

## Requested Catalog Changes

### Overview of the D.S.W. Curriculum

In addition to the core curriculum, D.S.W. students take two electives at the University to supplement their studies. At least one elective must be doctoral level (7000 level). Students may take a master's level course (6000 level) for their second elective, if (a) the content is clearly linked to their capstone topic or their capstone methods, (b) it is a course the student has not previously taken, and (c) the course is not duplicative of previous MSW courses (i.e., the course is not the equivalent of a completed M.S.W. course in a different department). Electives must be approved as part of a student's Plan of Study

### D.S.W. Courses

#### *Core Courses - 44 credits*
