

## *Wednesday Night Lecture Series*

### “Renewable Energy in South Florida”

With one of the world’s strongest ocean currents and an abundance of sunshine, Florida is inherently poised to reap the many benefits of renewable energy. This lecture will explore those energy options and what they mean to our area.

**Who:** Mr. Carsten Bethge, Advanced Green Technologies

Dr. Frederick Driscoll, Institute for Ocean and Systems Engineering, FAU

**What:** Mr. Bethge will explain the solar panel technology that will be installed on the HEC roof.

Dr. Driscoll will speak about SeaTech’s innovative project that seeks to harness the energy of the Gulf Stream through turbines.

**When:** Wednesday, January 16<sup>th</sup>, 2008  
Complimentary refreshments served at 5:00pm  
Lecture begins at 5:30pm and concludes at 6:45pm

**Where:** Askew Tower, Room 728  
Downtown Fort Lauderdale campus  
111 E. Las Olas Boulevard  
Fort Lauderdale
