

FAU
STILES-NICHOLSON
BRAIN INSTITUTE

Where Discovery Comes to Mind

COME JOIN US!

The Neuroscience Graduate Ph.D. Program provides a well-rounded experience for first-year students, exposing trainees to the breadth of neuroscience inquiry through a common curriculum, seminars and lab rotations. The nation's newest hub for the life sciences is at FAU, where an innovative neuroscience program embraces research opportunities in fundamental and translational neuroscience. Working with our partners at the Max Planck Florida Institute for Neuroscience and the Scripps Research Institute, we provide a one-of-a-kind exposure to the study of the nervous system, its support for behavior, its modifiability through experience, and its targeting for next generation therapeutics

ONLINE APPLICATION DEADLINE DECEMBER 1.
