
SUPPORTING DATA**18 Coastal Management****Coastal Management Supporting Data**

The purpose of the Coastal Management element is to provide for the protection of residents and property in those campuses or portions of campuses within the coastal area of the host community, and to limit expenditures, and where appropriate, restrict development, in those areas subject to destruction by natural disaster within the coastal high hazard area.

Coastal High Hazard Zone

The Treasure Coast Campus is inland and out of the high hazard zone; therefore this site is not subject to the Coastal Management issues.

Emergency Sheltering

In accordance with BOR guidelines, emergency shelter space will be programmed into future development. In addition, open space and parking lots are potentially available for staging emergency operations.
