

Assessment and Accreditation DID YOU KNOW?

NOVEMBER 2025

As the semester draws to a close, we want to remind faculty of the critical role you play in our ongoing efforts to evaluate and improve our programs. The information you collect supports our internal program improvement efforts, fulfills state reporting requirements, and contributes to national accreditation initiatives.

Livetext Grades

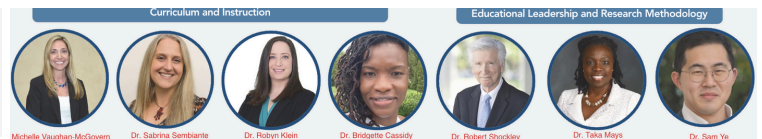

LiveText is our assessment system for collecting data on candidate competencies. Please complete all competency assignments by Friday, December 12th so we can finalize the semester records. This data will then be added to our annual reporting system.

Student Perception of Teaching

SPOT reports help us improve our college's educational standards. These reports will be available from November 4th through November 24th. Please encourage your students to complete their SPOT reports during this window—the data and comments we collect are essential for program evaluation and will be included in faculty annual evaluations.

Committee Highlight

Special thanks to the members of our Assessment Committee. This month, they are working hard to complete the Standards Detail Report for the Department of Education.

This annual report serves as our self-assessment. It plays an important role in our continued approval site visits, where the Florida Department of Education reviews our programs using the Florida Site Visit Framework.
