

about...

Florida Atlantic University is home to the most comprehensive Ropes Challenge Course in South Florida. With over 30 low and high elements and numerous portables, we will customize an experiential based program for your organization and focus on your specific needs.

While each group has different goals, common program benefits include teamwork, communication, leadership, decision making and personal growth.

Program length should be determined based on your goals, desired results and budget. Typically programs are scheduled for a half day or full day.

Expect your experience to include:

Low element activities which are performed on or close to the ground. Difficulty and complexity gradually increase challenging your team to learn from its successes, build trust and confidence. Communication, goal setting, decision making and leadership development are highlighted.

High ropes initiatives to challenge the individual and the team. You will make your own choices and set your own level of challenge as you explore risk taking and mutual support from your teammates on the ground.

who can participate?

Each program is custom designed for your group's specific size and ability level. Initiatives are intentionally selected based on the goals of your group.

Programs are available for:

- FAU Student Organizations and Clubs.
- FAU Departments.
- Athletic Teams.
- Non-Profit and Community Organizations.
- Schools, Colleges & Universities.
- Businesses & Corporate Groups.
