

HOW TO

Connect to Your Student Success Network

The Success Network powered by Starfish Solutions is an online communication system that connects you, the student, to a network of support and to the resources needed to be successful at FAU. Advisors, faculty, tutors, and many different support staff make up your "Success Network".

The goal of using the Success Network is to make it easy for you to communicate and connect with the resources you need to be successful and complete your degree. You can use the scheduling tool in your Success Network to make appointments with your advisor. You will also be able to use this system to track your academic progress. Instructors will be able to raise "flags" to let you know that you may need additional support and inform you how and where to find increased support. Instructors can also give you "kudos" and congratulate you on your success.

Items such as your courses (progress in those courses), academic plans, your degree audit (DARS), and other retention tools will be available in your Success Network.

You can access and log into the system in many different ways.

- Through MyFAU (click the Success Network Tab)
- By visiting the University Advising Services website or the Student Services Office within the college of your major (see the Advising Resources Tab at the top of this page for a list of colleges)
