Creating a Presentation with MDR

This guide provides instructions on how to create a recorded presentation using Mediasite Desktop Recorder.

How-to instructions:

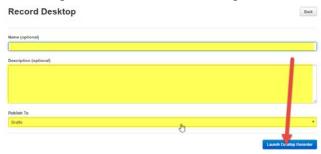

1. From the Canvas "My Mediasite" course, click on Canvas MDR. Then click on +Create Presentation.

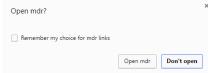

2. Click on **Record Desktop**.

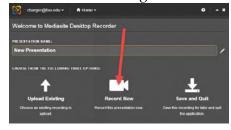

1. Complete the form and then click on **Launch Desktop Recorder**. While providing a name is optional, it is best practice to include a descriptive name for your video so you can easily reference it later.

2. The new video presentation page will load. You will see the message for Launching Desktop Recorder. Click on **Open mdr.**

3. The Mediasite Desktop Recorder will load. You can choose to upload an existing recording, record a new presentation, or save your current recording and quit the application. Click on **Record Now** to start a new recording.

4. Choose either Screencast + Video or Screencast + Audio. Then click Next.

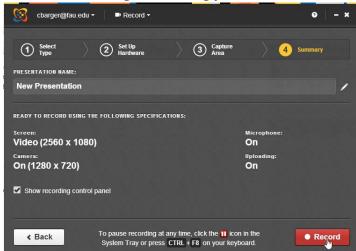

5. Select your preferred settings and test your microphone as well as camera and camera size (if recording video). Then click Next.

6. If you have chosen to record video, you will be prompted to select an area to record.

7. Click **Record** to begin recording your video.

8. Recording will begin following a 5-second countdown.

9. Click either **Pause** or **Finish** on the control panel to pause or finish the recording.

10. If you selected **Pause**, several options will appear. You can **Discard Recording**, **Resume Recording**, or **Finish Recording**.

11. When you select **Finish Recording**, your video will begin uploading.
