If you choose to pay your balance online using a checking or savings account, please follow these instructions:

1. Re-enter the account number in reverse order when asked to confirm the account number. If you do not re-enter in reverse order you will get an error message
2. Use a bank statement or check to locate the account number and include all account number digits from the statement or check, including leading zeroes.
3. Do not use a debit card number as the account number -this will result in returned payments and added fees.
4. The Bank Routing Number must be the ACH routing number and is usually found on the bottom of a check.
5. Do not use a Bank Routing Number from a deposit slip, this is usually not a correct routing number for ACH transactions.

Payments returned for any reason, including invalid account numbers will be charged a returned check fee with **NO EXCEPTIONS.**

The example below illustrates how to locate your account number:

The MICR line configuration on the bottom of your checks should match the example shown here. The Routing Number **ALWAYS** comes first, is 9 digits exactly and starts with 0, 1, 2, or 3. When entering your account number, do not enter your check number in the account number field, be sure to include all leading zero's (**IF ANY**) and omit any special characters or spaces. Your account number may be shorter or longer than this example.

Should you have any questions when making a payment, please email webcontroller@fau.edu or call 561-297-6101.
