HOW TO USE IVCAM FOR IPHONE & IPAD

If you need a webcam to complete online assignments or for use during a proctored exam, you can use iVCam as a way to turn your **iPhone or iPad** into a high definition webcam for use on a Windows PC.

HOW TO DOWNLOAD THE APPLICATION

1. On the Apple iPad or iPhone go to the App Store on the Apple iPad and download the “iVcam WebCam”

2. On your PC go to the iVCam webpage and download the Windows Client Software: <https://www.e2esoft.com/ivcam/>
3. Find the installation file and open.
4. Click YES, when the program asks for authorization to make changes on your computer.
5. Follow the remaining steps to complete the installation on your computer.

NOTE: THE DESKTOP SHORTCUT IS RECOMMENDED, “OPEN UPON STARTUP” IS NOT.

6. Open the iVCam app on your phone and give the app permission to access your camera and microphone.
7. When you open the iVCam software on your computer you should see your phone camera functioning as a webcam within the iVCam window on your computer.
