

COT 4930 Introduction to Security and Cryptography

Credits: 3 credits

Textbook, title, author, and year: Computer Security: Principles and Practice (3rd edition), Stallings and Brown, Pearson

Reference materials: Security in Computing (5th edition), Pfleeger, Pfleeger and Margulies, Pearson.
Introduction to Modern Cryptography (2nd edition), Katz and Lindell, Chapman & Hall/CRC.
Cryptography Theory and Practice (3rd edition), Stinson, Chapman & Hall/CRC.
Handbook of Applied Cryptography, Menezes, Oorschot, Vanstone, Chapman & Hall/C

Specific course information

Catalog description: This is a course on computer security and cryptographic algorithms. The following components are covered in the course: (a) Overview of computer security concepts (b) Computer security technology and principles, (c) Software security and trusted systems, (d) Management issues, (e) Cryptographic algorithms, and (f) Network security

Prerequisites: MAD 2104 and COP 3014.

Knowledge of linear algebra, number theory and computer programming would be of great help. The instructor also reviews some of the necessary background materials

Specific goals for the course: Enable the students to learn fundamental concepts of computer security and cryptography and utilize these techniques in computing system

Brief list of topics to be covered:

The following concepts and topics will be covered with different levels of emphasis. Some topics will be covered in-depth and some other topics will be reviewed briefly.

1. Overview of Computer Security Concepts
2. Computer Security Technology and Principles
 - Cryptographic Tools
 - User Authentication
 - Access Control
 - Database and Cloud Security
 - Malicious Software (Trojans, Phishing, Spyware)
 - Denial-of-Service Attacks

Intrusion Detection

Firewalls and Intrusion Prevention Systems

3. Software Security and Trusted Systems

Buffer Overflow

Software Security

Operating System Security

Trusted Computing and Multilevel Security

4. Management Issues

IT Security Management and Risk Assessment

IT Security Controls, Plans and Procedures

Physical and Infrastructure Security

Human Resources Security

Security Auditing

Legal and Ethical Aspects

5. Cryptographic Algorithms

Symmetric Encryption and Message Confidentiality

Public-Key Cryptography and Message Authentication

6. Network Security

Internet Security Protocols and Standards

Internet Authentication Applications

Wireless Network Security
