New Journal Report

- A report is now available that shows **ALL** activity posted to a particular SmartTag (or Fund) in one place, *regardless* of what account it has been posted to! It also splits the Worktags into separate columns for you and extracts easily to excel! This makes filtering your data **SO** easy!

- This is an efficient and clean way to view all actuals data that impacts your Fund/Tag.

- Just search for FAU_FIN_Find Journal Lines and enter the parameters you wish to search on.

- Performance on this can be a little slow so try to limit the results as much as possible and be sure to accept when Workday asks to run in the background to the W drive.
