Randy Brown **Randy Brown Architects**

Randy Brown, artist/architect established his practice in Los Angeles, California in 1989. RBA was formed in 1993 when the studio relocated to Brown's home town of Omaha, Nebraska. Living and working in the heartland, surrounded by farming culture has had a profound effect on the studio. Brown has developed a farmer's perspective, a strong connection to the land and work with your hands mentality, making work that embodies its place.
