquaculture**

# Industry, University, Government & Foundation Partnerships

Focus on addressing bottlenecks in aquaculture and system technologies/APPLIED RESEARCH & Supporting Industry Needs

- Developing maturation & spawning technologies for new/emerging species
- Improving larval rearing methods to increase production
- Developing & Testing new diets for broodstock, larvae and growout applications
- Developing commercial-scale growout technologies in zero-discharge RAS
- Short-term production of live feeds, larvae & fingerlings to support industry & government needs

# Industry, University, Government & Foundation Partnerships

## Industry Partnerships:

- Ocean ERA/Kampachi Farms; Aquaco Farms; Osprey Biotechnics; Aquatic Plants of Florida; Caribbean Sea Farms

## Government Agency Partnerships:

- Florida Fish & Wildlife Conservation Commission (>25 years); Gulf State Marine Fisheries Commission; Florida & National Sea Grant College Program; Florida Division of Agriculture & Consumer Services, Division of Aquaculture; NOAA Fisheries, Southwest Fisheries Science Center; USDA-AFRI

## University Partnerships:

- University of South Florida; University of Maryland Baltimore; University of Texas Marine Science Institute; Auburn University; University of Florida – IFAS; Florida Atlantic University, Harbor Branch Oceanographic Institution; University of South Mississippi, Gulf Coast Research Laboratory

## Foundation Partnerships:

- Good Food Institute; Mote Scientific Foundation
