TITLE: ADVERTISEMENT FOR SELECTION OF CONSTRUCTION MANAGER (MAJOR and MINOR PROJECTS)

OBJECTIVE AND PURPOSE:
To ensure timely advertisement for CM selection based on Minor Projects Continuing Services schedule or Major Projects Facility Program Schedule and funding appropriation. To ensure that the advertisement process is consistent with State Statutes. The criteria to be used in determining which projects are candidates for construction management are provided in Rule 6C-14.0055(2), F.A.C. In addition to those criteria, each Major project for which construction management services are utilized must have an approved facilities program. The program should address the aspects of the project, which demonstrates the need for the construction management delivery method. Adequate funding for preconstruction services must be available during the planning phase and must be considered when planning funds are requested for appropriation. The construction manager should be selected during the schematic design phase of the project and made an integral part of the design team. However, if the construction manager is selected at another time, appropriate adjustments must be made. Contracts for construction management services consist of two phases. The first phase of the contract is for preconstruction services, wherein the construction manager functions as an agent of the Owner, is paid a fixed fee for services performed, and is an integral part of the design team. Preconstruction services shall include value engineering, scheduling, constructability analyses, etc., and the development of a Guaranteed Maximum Price (GMP). If the GMP is accepted, the second phase (the construction phase) is implemented. During the construction phase, the construction manager ceases to be an agent of the owner, becomes the single point of responsibility for performance of the construction contract for the project, and functions in the role of an independent contractor, publicly bidding trade contracts.
