House Discussion

  - 2nd by Rep. Scerbo

Location of Lockers:

- Advisor Ferrando suggested taking the dimensions of the lockers
- Lockers should be viewable from the entrance of the Burrow. It is revealed that the lockers can disassemble.
- Currently only 3 lockers are in use. We would use 12 for the Pilot Program and leave 6 for clubs.
- Rep. Galluzzo suggests placing lockers by the piano in the Burrow.
- Students would have to ask ACM for locker key or permission/access to lockers.
- Rep. Galluzzo suggests the location by the SAVI board for the lockers.
- Renata suggests taking dimensions of the lockers, and suggests placing lockers by trash cans.
- The committee agrees that lockers should be presentable and in clear sight, but not an eyesore.
- Rep Scerbo agrees with Renata’s suggestion and believes that placing the lockers by the trash cans would not be an eyesore.
- Lisa suggests area by ping pong table, which Chair Smith feels would be an obstruction.
- Lisa suggests switching the pool table’s location with the ping pong table in order to avoid obstruction.
- Rep. Galluzzo suggests that we discuss the location of lockers for the pilot program only.
- Lisa acknowledges this suggestion, and recommends foresight, stating that a location should be considered for Fall 2011.
- Chair Smith mentions the area by the television in the Burrow as a potential location, only if the television is moved.
- Lisa recommends area by the main entrance for easy accessibility, although a liability dispute may arise with ACM.
- Chair Smith states that the committee should agree on 3 ideal locations.

- Dimensions of lockers: 2’ ¼” wide x 6’ 6” tall x 1’ deep

- The committee examined the Burrow for ideal locations based on the given dimensions, and agreed on the following:

- **Option 1:** Corner next to trophy case near front entrance of the Burrow
- **Option 2:** Area next to OWL TV office
- **Option 3:** Switch ping pong and pool table and place the lockers by the new pool table location.

**Discussion on Locks:**

- Renata suggests finding a way to utilize the existing lock mechanisms on lockers.
- Lisa suggests theme-park-style locks.
The committee discussed the problems that may arise due to combination locks, such as students memorizing combos and using lockers without permission.

Rep. Scerbo states that a key lock would be the best option based on price, as well as control over who could use locks. Keys would be lent out after providing Owl card to ACM.

Chair Smith states that re-configuring the existing locking mechanism might be too expensive; Lisa agrees.

Chair Smith tells the committee that we are looking to purchase up to 10 locks.

The committee is asked to consider a master-key system vs. small locks based on cost and effectiveness.

Rep. Galluzzo agrees to compile a price list for different types of locks.

Chair Smith will try to take existing lock mechanism to Home Depot in order to pursue a master key option.
