

Postdoc Career Talk

FAU

OFFICE OF
POSTDOCTORAL AFFAIRS
Florida Atlantic University

BUILDING BIOTOOLS

From Industrial Postdoc to Entrepreneur:
A Career I Never Expected -
Commercializing Science

Join Rina Dukor, Ph.D., as she describes her unexpected journey into scientific entrepreneurship by co-founding BioTools, Inc. Celebrating 20 years, BioTools specializes in characterization of chiral and biological molecules. She co-founded the company with a goal to bring to market two unique and powerful spectroscopic techniques - vibrational circular dichroism and raman optical activity. These techniques are now used by major pharmaceutical companies, regulatory agencies and top academic institutions worldwide.

Dukor is passionate about mentorship of young scientists with emphasis on women in sciences. She collaborates with many students and postdocs all over the world through research, internships and advice.

RINA K. DUKOR, PH.D.

President and Co-Founder,
BioTools, Inc., Jupiter, Fla.

HOST

Lorena Areal, Ph.D., Postdoctoral Fellow
at FAU Brain Institute
