PSYCHOLOGICAL CRISES/SUBSTANCE ABUSE

What is a psychological crisis?
This occurs when an individual is threatening harm to themselves or others, or is out of touch with reality.

What are signs of a psychological crisis?
The crisis may manifest as
- Being disruptive or threatening
- Paranoia,
- Hallucinations,
- Uncontrollable behavior or

Troubled or less severe psychological crises may involve uncontrolled crying, feelings of panic, withdrawal, or anger/yelling (without indications/threats of physical harm). If the psychological crisis resolves quickly in response to attention and kindness, no intervention of professional counselors or officers may be necessary. Plans for follow-up support should be put in place (i.e., a follow-up conversation, a referral to counseling, an action-plan should the situation become acute again, etc.). If the crisis does not resolve, or escalates, follow the guidelines below for a major psychological crisis.

What should I do if someone around me is experiencing a psychological crisis?
A major psychological crisis always requires the intervention of trained personnel.

- DO NOT attempt to handle the potentially dangerous situation alone.
- CALL 911. All suicide attempts should be immediately reported to the police.
- CONSIDER the safety of the person in crisis and those around him/her to be of first concern.
- FOR STUDENTS:
  - Counseling and Psychological Services personnel can be contacted for consultation or assistance in resolving the situation or provide post-trauma counseling and referrals. The Dean of Students Office Student Crisis Awareness Committee (561-297-3542) should be contacted for continued assistance.
