

MARCH 21, 2007

"Infill and Brownfield Redevelopment Planning"

Lecture by: **Michael R. Goldstein, Esq.**
Chairman, Florida Brownfields Association
Chairman, Miami-Dade County Brownfields Oversight Committee

The issues facing planners in South Florida are both exciting opportunities and overwhelming obstacles. The Board Members of the Florida Atlantic Planning Society have embraced the concept that planning in South Florida is like no other. The concept for this series is to discuss the individual components that make up an effective plan. The objective is to formulate an idea on how to achieve the ultimate goal – better planning in South Florida.

While some may view the lack of undeveloped land in Broward County as a problem, many planners and community leaders view this as an opportunity to redevelop underutilized downtowns and land that has been perceived as undevelopable due to contamination. Although this is of immediate importance to Broward County, Miami-Dade and Palm Beach Counties are also struggling with redevelopment as a deterrent to sprawl.

Please join FAPS for this fascinating lecture on the challenges, opportunities and latest updates in infill and Brownfield redevelopment planning. In addition to being the Chairman for both the Florida Brownfields Association and the Miami-Dade County Brownfields Oversight Committee, Michael R. Goldstein is also an attorney practicing environmental law. He has extensive experience in Brownfield policy and strategic planning.

This lecture is scheduled for Wednesday, MARCH 21, 2007 at the Fort Lauderdale Campus, HEC building, 11th Floor, room 1110. Complimentary food and drinks are served at 5:00PM. The lecture begins at 5:30PM and will conclude at 6:45PM.
