SEQUENCE IN FILM, VIDEO, & NEW MEDIA (38-39 credits minimum)

The Sequence in Film, Video and New Media is a comprehensive curriculum that includes courses in film studies, television studies, video production, computer animation, and studies and practices in multimedia, interactive media, and new technologies. The goal is to help the undergraduate understand the study and creation of visual media within the larger contexts of human visual and verbal expression, and to shape students into sophisticated readers and producers of visual culture. Pre-Multimedia Studies:
SEQUENCE IN MULTIMEDIA JOURNALISM (38 credits minimum)

The Multimedia Journalism Sequence prepares students to work in the new media convergence environment where competition, deregulation, and digital technology break down the barriers among print, radio, television, and the Internet. Students are expected to develop strong basic writing and analytical skills and then to become adept at writing and producing for multiple media platforms simultaneously, exhibiting the versatility necessary to succeed in a quickly evolving and growing media market. The goals of the Multimedia Journalism Sequence are to provide a broad liberal arts education as well as developing professional skills so the graduates are able to fully exercise the civic responsibilities of journalists for the lively functioning of democratic institutions. In addition, students will choose an emphasis in another discipline that will help them fulfill the important role of information provider in today's global, technological, and information-based society.

Pre-Communication Studies (36 credits minimum)

The B.A. in Communication Studies is a problem-focused program that emphasizes contemporary cultural concerns while situating these within the broader historical context of communication and cultural theory. The purpose of the degree is to provide students with the awareness, knowledge, motivation and skills to develop communication strategies to address the problems of a global society, and the emphasis is on all forms of civic engagement. The program examines the strategic role that symbol systems play in constructing meaning in a fast-changing, information-based, media-saturated and culturally diverse world. Courses examine how meaning informs and persuades individuals, and introduce students to the history and theories of how communication operates in societies. The goal is for students to demonstrate a high level of oral and written communication, critical thinking and analytical problem-solving skills, and to become active in civic life.
