Course Description
This course will introduce students to a variety of materials that can be used in the creation of artistic composition. Special emphasis is placed on the imaginative use of everyday objects as artistic devices. Some traditional media are used in conjunction with these nontraditional media.

Alternative Media Prerequisites: ART 1201C, 1300C, 2330C, 2600C.

Course Objectives
Alternative Media is a studio class in which the student will explore and experiment with a variety of materials, found and purchased, that will be used in the creation of an art product. Students are encouraged to develop an understanding and the potential of various materials as an expression of concepts and ideas. Projects will require a certain amount of research of artists’ work as resources. The process will involve the manipulation of two and three dimensional forms and the innovative and unconventional use of materials and space.

Preparation
Students are responsible for securing hand-outs, assignment sheets and lecture notes from fellow classmates for days that they do not attend class. Students who arrive late are responsible for acquiring course hand-outs, assignment sheets and lecture notes for the time period they missed. Lectures will not be repeated in person, by phone or email on an individual basis for those who are late or absent under any circumstance.

Students must arrive prepared for class with projects or materials. Students who do not comply with this are subject to final grade point deductions. Students who do not participate in class critiques or individual discussions with faculty during class should not expect private critiques with faculty at a later date. Arrange for delivery of your project if you are ill on the day an assignment is due.

Required Text
There is not a required textbook for this class. However, the student is responsible for thoroughly researching the suggested artists, websites, materials, ideas etc. for each project.

Methods & Evaluation
Projects involve problem-solving with an emphasis placed on conceptual thinking with experimentation. Critiques and discussion of work are important to the process of projects for this class. Students are expected to participate in critiques and be able to present their ideas and work. Completion of all projects by their assigned due date is required. Final grades will be based on these factors as well as your creative process and the quality of the work presented.
