Undergraduate Research Opportunity in Renewable Energy

NSF REU Site in Marine Renewable Energy

FAU is hosting an intensive summer research program focused on science and engineering challenges related to the environmentally friendly creation of electricity from marine renewable energy resources.

Research will focus on: resource assessment, system design and operation, and environmental impacts.

This ten-week program emphasizes training, mentoring and research, preparing students for graduate studies or careers in science, technology, engineering or math disciplines.

Work days will typically run from 8 a.m. to 5 p.m., including student development and training events held 1-2 times weekly.

Housing will be provided on FAU’s beautiful Boca Raton or Harbor Branch Oceanographic Institute campuses. Stipends of $600/week will also be provided, along with a food allowance of $150/week.

Registration opens: February 8, 2020
Registration deadline: March 1, 2020

Applicants will be notified on or before March 14, 2020 regarding acceptance to this program.
