

General Information

Vision Statement

Florida Atlantic University aspires to be recognized as a university of first choice for excellent and accessible undergraduate and graduate education, distinguished for the quality of its programs across multiple campuses, emulated for its collaborations with regional partners, and internationally acclaimed for its contributions to creativity and research.

Mission Statement

Florida Atlantic University is a public research university with multiple campuses along the southeast Florida coast serving a uniquely diverse community. It promotes academic and personal development, discovery, and lifelong learning. FAU fulfills its mission through excellence and innovation in teaching, outstanding research and creative activities, public engagement, and distinctive scientific and cultural alliances, all within an environment that fosters inclusiveness.

FAU Values

Florida Atlantic University values an academic environment that facilitates intellectual growth through open and honest expression. The University is committed to excellence at all levels of the educational and creative experience, to success for all students, and to development of the capacity to make reasoned and discriminating judgments with respect for differences and diversity in ideas. The University values lifelong learning because it encourages the continual use of the mind. The University values the vital role it plays in the life of the surrounding community, in society, and as an engine for economic development. More specifically, the University is committed to:

- Preparing students to fulfill productive destinies in the workplace and in society;
- Promoting academic freedom and an atmosphere of free and open inquiry;
- Recognizing and rewarding superior performance, innovation, and creativity in all facets of University activity;
- Supporting all those who rely on the University, such as families, employers of students and graduates, and community partners;
 - Accounting for the sound use and careful stewardship of its resources, ensuring responsibility for its mission;
 - Providing equal access and equal rights and justice for all persons and encouraging mutual regard for the rights and liberties of all persons;

- Respecting all persons and displaying civility in all interactions;
- Providing a secure environment for the pursuit of learning;
- Fostering community service and social responsibility;
 - Promoting honesty in all spheres, social and moral development, and ethical standards in all areas of human activity; and
 - Assuring clear and open communication and sharing of information.

History and Characteristics

Florida Atlantic University was established by the Florida State Legislature in 1961 as the fifth university in the state system. When it originally opened in 1964, FAU was the first university in the country to offer only upper-division and graduate-level work. This model was based on the theory that freshmen and sophomores would be served by the community college system.

Located in rapidly growing South Florida, the University responded to population growth and the need to provide increased access to higher education by admitting its first freshmen class in 1984.

Today, with its developed system of distributed campuses, where the same high-quality education is offered at seven different locations, Florida Atlantic University serves as a model for urban, regional universities of the future. It offers a comprehensive array of undergraduate and graduate programs and enrolls nearly 26,000 students who reflect the rich cultural diversity of the region.

Florida Atlantic University's colleges include the College of Architecture, Urban and Public Affairs, the Dorothy F. Schmidt College of Arts and Letters, the Charles E. Schmidt College of Biomedical Science, the Barry Kaye College of Business, the College of Education, the College of Engineering and Computer Science, the Harriet L. Wilkes Honors College, the Christine E. Lynn College of Nursing, and the Charles E. Schmidt College of Science. These colleges offer more than 170 degree programs—83 bachelor's, 72 master's, 3 specialist's, and 19 doctoral degrees.

The Harriet L. Wilkes Honors College, opened in 1999, provides a unique and challenging four-year curriculum for the brightest students from Florida and beyond. In 2004, FAU launched a medical school program in conjunction with the University of Miami (UM). Medical students spend the first two years of their education at the Boca Raton campus before transferring to Miami for rotations and receiving their degree from UM. Through the University's newest college, the Charles E. Schmidt College of Biomedical Science, the program is

being expanded to allow students to complete the entire program at the Boca Raton campus. In addition, the University is home to a wide-ranging continuing education program and one of the largest and most successful lifelong learning programs in the nation.

The University's campus locations are situated along the Florida Gold and Treasure coasts, which boast a temperate climate and beautiful beaches, innovative industry, and unique cultural opportunities. University locations provide a stimulating environment for its outstanding scholars and researchers. FAU has Eminent Scholar Chairs in many academic disciplines, and it is the home of nationally recognized research centers. The University's burgeoning research parks are facilitating exciting new research and learning initiatives by bringing high-tech industries into close collaboration with faculty and students. In recognition of the University's research funding and doctoral programs, the Division of Colleges and Universities of the Florida Board of Education has designated FAU as a research university. Additionally, FAU has been classified as a "Research University - High Research Activity" by Carnegie.

Florida Atlantic University is a member of the Southern Association of Colleges and Schools, the National Association of State Universities and Land-Grant Colleges, and the Council of Graduate Schools in the United States.

Boca Raton Location

Florida Atlantic University was founded in 1964 in Boca Raton on an 850-acre site located near the Atlantic Ocean. The campus is conveniently located halfway between West Palm Beach and Fort Lauderdale and offers a broad range of academic programs, activities, and services.

The Boca Raton campus provides an exciting and supportive learning environment for students. The University Center (Student Union) hosts student activities and meetings. In addition, the 2,400-seat Carole and Barry Kaye Performing Arts Auditorium, located in the University Center, enables students and members of the community to enjoy performances ranging from comedians to opera. The campus supports a variety of popular dining options and has an attractive array of accommodations for its residential students. The Boca Raton campus is also the home of FAU's aquatic center, arena, tennis courts, track, and a variety of fields for club and intramural sports competition.

The five-story S.E. Wimberly Library houses a large collection of monographs, serials, and other academic resources. Computer labs, study lounges, a media center, and tutoring services also provide valuable academic support for students. The Boca Raton campus hosts art exhibits, theatre productions, and concerts in its two galleries and theatre. Visiting performers and speakers add to the artistic and intellectual vibrancy of the campus. In addition, the campus is home to the Alexander D. Henderson University School, FAU High School, and several educational and research centers. FAU's Research Park, situated at the north end of the campus, provides students with internship, research, and other opportunities linked to the high-tech industries located there.

Boca Raton Campus Degree Programs

The College of Architecture, Urban and Public Affairs

Undergraduate:

Criminal Justice
Public Management
Social Work

Graduate:

Criminology and Criminal Justice
Nonprofit Management
Social Work

The Dorothy F. Schmidt College of Arts and Letters

Undergraduate:

Anthropology	Italian
Art History	Jewish Studies
Communication Studies	Linguistics
English	Multimedia Studies
French	Music
German	Philosophy
History	Political Science
Interdisciplinary Studies: Arts and Humanities	Sociology
Interdisciplinary Studies: Social Science	Spanish
	Theatre
	Visual Art
	Graphic Design
	Studio Art

Graduate:

Anthropology	Linguistics
Art	Music
Communication	Political Science
Comparative Literature	Sociology
Comparative Studies	Spanish
Creative Writing	Theatre
English	Visual Art
French	Ceramics
History	Painting
Liberal Studies	Women's Studies

Chemistry	Physics
Geography	Psychobiology
Geology	Psychology

Graduate:

Applied Mathematics and Statistics
 Biological Sciences
 Chemistry
 Complex Systems and Brain Science
 Environmental Sciences
 Geography
 Geology
 Mathematical Sciences
 Physics
 Psychology

Florida Atlantic University in Broward County

FAU has been designated by the State Legislature as the lead public institution of higher education in Broward County. FAU's three Broward campuses support the overall mission of the University by providing access to high quality, complete undergraduate and graduate degree programs to residents of Broward County and the region. Each of the Broward sites—Dania Beach, Davie, and Fort Lauderdale—has a special focus.

Dania Beach Campus and the SeaTech Research Institute

Located between the Atlantic Ocean and the Intracoastal Waterway in Dania Beach, the campus provides expanded academic and research opportunities for the Department of Ocean Engineering. Senior-level and graduate students may take both required and elective courses in the context of an ocean environment with hands-on and at-sea elements. Students benefit greatly from carrying out research and design projects directly in an ocean environment.

Davie Campus

Working in close partnership with Broward Community College and other educational institutions, the Davie campus creates a supportive learning environment with particular sensitivity to students of nontraditional ages and culturally diverse backgrounds. A high priority is placed on offering the complete upper-division portion of high demand undergraduate degree programs. Graduate programs in education are available on the Davie campus as well.

The campus is located on Broward Community College's central campus. Students may enter BCC as freshmen and graduate from FAU with undergraduate degrees in over 30 disciplines.

More than 260,000 square feet of carefully designed classrooms, teaching and research laboratories, and faculty, staff, and student offices are located on this campus along with a shared-use 112,000 square-foot FAU/BCC library designed for the 21st century. Other support facilities include a shared Childcare Center, a student Wellness Center, and a multiservice Student Union.

Fort Lauderdale Campus

FAU at Fort Lauderdale provides complete, targeted degree and certificate programs that benefit from the environment and resources found in a dynamic urban center. Graduate and upper-division undergraduate programs in the creative industries are offered on this campus. Located in downtown Fort Lauderdale, the campus also supports research and outreach appropriate to a high density population center. Two high-rise buildings house research centers, classrooms, laboratories, and the administrative home of the College of Architecture, Urban and Public Affairs. An adjacent main branch of the Broward County Library serves the students and faculty.

Dania Beach Campus Degree Programs

For information about FAU Broward campuses, call the administrative offices at 954-236-1000.

Jupiter and Treasure Coast Locations

The northern locations of Florida Atlantic University provide the resources of a great state university to the people of northern Palm Beach County and the Treasure Coast. FAU offers junior-, senior- and graduate-level courses at two of its northern locations, the John D. MacArthur campus in Jupiter and the Treasure Coast campus in Port St. Lucie. Articulation agreements with Palm Beach Community College and Indian River Community College ensure compatibility of degree requirements. Students with Associate of Arts degrees from these community colleges, or any public community college in Florida, are guaranteed admission to FAU.

A new FAU location on the Treasure Coast is the FAU/Harbor Branch Oceanographic Institution Marine Science Building in Fort Pierce. This state-of-the-art facility provides an ideal setting for marine science research and teaching.

John D. MacArthur Campus

Named for the late philanthropist, the John D. MacArthur campus in Jupiter is part of a 2,300-acre development project called Abacoa. Situated off Donald Ross Road, east of I-95, Abacoa incorporates business and residential development that includes the John D. MacArthur campus, also known as the Jupiter campus, as well as the spring training facility for the Florida Marlins and St. Louis Cardinals baseball teams.

This campus is the permanent site for FAU's northern Palm Beach County operations and the Harriet L. Wilkes Honors College. The campus currently occupies approximately 45 acres with 17 buildings, totaling more than 333,000 square feet. It includes eight classroom/office buildings, a library, a 500-seat auditorium, two residence halls, a dining hall, a museum building, and a central utility plant. The FAU/Scripps Science Facilities, temporary home of Scripps Florida, are located on the campus as well, with an expansion of 33,000 square feet under construction. Recreational facilities include a soccer field, swimming pool, and tennis, volleyball, and basketball courts.

The MacArthur campus is a full-service FAU partner campus. Student Affairs provides a complete range of services, including Admissions, Financial Aid, Health and Wellness, Career Development, and Counseling. Additionally, students have easy access to services provided by the campus offices for Registration and Records, Academic Advising, and Cashier services.

The campus allows FAU to further expand the number of course and program offerings in arts and letters, business, education, science, and urban and public affairs. A list of Jupiter campus degree programs follows. To meet the needs of students who often have competing career and family demands, FAU has morning, afternoon, and evening classes available each semester. For more information about the MacArthur campus, call 561-799-8500.

In addition to college credit courses, the MacArthur campus is a site of Lifelong Learning Society classes for adults who wish to enhance their career skills, pursue individual interests, or simply learn something new. For information about Continuing Education or Lifelong Learning Society classes, call 561-799-8547.

Harriet L. Wilkes Honors College

The Harriet L. Wilkes Honors College at Florida Atlantic University was the first public honors institution to be built from the ground up. It is a four-year, residential college located on the MacArthur campus in Jupiter.

Admission criteria are highly selective. The Honors College looks for students whose scholastic performance and abilities demonstrate an active approach to learning and the potential for academic growth.

The Honors College with its attractive student/faculty ratio of approximately 10:1 provides the environment for the highest quality liberal arts education. Tutorials, one-on-one learning, small classes, and affordable state tuition distinguish the Honors College at FAU from typical honors programs. The integration of this specially designed campus into the Abacoa community offers an ideal setting for both informal and formal education, an educational opportunity usually found only in small private colleges.

All concentrations at the Harriet L. Wilkes Honors College lead to a Bachelor of Arts in Liberal Arts and Sciences. Students choose areas of concentration from the humanities, the social sciences, and the natural sciences. While completing this degree, students are active participants in the design of their own education, and they also acquire the lifelong skill of learning independently.

Treasure Coast Campus

The Treasure Coast campus is conveniently situated in St. Lucie West, part of the rapidly developing city of Port St. Lucie. The first-rate facilities are shared with Indian River Community College (IRCC) in a unique 2+2 partnership. Located off I-95 and St. Lucie West Boulevard, the Treasure Coast campus is an easy commute for area students. FAU offers junior-, senior-, and graduate-level courses at the Treasure Coast campus, which has a rapidly expanding roster of undergraduate and graduate course offerings and degree programs.

Facilities include the Classroom/Office (CO) building that is home to faculty offices, a nursing laboratory/classroom, a large computer lab, and several general classrooms. The Joint-Use (JU) building houses the registration/student services area for FAU and IRCC, a spacious student lounge featuring a Subway restaurant, faculty offices, and the FAU administrative offices. The JU building also features state-of-the-art distance learning classrooms. The library, in a three-way partnership with FAU, IRCC and St. Lucie County, occupies two floors in this building. A student bookstore, classrooms, an art teaching lab, and a computer science lab are in the St. Lucie (SL) building at the southern end of campus.

A new FAU location situated in Fort Pierce is the FAU/Harbor Branch Oceanographic Institution Marine Science Building, featuring marine science research and teaching.

For information about FAU's Treasure Coast locations, call 772-873-3300.

University Libraries

The University Libraries include the S.E. Wimberly Library on the Boca Raton campus, collections housed at the Broward County Public Library to serve FAU in downtown Fort Lauderdale, a shared-use library with Broward Community College in Davie, a 20,000-square-foot library on the John D. MacArthur campus in Jupiter, and a shared-resource library with Indian River Community College and St. Lucie County located in Port St. Lucie.

The Wimberly Library is a 165,000-square-foot building in the heart of the Boca Raton campus. It provides faculty and student group study rooms, study carrels, seating for approximately 1,000, an electronic classroom, facilities for individuals with disabilities, an audiovisual media center, and a computer lab. In addition to the computers available for use throughout the library, the entire building is equipped for laptop wireless connectivity. Reference assistance is offered in person, by telephone, or by email, and library instruction sessions may be arranged for classes or individuals. A five-story addition opened in spring 2007 and provides students with a new 24-hour study location and many other features.

The library collection comprises more than 1 million volumes, 2.2 million microforms, and subscriptions to over 1,750 print and 11,055 electronic journals, as well as comprehensive collections of U.S. and Florida government documents, maps, curriculum materials, DVDs and videos, CDs and CD-ROMs, and other materials. Special Collections and Archives houses manuscripts and rare book collections in areas as diverse as Judaica to one-of-a-kind artists' books in the Jaffe Collection.

While the Libraries support the curriculum and research of FAU students and faculty, the collections are strongest in the following subject areas: African-American studies, architecture, biological sciences, communications, criminology and criminal justice, English and American literature, French literature, international business, Italian literature, Judaica, management, nursing, philosophy, social work, taxation, teacher education, women's studies, and audiovisual materials.

A computerized catalog of library holdings provides a listing of materials in the FAU Libraries and the other 10 Florida public university libraries. Hundreds of databases, many with full-text articles and books, are available through the Internet both in the library or off campus using EZproxy. Through memberships in the Southeast Florida Library Information Network (SEFLIN) and the Center for Research Libraries (CRL), the collections of area libraries and CRL are available to FAU students, faculty, and staff. Research materials not in the FAU Libraries collection may be obtained through interlibrary loan.

Distance Learning at FAU

FAU offers a variety of distance learning courses to help meet the needs of students who require more flexibility in their course work. These courses are designed for students who may not be able to attend a class at a specific time, day, or place due to work schedules, family responsibilities, travel, or physical challenges. Currently, FAU offers more than 180 courses via nontraditional delivery methods, including interactive television, prerecorded video, and the Internet.

Interactive video courses are taught at one campus and broadcast to other campuses and some industrial sites in an effort to bring education closer to the student. Prerecorded video courses are previously recorded by FAU faculty. Internet courses are available in a variety of subject areas. These courses are usually asynchronous and electronically interactive, but may use a combination of live chat rooms, threaded discussions, electronic bulletin boards, email, and/or interactive Web pages.

Visit <http://itss.fau.edu> to learn more about distance learning at FAU or call 561-297-0160.

University Learning Resources

The Division of University Learning Resources is a comprehensive nonprint resource center designed to meet the instructional needs of the University community. Through the departments of Audiovisual Media, Television Engineering, and Television Production, Instructional Services can assist in curriculum development and meet classroom media needs. Instructional Services offers assistance in the development of grant proposals as well as consultation on technical specifications and facilities development plans. Other services include providing facilities for satellite downlinks, compressed video teleconferencing, closed circuit origination, distance learning networks, and ITFS multichannel operations.

Office of Equal Opportunity Programs

The Office of Equal Opportunity Programs was established to ensure equal opportunity in education and employment without regard of race, sex, color, religion, national origin, marital status, or handicap. The director of the office serves as assistant to the president and is the University's coordinator for compliance with University policies regarding nondiscrimination. In addition, the director of Equal

Opportunity Programs coordinates and monitors the implementation of all programs designed to ensure equal opportunity and affirmative action for women and minority students and employees. The director also provides technical assistance in these areas to University administrators.

FAU Foundation

The Florida Atlantic University Foundation, Inc., is a nonprofit corporation established to provide the private support that all tax-assisted universities must have to achieve excellence. All gifts to the foundation are tax-deductible in accordance with rules of the Internal Revenue Service and are used in support of University projects according to the expressed wishes of the donors and in conformity with the mission of the University.

The executive director of the foundation, the officers of the foundation, and the board members of the foundation are prepared to counsel interested parties regarding the types of gifts that can be made and tax benefits resulting from donations.

FAU National Alumni Association

More than 100,000 FAU graduates stay in touch with the University through the FAU National Alumni Association (FAUNAA). Offering programs, publications and services throughout the year, FAUNAA is governed by a volunteer board of directors that meets quarterly.

FAUNAA-sponsored programs include the Alumni Hall of Fame Award, Distinguished Alumni Awards, Homecoming, cultural, sports and social events, professional development and networking programs, and constituent group events.

The Alumni Association awards annual scholarships to students and provides grants to student groups. Two student leadership organizations—the Student Alumni Association and Student Ambassadors—are also sponsored by the FAUNAA.

Office of Alumni Relations

The Office of Alumni Relations is the primary liaison between the University and the FAU National Alumni Association, Student Alumni Association and Student Ambassadors. The office coordinates all programs and events for FAU graduates. For information, visit www.faualumni.org.

Alexander D. Henderson University School and FAU High School

The Alexander D. Henderson University School (ADHUS), a department of the College of Education, is a campus laboratory school established in 1968. A gift from Lucy Henderson Edmondson enables FAU to operate this facility (www.adhus.fau.edu), which is devoted to education, research, and development. ADHUS offers kindergarten through eighth grade to a student body of 520. Children in both Broward and Palm Beach counties are eligible to attend this school. Parents may submit an admissions application for their child

the year the child turns four. In 2004, FAU High School opened, extending the Henderson School advantage to ninth through 12th graders. A model educational environment is also available for preschool-aged children through the Karen Slattery Educational Research Center for Child Development. See the [Student Services and Activities](#) section of this catalog for information about the Slattery center.

Endowments and Awards

Upon the retirement in 1973 of Florida Atlantic University's first and founding president, Dr. Kenneth R. Williams, an endowment of \$50,000 was set up in his honor by a group of contributors. Interest on this endowment supports two \$1,000 awards presented at the spring commencement to graduating seniors, one for leadership and one for outstanding scholastic achievement.

The University has 17 Eminent Scholar Chairs, each endowed at \$1 million or more:

- Glenwood and Martha Creech Eminent Scholar Chair in Science
- John M. DeGrove Eminent Scholar Chair in Growth Management and Development
- William F. Dietrich Eminent Scholar Chair in Philosophy
- Kenan Evren Eminent Scholar Chair in Turkish Business Studies
- Herbert and Elaine Gimelstob Eminent Scholar Chair in Judaic Studies
- Christine E. Lynn Eminent Scholar Chair in Nursing
- Eugene M. and Christine E. Lynn Eminent Scholar Chair in Business
- John Thomas Ladue McGinty Eminent Scholar Chair in Biology
- Dr. Robert J. Morrow Eminent Scholar Chair in Social Science
- Charles Stewart Mott Eminent Scholar Chair in Community Education
- Office Depot Eminent Scholar Chair in Small Business Research
- Helen Karpelena Persson Eminent Scholar Chair in Community Caring
- Raddock Eminent Scholar Chair in Holocaust Studies
- Charles E. Schmidt Eminent Scholar Chair in Engineering
- Dorothy F. Schmidt Eminent Scholar Chair in the Arts
- Dorothy F. Schmidt Eminent Scholar Chair in Humanities
- Dorothy F. Schmidt Eminent Scholar Chair in the Performing Arts

Private and state matching funds have also established endowments for professorships, fellowships and scholarships at FAU.

Academic Common Market

The Academic Common Market is an interstate agreement among Southern states for sharing academic uncommon programs at both the baccalaureate and graduate levels. The following participating states are able to make arrangements for their certified residents who qualify for admission to enroll in specific programs in other states on an in-state tuition basis:

Alabama	Louisiana	Tennessee
Arkansas	Maryland	Texas*
Florida*	Mississippi	Virginia
Georgia	Oklahoma	West Virginia
Kentucky	South Carolina	

* Graduate level only

For information, call the Office of Graduate Admissions and Graduate Studies at 561-297-3624.
