The John Nambu Memorial Summer Research Experience for Undergraduates (REU) Program

Full-time research opportunities await undergraduate students this summer (May 16 – July 22, 2016). These are *exciting and once-in-a-lifetime* chances to perform research in sophisticated neuroscience and behavior-oriented labs while expanding your scientific expertise. Labs, including those of Drs. Ken Dawson-Scully, Tanja Godenschwege, Kailiang Jia, Greg Macleod, Rod Murphey, Bob Stackman, Alex Keene, and Randy Blakely (among others) are each seeking an additional undergraduate student this summer to perform research focused on neuroscience and behavior. Please visit our web site [http://www.science.fau.edu/biology/faculty/faculty.html](http://www.science.fau.edu/biology/faculty/faculty.html) to find if a professor’s research interests you. The successful undergraduate candidates will work full-time in the lab and spend at least one hour per week with the fellow undergrads in the program and Dr. Cathy Trivigno as a mentor. Students often complete a thesis through the program. The program runs full-time during the summer, with the option of continuing into the academic year. A summer stipend is included.

*Sophomores and Juniors* are especially encouraged to apply. In order to submit your application: complete the second and third pages and forward with your CV, personal statement and (unofficial) transcript to Dr. Cathy Trivigno at trivigno@fau.edu by March 1, 2016.

---

**Did you know?**

*Two Research Giants* have built new facilities on FAU’s Jupiter campus:

- The Scripps Research Institute and
- Max Planck Florida Institute for Neuroscience.

FAU has a renovated research building for neuroscience in Jupiter.

**YOU can do research in this growing neuroscience community!**

Application

Z#__________________

Last name:_________________________ First name:_________________________ MI: __________

Home Address:__________________________________________________________

City:_________________________ State:___________ Country:_______________

Cell Phone #: __________________________ email address:__________________________

Please indicate below the name(s) of the neuroscience and behavior-oriented faculty in which you have interest:

________________________________________________________

Please indicate which campus that you would consider working on:

_____ Jupiter  _____ Boca Raton

If you have specific skills applicable to biological research (e.g., laboratory experience, photomicrography, video recording, use of computer packages, statistics), please indicate them below:

_____________________________________________________________________

_____________________________________________________________________

_____________________________________________________________________

_____________________________________________________________________

Career goals after obtaining undergraduate degree:

_____________________________________________________________________

_____________________________________________________________________
Membership in professional and honor societies; honors and awards:

I certify that the information given in this application is complete and accurate.

Signature: __________________________ Date: __________________________

Send this application, your CV, personal statement and (unofficial) transcript to Dr. Cathy Trivigno trivigno@fau.edu

Submission Deadline: March 1, 2016.
