How to Find the MAC Address

Mac Users

1. Select **System Preferences** from the Apple menu at the top left of your screen.

2. Click **Network** from the System Preferences menu.

3. Choose **Wi-Fi** from the list of interfaces on the left and click the **Advanced button**.

4. Choose the **Hardware tab** under which you will see the MAC address of your wireless card.

5. Press **Cancel** to return to the **Network menu**. Choose **Ethernet** from the list of interfaces on the left and click the **Advanced button**.

6. Choose the **Hardware tab** under which you will see the MAC address of your Ethernet card.
