

# Implementing Interventions in Real-World Settings: Where do we go from here?

The standard in applied science and community-based research is to implement interventions in real world contexts such as homes or schools. Yet, we continue to face many hurdles in our efforts to bridge research and practice. Using the Advancing Social-communication and Play (ASAP) intervention as a case study example, this talk will address the current state of behavioral intervention research for children with autism spectrum disorder as well as barriers and potential solutions to moving behavioral intervention research forward.

FEATURED SPEAKER: BRIAN A. BOYD, PH.D.

**FRI, NOV 6**

**11 AM to 12:15 PM**

**via Zoom**

Register in advance for this meeting:

**<https://us02web.zoom.us/meeting/register/tZ0vc--vqj4pEtHRGyZV2gW-xjj2lo4Lfn04>**

*After registering, you will receive a confirmation email containing information about joining the meeting.*

Free to join for COE students, faculty, staff, and interested individuals.

**FLORIDA ATLANTIC UNIVERSITY**  
DEPARTMENT OF EXCEPTIONAL STUDENT EDUCATION

**Brain A. Boyd, Ph.D.**, is an Associate Professor and Director of the Juniper Gardens Children's Project at the University of Kansas. His research interests focus on the development and evaluation of evidence-based, behavioral interventions for children with ASD, as well as understanding the impact of repetitive and sensory behaviors on the ability of these children to participate in their environment.
