Institutional Animal Care and Use Committee (IACUC)		Institutional Review Board (IRB)
Include but are not limited to: <ul style="list-style-type: none"> • Rodents (mice, rats) • Marine Mammals • Sharks • Fish • Birds • Non-human primates • Turtles and Tortoises • Rabbits 	Subjects that do not need IACUC approval include but are not limited to: <ul style="list-style-type: none"> • Amoebas • Clams • Drosophila melanogaster (fruit fly) • In vitro cell preparations using established cell lines • Insects, worms, jellyfish, starfish 	Human subjects' research can take many forms. Some examples include: <ul style="list-style-type: none"> • Interviews • Surveys • Focus groups • Medical chart reviews • Participant observation studies • Data and tissue banks • Clinical or exercise studies
Please indicate if your research includes any of these subjects and/forms of collecting data:		

*All students are required to submit proof of IRB and IACUC approval for all experiments. FAU-URJ adheres to professional standards of publication and therefore, all research must meet the international standards of research compliance.

By signing this agreement, you certify that all the facts contained in the submission are true and accurate, and that the submission does not infringe upon any copyright of any third party. By signing you also agree to acknowledge any help received from faculty, graduate students, or others in the course of the research and manuscript writing process. The student author also agrees to cooperate with editors in the editing process by promptly responding to e-mails and other means of contact and making a sincere effort to continue improving the manuscript to make it suitable for publication in the FAURJ.

I, _____, under the supervision/mentorship of _____ hereby submit this manuscript to the FAURJ. I attest that the work presented in my manuscript is my own original research unless otherwise acknowledged as outside references or as the contribution of my collaborators as stated to be contributors. I attest that I have used primary sources as references (for information about primary sources, please see <http://libguides.fau.edu/primary-sources-boca>). I confirm that the publishing of my manuscript in the FAURJ does not conflict with any other copyrights or legal bindings and I agree not to publish the manuscript in any other form prior to publication of the FAURJ. However, I do understand that I will retain the right to publish and present this research and the attached manuscript after publication.

Research Compliance Information

About IACUC

Florida Atlantic University’s Institutional Animal Care and Use Committee (IACUC) has been established in accordance with the Animal Welfare Act and Public Health Service Policy on the Humane Care and Use of Animals. The committee is composed of individuals dedicated to the humane care of animals used in research and teaching, and provides oversight and assistance in ensuring compliance to all laws, regulations, and policies governing the care and use of research and teaching animals. FAU’s IACUC is composed of scientists, non-scientists, veterinarians and community members who are appointed by the Vice President for Research, the Institutional Official responsible for the animal care and use program. FAU’s animal care and use program is regulated by both the U.S. Department of Agriculture and the U.S. Public Health Service. University faculty, staff, and students using animals in research, teaching or display must have IACUC approval to do so.

About IRB

Florida Atlantic University’s Institutional Review Board (IRB) is a federally mandated committee that oversees the ethical conduct of human subjects’ research at an institution. Florida Atlantic University’s IRB serves an important role in the protection of the rights and welfare of human subjects involved in research. The IRB reviews and approves protocols for research involving humans and ensures that appropriate steps are taken to protect their rights and welfare. FAU’s IRB is comprised of faculty members representing a variety of backgrounds, training and experience, as well as community members who are appointed by the Vice President for Research, the Institutional Official.

If your research meets the following two definitions then you are involved in research with human subjects: "Research" means a systematic investigation designed to develop or contribute to generalizable knowledge. "Human subject" means a living individual about whom an investigator conducting research obtains: 1.) data through intervention or interaction with the individual, or 2.) identifiable private information.
