

## *Wednesday Night Lecture Series*

(Last One for the School Year!)

### “Beyond Green Building”

Green building is a concept that has found great popularity in the world of planning recently. Many are familiar with the LEED accreditation that is associated with it and the elements that comprise the rating system, but Living Designs Group has taken the concept a step further. With sustainable design projects that include features such as the wastewater treatment system pictured below, the firm seeks to design buildings that are truly living systems.

**Who:** John Szerdi, Living Designs Group, LLC

**When:** Wednesday, April 9<sup>th</sup>, 2008

Complimentary refreshments served at 5:00pm

Lecture begins at 5:30pm and concludes at 6:45pm
