

We are pleased to announce that the new Skillsoft EHS Training Platform is now Live at the EHS Website [HERE](#). From the Skillsoft Training Site, you can search from hundreds of EHS Course Titles and also take required training. We will maintain a few course titles in Canvas until we migrate those over to Skillsoft.

The EHS Training Page has been updated to reflect the new course offerings and the current features of Skillsoft include:

- Hundreds of EHS Training Courses available.
- Training is interactive, voice narrated, and concise.
- Courses can be retaken as needed to meet the requirement.
- Easy to access certificates available on demand to each learner.

We will be rolling out new features in Skillsoft in the coming months including:

- E-mail notifications for recurrent training.
- New hire workplace safety orientation.
- Integration with Workday so Supervisors can track employee progress.
- All EHS training in one place.
- And more.

Instructions for navigating in Skillsoft are available [here](#).

If any member of the FAU Community requires assistance with EHS Training, please do not hesitate to contact us at 561-297-3129 or at [ehs@fau.edu](mailto:ehs@fau.edu).

Please share this notice with your departments.

Thank you!

Regards,

Wendy
