

Computer Science Companies Near You!

Magic Leap

Plantation, Florida

Gaining notoriety from their funding obtained from Google and their conceptual “whale in a gym” video, Magic Leap is one of the few companies focused in creating Augmented Reality goggles to create mixed reality experiences. Mixed Reality is focused on putting 3D models in the real world, which has been popularized by games like Pokemon Go. Magic Leap is trying to take it to the next level by fully immersing your vision into an augmented world using their goggles. They are hiring in a variety of Software Engineering jobs and have great internship opportunities. They have also collaborated with FAU in different projects.

The SilverLogic

Boca Raton, Florida

The SilverLogic is a company focused around working with a variety of different clients in order to bring their website and/or app visions to life. Having worked with a variety of companies like Chipotle, Popeye’s, and Visa, the variety of projects to work on within this company is extensive. Check out their career section to find Software Engineering jobs and internship opportunities.

Cocobolo Group

Boca Raton, Florida

Cocobolo is an app-focused software development company working on applications for iOS and Android devices. Even though they have their headquarters in Boca Raton, they have members of their team all throughout the world. They have positions in Mobile App Development, UX/UI Mobile App Designers, Data Visualization Developers, Graphic Designers, and Project Managers.
