DSW Program Mission
The DSW program provides doctoral-level practitioners with educational experiences that will allow them to engage in advanced clinical social work practice, conduct advanced clinical research, teach evidence-based practice courses, and assume leadership roles in the social work profession. Upon completion, DSW graduates will be able to:

- Integrate social work, social, and behavioral sciences with other disciplines as the basis for the highest level of evidence-based social work practice.
- Demonstrate professionalism, leadership, ethical principles, and scientific integrity in advanced social work practice, education, and research.
- Provide collaborative leadership in the development of social work evidence-based practice models and standards of care for diverse populations.
- Generate client, systems, practice, and outcomes research.
- Analyze theory, empirical research, and other evidence to guide improvements in social work practice.
- Utilize information systems and technology to enhance social work education and practice.

Course Description
This course focuses on evidence-informed advanced clinical social work practice with groups. This course provides the student with an understanding of best clinical social work practice with groups which is grounded in evidence-informed research literature.

Relevance to Educational Program
Students preparing to be doctoral level social work clinicians are expected to learn and develop advanced knowledge, skills and practices necessary to address a wide variety of issues in the context of clinical social work groups. In order to maximize the effectiveness of clinical interventions, social workers must be knowledgeable in empirically supported
interventions for groups. This course will specifically focus on various theoretical models for social work groups and will utilize research to inform best practice.

Course Objectives

Upon successful completion of this course, students will be able to:

- Examine foundational theories, models and methods of assessment and counseling intervention with emphasis on systems theory.
- Conceptualize individual, couple and family problems using a systemic framework.
- Understand the application of fundamental systemic therapy approaches to identify and resolve individual, couple, and family emotional and behavior difficulty.
- Identify the dynamics of the emotionally healthy couple and family, as well as identify effective intervention for mental health and relationship problems which occur in the couple and family relationships.
- Explain how diversity and cultural background may impede the clinical process and methods for resolving these issues.
- Identify empirical research to support the effectiveness of identified therapeutic models for couple and family settings.
- Demonstrate competence in utilizing research to inform clinical practice.

Required Textbooks/Readings

Safe Assign

Students agree that by taking this course all required papers may be subject to submission for textual similarity review to SafeAssign for the detection of plagiarism. All submitted papers will be included as source documents in the SafeAssign reference database solely for the purpose of detecting plagiarism of such papers.

Course Assignments and Grading

The assignments for this course consist of presentations, group proposal, group facilitator assignment, mid-term, family psychosocial assessment, and class participation.

Assignment 1: PAPER - Social Work and Groups – Historical Review of Group Work (45%)

The purpose of this assignment is to develop knowledge & sensitivity to professional social work’s distinctive relationship with clinical group work. Related to your current specific area of social work practice, or the area in which you intend to pursue your clinical research, investigate how professional social work has engaged this specific task/problem or population in group work. The paper should include the theoretical orientations which support specific interventions for the selected topic, any literature which reports efficacy, and how this topic/population is currently considered in the therapeutic group literature. Paper length- 15-20 pages. A group presentation of 45 minutes is the second part of this assignment.

Assignment 2: Proposal Paper About Group Composition and Presentation (45%)

The overall purpose of this assignment is to prepare a cutting-edge plan based on evidence-based group practice for a psycho-educational or therapeutic group that you are doing, going to (or potentially could) develop and lead (15-20 pages, APA format, 12-inch font, 1-inch margins, no abstract, include reference list). This proposal should be a realistic one that is relevant for a social work setting drawn from evidence-based practice theories. The group topic should be discussed with the instructor. The presentation includes a 45 minute oral summary of the proposal to the class using a PowerPoint presentation.
Include information grounded in evidence-based theory about group composition (how to select members), required skill of a leader/facilitator for this type of group and theoretical approach, identifying goals, etc. The paper should focus specifically on relevant group practice models which have been identified as clinically effective. This paper should connect evidence-based group theory with best practice skills, specific problems/tasks/challenges that members will engage. If this group is predicated on a specific population as the focus (e.g., Latin American women, African American teens, or lesbian and gay elders), literature specific to this population must be included. Ideally, select a client population that you are currently working with or that fits with your current course of study.

EVALUATION:

a) Clarity and conciseness of writing and presentation;
   b) Logical presentation;
   c) Soundness of rationale for decisions;
   d) Comprehensive of key issues for proposal;

PARTICIPATION (10%)

GRADING SYSTEM

CODE OF ACADEMIC INTEGRITY
Students at Florida Atlantic University are expected to maintain the highest ethical standards. Academic dishonesty, including cheating and plagiarism, is considered a serious breach of these ethical standards, because it interferes with the University mission to provide a high quality education in which no student enjoys an unfair advantage over any other. Academic dishonesty is also destructive of the University community, which is grounded in a system of mutual trust and places high value on personal integrity and individual responsibility. Harsh penalties are associated with academic dishonesty. For more information, see http://www.fau.edu/ctl/4.001_Code_of_Academic_Integrity.pdf.

ADDITIONAL INFORMATION ON STUDENT RIGHTS and RESPONSIBILITIES
For additional information on student rights and responsibilities, please see the FAU Catalog at http://www.fau.edu/registrar/universitycatalog/welcome.php, DSW policies at http://www.fau.edu/ssw/dsw.
Dear Dr.,

We are sending you this email and attachments because of your involvement at FAU in doctoral education. As you might be aware, the Board of Governors approved the Doctor of Social Work (DSW) degree this past winter. This degree program seeks to train clinical social work practitioners already possessing an MSW (Master of Social Work) degree. The program seeks to develop advanced clinical social work practitioners and clinical social work researchers. We are admitting the first cohort this fall. We believe these clinical scholars will advance professional social work and provide a much needed clinical faculty for current social work programs. Most of the courses for the first year of study have made their way through the GPC and various other committees this past spring. The School of Social Work plans to present the remaining courses to the GPC and the other committees early this fall. These are courses for students who already possess a Master of Social Work degree and are licensed/license-eligible as social workers. Students from other disciplines are not accepted into the DSW program.

The Course Proposal form from Graduate Programs requests that we consult and list all departments that might be affected by the new courses and that we provide their comments, support, etc. I would appreciate that you direct any concerns to me at your earliest convenience.

I am attaching syllabi for the new courses that are being submitted for approval.
1. Advanced Clinical Social Work Research & Statistics
2. Advanced Clinical Social Work Capstone 1
3. Psychopathology in Advanced Clinical Social Work Practice
4. Advanced Clinical Social Work Evidence-based Practice with Families and Couples
5. Advanced Clinical Social Work Evidence-based Practice with Groups
6. Advanced Clinical Social Work Capstone 2
7. Advanced Clinical Social Work Practicum
8. Advanced Clinical Social Work Seminar
9. Advanced Clinical Social Work Capstone 3
10. Emerging Theories and Methods in Advanced Clinical Social Work
11. Qualitative Research in Clinical Social Work

Thank you in advance for all your help and support with this important process.
