**Quantcast** measures and organizes the world's audiences in real-time so advertisers can buy, sell and connect with the people who matter most to them. Leveraging Big Data and real-time, statistical analysis; we provide advertisers with a new way for advertisers to evaluate their target customers against the entire Internet population. This allows our clients to identify prospective customers numbering in the tens of millions. Launched in 2006, we are currently used by the top 10 media agencies and more than half of the top advertising supported publishers. Quantcast works with over 30 of the top brands by advertising spend and marketers from every major vertical use us to define and buy the audiences that matter to them most.

**Quantcast** is a burgeoning startup company based in San Francisco, CA. Our jobs and internships offer FAU students the opportunity to work with some of the most cutting edge and innovative technologies in the high tech field, including distributed filesystem design, MapReduce system development, cluster processing, and statistical analysis of multi-petabyte data sets

At **Quantcast**, an intern or a new grad hire will experience how engineering gets done in a fast-paced, entrepreneurial environment. Interns and new hires will work side-by-side with our senior engineers on high priority projects. From day one, our engineers and interns will have an opportunity to build new and useful tools that our customers will use and that will contribute to the company's strategic goals.
