**ADHUS/FAU HIGH SCHOOL COMPLEX
SELECTION OF ELEMENTS BY DONORS**

The *Let's Build This Together* campaign started in 2017 and an element naming menu was created from the proposed drawings to share with donors. Early donors to the campaign were given the option to either choose an element from the proposed element menu, which they knew would likely have changes in the design and build process, or choose an element at a later date once the plans were finalized.

Most donors chose to sign Gift Agreements for “Unnamed Elements” in their initial gift agreement. Donors who signed gift agreements for an unnamed element, selected their element from an updated list of elements when the design was final. Each of these donors then executed amendment letters to make their element choice official. In each of these cases the element naming was approved by the Board of Trustees at an earlier date, and we are notifying you today that the final step of executing an amendment letter to choose a specific element has been completed.

The list of donors amending their gift agreements to add a specified element as follows:
