

FAU School of Architecture
Fall 2014 Lecture Series

October 7, 5:30pm

John Englander

“High Tide on Main Street”

Oceanographer and consultant John Englander is a leading expert on sea level rise and its societal and financial impacts. He assists businesses and communities in understanding the risks as rising seas challenge us to adapt to a changing shoreline. His book, *High Tide on Main Street*, clearly explains what this coming coastal crisis means to you.
