

Has your child been diagnosed with CAS?

The **speeCH** And **Time (CHAT)** lab at Florida Atlantic University is looking for **adolescents and teens** who have been diagnosed with **childhood apraxia of speech (CAS)** to participate in a research study examining speech perception. The study will be completed in lab, will include an EEG, and will last about 3-4 hours across 2 sessions.

To participate your child should:

Be 9-17 years of age

Be a native speaker of American English

Have a diagnosis of childhood apraxia of speech (CAS)

Have **no** history of:

- Neurological disorder
- Psychiatric disorders
- Socio-emotional disorders
- Psycho-social disorders
- Disorders of Attention

As a thank you, you will receive a score report of your child's speech and language testing
