**Project Lifesaver International has been
Established since 1999 with over 1975
search and rescues with a 100% success
rate.**

The purpose of this organization is to provide a program in Palm Beach County to serve those affected by Alzheimer's, autism spectrum disorders, dementia and other related disorders that may cause wandering, by providing a method of locating these individuals should they wander or become lost. This program will improve the chances the participant is found safely, but will also have the secondary impact of peace of mind for caregivers and family members; thereby, improving quality of life for all involved.

HOW IT WORKS

A Palm Beach County resident diagnosed with autism spectrum disorders, Alzheimer's, dementia or a related disease that causes them to wander may participate. The participant will be assigned to a Managing Agency. To qualify the participant must have a CAREGIVER. We will assign them a transmitter with a special frequency number designated for them. Project Lifesaver requires a mandatory every 30 day battery change. Once missing, the CAREGIVER must call 911 immediately and identify their loved one as a Project Lifesaver participant.
