Dr. Michelle Brown

NSF Postdoctoral Research Fellow,
Department of Anthropology, University of New Mexico

12:30 pm Wednesday, October 1, 2014
Sanson Life Sciences, SC-1, Room 119

Dr. Brown's ongoing research explores the dynamics of conflicts between social groups, with a focus on the causes of individual participation in (or defection from) these conflicts. She works with a team of local Ugandan assistants and Ugandan and American college graduates to track 8 social groups of redtail monkeys (*Cercopithecus ascanius*) at the Ngogo research station in Kibale National Park, Uganda.
