Course Description

Primary Care 2: Foundations of Advanced Nursing Practice
Prerequisite: NGR 6200, 6200L, 6342, 6301
Corequisites: NGR 6605L
Focuses on the expanding study of primary care across the lifespan using nursing situations in advanced practice grounded in caring science, including health promotion, disease prevention, assessment, diagnosis and management of more complex conditions in the primary care setting.

Upon completion of the course, the student will demonstrate

Becoming competent:

1) Analyze foundational knowledge from nursing and related disciplines to assess, diagnose, and treat common conditions. (Essential I)

2) Appraise selected caring and developmental theories and concepts from biological, behavioral, health promotion, and nursing sciences to enhance the health and well-being of persons across the lifespan. (Essential I, VIII)

3) Develop patient-centered and culturally responsive strategies in the delivery of clinical prevention and health promotion interventions related to the primary care of persons. (Essential VIII)

4) Routinely apply research findings, identify clinical guidelines from national organizations, and apply evidence-based practice to improve the health and well-being of persons in the primary care setting. (Essential IV)

5) Routinely utilize informatics and health technologies to evaluate, integrate, coordinate, and improve healthcare for persons. (Essential V)

6) Develop a more comprehensive understanding of the advanced practice nursing profession based on reflective practices and continue to develop their own plans for lifelong learning and professional development. (Essential IX)
