Biography

Dr. Bryan Nichols joined the Department of Teaching and Learning in Florida Atlantic University (FAU)'s College of Education as Assistant Professor in 2014. He teaches various science education and environmental education courses.

Dr. Nichols has authored book chapters and articles for academic publications and presented at national and international conferences. He has extensive environmental education experience and has been involved with field research on a wide range of marine and terrestrial wildlife. He enjoys educational research; designing interactive and engaging courses; and getting outside for sea kayaking, scuba diving, and hiking.
