COURSE OVERVIEW:

This course has been designed to engage the learner in a comparative investigation of educational trends and issues in the USA and the Ireland and other European countries, based upon the preparation and implementation of a two week international experience in Dublin. Each student will explore Irish and European principles of instructional pedagogy from a theoretical, philosophical, and sociological perspective. Various technological communication methods and strategies will be used to establish positive working relationships with educational personnel at schools and community settings in both countries, including electronic mail, audio connectivity, and streaming video capabilities.

As an integral part of the course, learners will participate in numerous field experience activities at European sites selected by the learner to support and enhance the cultural exchange component of this unique experience. These experiences will allow learners to acquire a professional perspective of the global issues facing institutions and organizations in the arena of curriculum trends in developing and industrialized nations for a 21st century citizen.
EXPECTED OUTCOMES:

Through online interaction utilizing the Blackboard platform, on-site Dublin practicum participation, observations, information technology integration experiences, written assignments, presentations, and seminar discussions, the graduate students will be able to:

1. Have a better understanding of the social and governmental differentiation of educational organizations & systems.
2. Participate in collaboration with specialists and peer professionals in the culturally diverse population of Dublin and other European communities as they investigate strategically supported instruction for educational or training purposes.
3. Increase their knowledge by the review and analysis of Irish and other European educational systems in relation to the foundations of teaching and learning and curriculum trends & issues from practical hands-on experiences.
4. Better analyze and synthesize the national curriculum and assessment standards of visited nations as it relates to pedagogical innovations used in the educational and business related settings.
5. Make informed value judgments based on research and current best practices for the instructional differences and similarities and curricular conditions from a global perspective.

TEACHING METHODOLOGY INCLUDES:

- Experience-based learning
- Library Assignment/Literature Reviews
- Group Collaboration
- Questioning for Knowledge & Comprehension
- Discussions
- Telecommuting

ASSESSMENT PROCEDURES INCLUDE:

- Discussion
- Presentation/Collaboration
- Writing Assignments
- Participation Online
