TIP OF THE MONTH

BICYCLE SAFETY AWARENESS

May is Bicycle Safety Awareness Month! Bicycle safety is important, especially here at FAU where a significant majority of our resident population use bicycles for transportation. Our safety initiatives focus on encouraging making safer choices to help reduce the risk of injury.

**Wear personal protection equipment.** Each bicycle ride should begin with using a helmet. Ensure proper fitment so you can be protected in the event of a crash. Wear other equipment if necessary.

**Drive defensively and responsibly.** Be focused and alert while riding, especially during rush hour traffic. Remain visible and watch out for other vehicles and pedestrians.

**Follow state laws.** Obey street signs, signals, and road markings, including stop signs and street lights. Ride with the flow of traffic and avoid riding on the sidewalk when possible.
