The Southeast National Marine Renewable Energy Center at FAU is hosting an intensive summer research program focused on science and engineering challenges related to the environmentally friendly creation of electricity from ocean currents.

Research will focus on: resource assessment, system design, and environmental impacts.

This ten-week program emphasizes training, mentoring and research, preparing students for graduate studies or careers in science, technology, engineering or math disciplines.

Work days will typically run from 8 a.m. to 5 p.m., including student development and training events held 2-3 times weekly.

Housing will be provided on FAU’s beautiful Boca Raton or Harbor Branch Oceanographic Institute campuses. Stipends of $500/week will be provided, along with a food allowance of $150/week.

Registration deadline: February 22, 2018

Applicants will be notified on or before March 8, 2018 regarding acceptance to this program.
