Received

Degree Requirements

Students must complete, with grades of "B" or better, a minimum of 80 graduate credits. This must include the following ~~five~~ **six** core courses: Cognitive Neuroscience, ~~Introduction to Dynamical Systems and Chaos,~~ **Nonlinear Dynamic Systems**, Methods in Complex Systems, Neuroscience 1 and 2, and **Proseminar – Research in Complex Systems**. Students must also participate in a weekly ~~proseminar and~~ journal club. ~~Five additional 3-credit courses must be completed successfully, chosen from those courses offered by program faculty.~~ The remaining credits may be completed through additional courses, directed research and doctoral thesis credits at the discretion of the student and advisor. **A minimum of 12 dissertation credits is required.** In addition, the student must complete a research paper, directed by program faculty, by the end of the second year.

A central requirement for the Ph.D. degree program is submission and defense of a dissertation based on original work in an area of specialization acceptable to the student's doctoral committee. Approval of a dissertation proposal by the doctoral committee must precede the experimental and/or theoretical work required.
