GRADUATE COLLEGE

MAR 12 2019

Received

Master of Science with Major in Artificial Intelligence

The Master of Science with Major in Artificial Intelligence provides a comprehensive curriculum, consisting of foundation and theory of artificial intelligence and elements of machine learning, data analytics, computer vision, knowledge management and reasoning, and applications. Both thesis and non-thesis options of the Master of Science with major in Artificial Intelligence require a minimum of 30 credits. The thesis option consists of a minimum of 24 coursework credits and 6 thesis credits.

With approval of the advisor, substitution can sometimes be made among similar courses. See the Department of Computer & Electrical and Computer Science [website](#) for updates.

Admission Requirements

Applicants for admission to the master's program are approved by the University upon the recommendation of the department. All applicants must submit with their applications the official transcripts from previous institutions attended and have official GRE scores forwarded to the University. Applications for admission are evaluated on an individual basis. As a minimum, applicants are expected to meet the following requirements. Students with non-engineering bachelor's degrees, click [here](#) for additional requirements.

1. A baccalaureate degree in Computer Science or a related field (Students without a computer science background will be expected to take additional courses);
2. At least a 3.0 (of a 4.0 maximum) GPA in the last 60 credits attempted prior to graduation;
3. Submission of the Graduate Record Examination (GRE) scores. GRE scores more than five years old are normally not acceptable. The GRE requirement is waived for any student who has a baccalaureate degree from FAU's Department of Computer & Electrical Engineering and Computer Science with a GPA of at least 3.25 (out of a possible 4.0) in the last 60 credits attempted prior to graduation; and
4. International students from non-English-speaking countries must be proficient in written and spoken English as evidenced by a score of at least 500 (paper-based test) or 213 (computer-based test) or 79 (Internet-based test) on the Test of English as a Foreign Language (TOEFL) or a score of at least 6.0 on the International English Language Testing System (IELTS).

Applicants are expected to have taken the following prerequisite courses (or equivalents) before pursuing a master's degree. In some cases, prerequisite courses may be taken after admission to the graduate program.

Data Structures and Algorithm Analysis	COP 3530
Design and Analysis of Algorithms	COT 4400
Stochastic Models for Computer Science	STA 4821
Calculus with Analytic Geometry 1	MAC 2311
Calculus with Analytic Geometry 2	MAC 2312

Submission of Plan of Study

Students are required to submit a Plan of Study when they have completed between 9 and 15 credits of coursework with a minimum cumulative GPA of 3.0. All courses must be approved by the student's advisor. A student may not register for thesis credits prior to submitting a Plan of Study.

Degree Requirements

The Master of Science with Major in Artificial Intelligence program offers both thesis and non-thesis options. Both options require a minimum of 30 credits, as specified in Table 1.

Students must satisfy all of the University graduate requirements. In addition, the following requirements must be met:

1. The coursework credits must satisfy the following constraints:

- a. No more than 3 credits of directed independent study may be taken.
 - b. No course can be counted toward the degree that is more than 10 years old at the time the degree is awarded
 - c. No 4000-level course is allowed toward the degree. Courses taken to make up for the deficiencies will not be counted toward the degree.
2. At least one-half of the credits must be at the 6000 level or above
 3. Must have a GPA of 3.0 (out of 4.0) or better.
 4. All courses in the degree program must be completed with a grade of "C" or better.

Transfer Credits

Any transfer credits toward the requirements for a master's degree in Artificial Intelligence must be approved by the department, the College and the University. The transfer credits must correspond to equivalent requirements and performance levels expected for the degree. Normally no more than 6 credits of coursework (that have not been applied to a degree) can be transferred from another institution.

Table 1

Students are required to take 3 core course:	
Computational Foundations of Artificial Intelligence	CAP 5625
Artificial Intelligence	CAP 6635
Data Mining and Machine Learning	CAP 6673
In addition, students pursuing the non-thesis option are required to take 7 elective courses from the groups below. Students pursuing the thesis option are required take 5 elective courses from the groups below and 6 thesis credits. Both non-thesis and thesis options allow up to 3 elective courses to be substituted with any course in the College of Engineering and Computer Science, with prior approval from the advisor.

Provide headcount (HC) and full-time equivalent (FTE) student estimates of majors for Years 1 through 5. HC and FTE estimates should be identical to those in Table 1 in Appendix A. Indicate the program costs for the first and the fifth years of implementation as shown in the appropriate columns in Table 2 in Appendix A. Calculate an Educational and General (E&G) cost per FTE for Years 1 and 5 (Total E&G divided by FTE).

Implementation Timeframe	Projected Enrollment (From Table 1)		Projected Program Costs (From Table 2)				
	HC	FTE	E&G Cost per FTE	E&G Funds	Contract & Grants Funds	Auxiliary Funds	Total Cost
Year 1	20	16	16,322	261,144			261,144
Year 2	25	21					
Year 3	30	25					
Year 4	35	27					
Year 5	40	30	13,165	394,950			394,950

Note: This outline and the questions pertaining to each section must be reproduced within the body of the proposal to ensure that all sections have been satisfactorily addressed. Tables 1 through 4 are to be included as Appendix A and not reproduced within the body of the proposals because this often causes errors in the automatic calculations.

INTRODUCTION

I. Program Description and Relationship to System-Level Goals

- A. Briefly describe within a few paragraphs the degree program under consideration, including (a) level; (b) emphases, including majors, concentrations, tracks, or specializations; (c) total number of credit hours; and (d) overall purpose, including examples of employment or education opportunities that may be available to program graduates.**

1. The proposed program is a Master of Science with Major in Artificial Intelligence (MSAI). The program will be administered by the Department of Computer and Electrical Engineering and Computer Science (CEECS) in the College of Engineering and Computer Science (COECS) at Florida Atlantic University (FAU).
2. The program offers both thesis and non-thesis options. There are no other concentrations, tracks, or specializations.
3. Both thesis and non-thesis options require a minimum of 30 credits.
4. Artificial Intelligence (AI) has become more and more important in our daily life. Locally and nationally the demand for AI professionals increases exponentially in recent years. The graduates of the MSAI program will fill in the needs both in the local and national level.

- B. Please provide the date when the pre-proposal was presented to CAVP (Council of Academic Vice Presidents) Academic Program Coordination review group. Identify any concerns that the CAVP review group raised with the pre-proposed program and provide a brief narrative explaining how each of these concerns has been or is being addressed.**

The pre-proposal was presented to the CAVP on February 22, 2019. There were no concerns regarding the proposed degree of MS with Major in Artificial Intelligence. We received several positive comments about the importance of this degree and the high level of demand that would exist. In addition, there were comments about FAU being well-positioned and well-suited to provide this degree.

- C. If this is a doctoral level program please include the external consultant's report at the end of the proposal as Appendix D. Please provide a few highlights from the report and describe ways in which the report affected the approval process at the university.**

N/A

- D. Describe how the proposed program is consistent with the current State University System (SUS) Strategic Planning Goals. Identify which specific goals the program will directly support and which goals the program will indirectly support (see link to the SUS Strategic Plan on [the resource page for new program proposal](#)).**

The proposed MS with Major in Artificial Intelligence program supports and aligns with the current SUS Strategic Planning Goals. The Strategic Plan 2012 - 2025 emphasizes teaching, research, and public service, with the following priorities: Excellence, Productivity, and Strategic Priorities for a Knowledge Economy.

Excellence

The proposed MS with Major in Artificial Intelligence is a high-quality program where experts in the field will train students in a transformative discipline that will change the way

the society works. This program will contribute to a workforce with the skills needed to harness the potential benefits of AI. The high quality of the program consists of (1) a strong curriculum, consisting in a foundation of AI that includes theory, methods and technologies, combined with major subfields of vision, data analytics and algorithms, knowledge management and reasoning, machine learning, and applications; (2) high quality research (i.e. thesis option) supervised by experts in the field; and (3) facilities, such as the Artificial Intelligence and Deep Learning Laboratory, which will serve as a training platform to support graduate student teaching and research.

Productivity

One of the main priorities of SUS Strategic Planning Goals is to award more degrees in the high demand programs in STEM disciplines. The newly proposed MS in Artificial Intelligence programs aligns very well with this priority. FAU will produce graduates which possess the skills and knowledge needed to be competitive in the AI field.

Strategic Priorities for a Knowledge Economy

The objective of this priority is to promote STEM programs with critical and/or development needs or emerging technologies that address both the workforce and student demand. Over the past ten years, there has been a dramatic progress in the rise of artificial intelligence and in its use in the development of systems that can reason and respond to increasingly complex situations. AI is everywhere and the change brought about by these technologies has just begun. AI is transforming every segment of American industry. It is making agriculture more precise and efficient, new medical technologies, and the prospect of autonomous transportation and advanced manufacturing close to reality. The effects of AI are expected to be profound. To become competitive, the companies will have to embrace AI to some extent. MSAI program will contribute in creating an educated workforce, one of the most diverse student bodies in the SUS system.

FAU Strategic Plan for Race to Excellence 2015 - 2025

The MS with Major in Artificial Intelligence program aligns with the vision of FAU which includes an excellent graduate education and high quality programs in areas of strategic emphasis (STEM areas). The programs will support focal areas, known as Pillars and Platforms. All pillars (Healthy Aging; Neuroscience; Ocean Science and Engineering/Environmental Sciences; Sensing and Smart Systems) are expected to adopt AI methods and technologies to stay competitive. Among the platforms, the Big Data Analytics is one of the major subfields of AI. The MSAI program will also support platforms such as Community Engagement and Economic Development, Global Perspectives and Participations, and Innovation and Entrepreneurship.

College of Engineering and Computer Science (COECS) Strategic Plan

The College of Engineering and Computer Science (COECS) is committed to provide high quality programs of education and research, along a stimulating and productive environment of work, study, and scholarly inquiry for students, faculty, and staff. The College's goals are results-oriented, and can be summarized as follows: (1) encourage students to consider careers in engineering and computer science, (2) prepare graduates with a basis for lifelong personal and professional development that enables them to make lasting contributions in their disciplines, (3) engage students in research and discoveries in emerging disciplines and in related interdisciplinary areas, (4) provide top education preparation that working professionals need to keep pace with developments in their field, and (5) build mutually beneficial linkages with business, industry, schools, and other constituencies.

- E. If the program is to be included in a category within the Programs of Strategic Emphasis as described in the SUS Strategic Plan, please indicate the category and the justification for inclusion.**

The Programs of Strategic Emphasis Categories:

1. Critical Workforce:
 - Education
 - Health
 - Gap Analysis
2. Economic Development:
 - Global Competitiveness
3. Science, Technology, Engineering, and Math (STEM)

Please see the Programs of Strategic Emphasis (PSE) methodology for additional explanations on program inclusion criteria at [the resource page for new program proposal](#).

Critical Workforce

Students after completing the MSAI program will become skillful AI professionals, meeting the critical workforce needs of the South Florida Region, Florida State and beyond.

Global Competitiveness

Florida Atlantic University offers a number of Ph.D. programs, and participating faculty are active in research and teaching. Faculty are world class leaders in Artificial Intelligence, Machine Learning, Data Mining, Autonomous Vehicles, among other things. The university supports a combination of academic research and collaboration with for-profit partners, with the goal of developing products which are competitive in global markets. In addition, South Florida in general is a highly populated, highly developed area with small businesses and innovative and technologically advanced companies. FAU has received multiple competitive research grants from National Science Foundation, the Defense Advanced Research Projects Agency and other Federal funding agencies in the area of AI and Machine Learning. FAU is home to the NSF Big Data Training and Research Laboratory and a NSF AI and Deep Learning Training and Research Laboratory. In short, research related to AI at FAU is prominent locally and globally.

Science, Technology, Humanities, Engineering, and Math (STHEM)

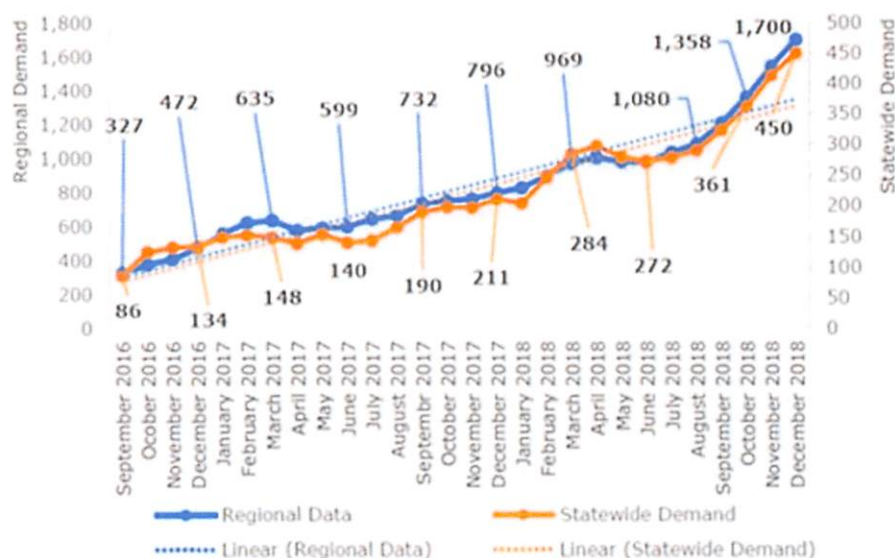

The MSAI program offers coursework and laboratory training at the graduate level will enable its graduates to enter Florida's workforce with the capabilities to fill emerging needs. This addresses more than STEM development in "Sciences and Technology" as identified in the Programs of Strategic Emphasis.

Figure below partially shows historical employer demand for MSAI professionals (EAB Market Research Brief, 2018).

Linear trend lines represent the average monthly change in statewide and regional employer demand for master's-level artificial intelligence professionals.

Historical Employer Demand for Master's-Level Artificial Intelligence Professionals

September 2016-October 2018, Statewide and Regional Data²

2) Bureau of Labor Statistics
3) Error Analyst™

This degree will prepare students for careers in various education, government and industry positions that require AI skills. Potential jobs include political data scientists, survey statistician, research analyst, intelligence data analyst, quantitative social scientist, software engineers, research analysts and solution architects (see the figure below (EAB Market Research Brief, 2018)).

Top Regional Titles for Master's-Level Artificial Intelligence Professionals

January 2018-December 2018, Regional Data⁴

n = 4,697 job postings

* Research Analysts (Life, Physical, and Social Science)

** Business Analysts (Business and Financial Operations)

*** Systems Engineers (Computer and Mathematical)

**** Solutions Consultants (Business and Financial Operations)

- F. Identify any established or planned educational sites at which the program is expected to be offered and indicate whether it will be offered only at sites other than the main campus.**

The program will be offered at the main campus in Boca Raton, Florida. The courses are expected to be offered both in-person and using the distance learning option. Therefore, students will be able to complete the program by attending the courses in person or remotely through distance learning.

INSTITUTIONAL AND STATE LEVEL ACCOUNTABILITY

II. Need and Demand

- A. Need: Describe national, state, and/or local data that support the need for more people to be prepared in this program at this level. Reference national, state, and/or local plans or reports that support the need for this program and requests for the proposed program which have emanated from a perceived need by agencies or industries in your service area. Cite any specific need for research and service that the program would fulfill.**

Locally, startups and established companies have difficulties to recruit AI professionals. Nationally, not just the economical side but also the security side, the US needs invest heavily in AI to be competitive. Other countries spend billions of dollars in AI research and education. Increased employer demand for master's-level AI professionals indicates an opportunity for the program development. Data collected by EAB Global indicates that the state-wide demand for such professionals increased 423 percent (from 86 to 450 postings (EAB Market Research Brief, 2018). Reported high earnings in relevant occupations will attract prospective students to the program. AI-related professionals earn a median hourly income of \$46 state-wide, which is way higher than a median income of \$16 per hour across all professionals in the state.

South Florida is home to many startups and large companies with demands of developing smart devices and products. Recently, a number of local companies such as Magic Leap, Cendyn, and Florida Power and Light Company came to FAU to seek AI professionals. The program will produce AI professionals serving not only South Florida and the State, but also the US. The graduates of the MS program will be able to contribute to meet the needs of these employers. This will have a positive impact to the local economy.

Federal funding agencies such as NSF, NIH, DARPA and ONR have provided numerous opportunities in AI and its related areas. These funding opportunities have helped the US capitalize on the full potential of AI to strengthen our economy, better our society, and improve our national security (NSF, 2018). The proposed master's program will attract like-minded faculty and students who are passionate about AI and its applications. It is anticipated that more competitive proposals will be written by the AI faculty with the help of the student body.

- B. Demand: Describe data that support the assumption that students will enroll in the proposed program. Include descriptions of surveys or other communications with prospective students.**

We conducted a survey among both undergraduate and graduate students in the Department of Computer and Electrical Engineering and Computer Science at FAU. 96.7% of surveyed students agree that a Master of Science in Artificial Intelligence

program will be beneficial to society in general and the FAU community in particular. Other key elements indicating that students will be interested in the proposed program are:

1. Increased employer demand for master's-level AI professionals indicates an opportunity for the program development. Data collected by EAB Global indicates that the state-wide demand for such professionals increased 423 percent (from 86 to 450 postings).
 2. Reported high earnings in relevant occupations will attract prospective students to the program. AI-related professionals earn a median hourly income of \$46 state-wide, which is way higher than a median income of \$16 per hour across all professionals in the state.
 3. Nationally, less than 10% of students in the field closely related to AI are black, and similarly for woman and Hispanic population. By encouraging minority and women students to pursue the MS study, FAU will produce more AI professionals who are minority and women.
- C. If substantially similar programs (generally at the four-digit CIP Code or 60 percent similar in core courses), either private or public exist in the state, identify the institution(s) and geographic location(s). Summarize the outcome(s) of communication with such programs with regard to the potential impact on their enrollment and opportunities for possible collaboration (instruction and research). In Appendix C, provide data that support the need for an additional program.

There is no similar program in the SUS.

- D. Use Table 1 in Appendix A (1-A for undergraduate and 1-B for graduate) to categorize projected student headcount (HC) and Full Time Equivalents (FTE) according to primary sources. Generally undergraduate FTE will be calculated as 30 credit hours per year and graduate FTE will be calculated as 24 credit hours per year. Describe the rationale underlying enrollment projections. If students within the institution are expected to change majors to enroll in the proposed program at its inception, describe the shifts from disciplines that will likely occur.

We projected student headcount is 20 in the first year, with an increment of 5 students over the next 4 years. Students enrolled in other programs are expected to change program only during the first 2 years of offering this program. Most of the students expected to enroll in this program are students that graduated with a bachelor's degree in the College of Engineering and Computer Science at FAU, and students with bachelor's degree in other disciplines at FAU and at other SUS institutions. A number of working professionals are expected to enroll in this MS program to advance their professional career. Some other populations of students are public and private local institutions, as well as national and international institutions.

- E. Indicate what steps will be taken to achieve a diverse student body in this program. If the proposed program substantially duplicates a program at FAMU or FIU, provide, (in consultation with the affected university), an analysis of how the program might have an impact upon that university's ability to attract students of races different from that which is predominant on their campus in the subject program. The university's Equal Opportunity Officer shall review this section of the proposal and then sign and date Appendix B to indicate that the analysis required by this subsection has been completed.

Graduate students are drawn from local, statewide, out-of-state and international populations. Under-represented minorities (URM) will be well represented as FAU is the

most ethnically diverse institution in the State of Florida (29th nationwide). Minorities currently make up 44.83% of the FAU enrollment, and FAU is designated by the DOE Office of Postsecondary Education as a minority serving institution. Indeed, of the 29,606 students enrolled at FAU (all colleges) in Fall 2018 whose ethnicity was known, 12,574 were white and 13,376 were URM. Over the last five years, black and Hispanic enrollments have increased more than that of any other groups; FAU's student body will soon be a "majority minority" mirroring the predicted demographic composition of the USA in the near future. Thus there is already a large and diverse pool of students from which this program can recruit. Approximately 33.22% of graduate students in related programs belong to underrepresented minority groups. This number continues to grow each year and we assume that it will eventually reach numbers similar to the undergraduate distribution of 46.88% URM. This information was provided by FAU IEA office and approved.

III. Budget

- A. Use Table 2 in Appendix A to display projected costs and associated funding sources for Year 1 and Year 5 of program operation. Use Table 3 in Appendix A to show how existing Education & General funds will be shifted to support the new program in Year 1. In narrative form, summarize the contents of both tables, identifying the source of both current and new resources to be devoted to the proposed program. (Data for Year 1 and Year 5 reflect snapshots in time rather than cumulative costs.)**

The faculty staffing in the department is sufficient to initiate the program. The faculty salary and benefits needed to support this program will come entirely from reallocated base E&G funds. For Year 1, the budget includes \$224,045 in funds reallocated from the department to fund faculty salaries and benefits for the current faculty members in the program. The reallocated salaries and benefits extend into the fifth year and include any increases in percent effort for current faculty for a total of \$326,387 for Year 5. See Table 4 for a complete listing of faculty involved with the program.

Reallocated base funding is also being used to cover one AMP Budget Coordinator position at 5% effort (\$4,404) to support the overall administrative functions of the program; and one USPS Graduate Programs coordinator position at 15% effort in Year 1 (\$9,695) and 25% effort by Year 5 (\$16,159) based on the anticipated growth in student enrollment.

The Department currently receives 35 graduate teaching assistantships for full-time students. Funding for one position would be reallocated in Year 1 to support this program (\$18,000). By Year 5, we anticipate the number of GTAs to increase to two based on the projected full-time enrollment (\$36,000).

Expenses in Table 2 (\$5,000 in year 1; \$12,000 in year 5) include computers/printers, copier, phones, postage, printing, travel, office supplies, information technology supplies, and specialized software. An allocation for recruiting (brochures, travel, etc.) is also requested to be able to attract new students from outside universities as well as agencies and industry in our service areas. This proposed program is a priority for the College such that funding will be reallocated to match the university/College priorities.

- B. Please explain whether the university intends to operate the program through continuing education, seek approval for market tuition rate, or establish a differentiated graduate-level tuition. Provide a rationale for doing so and a timeline for seeking Board of Governors' approval, if appropriate. Please include the expected rate of tuition that the university plans to charge for this program and use this amount when calculating cost entries in Table 2.**

N/A

- C. If other programs will be impacted by a reallocation of resources for the proposed program, identify the impacted programs and provide a justification for reallocating resources. Specifically address the potential negative impacts that implementation of the proposed program will have on related undergraduate programs (i.e., shift in faculty effort, reallocation of instructional resources, reduced enrollment rates, greater use of adjunct faculty and teaching assistants). Explain what steps will be taken to mitigate any such impacts. Also, discuss the potential positive impacts that the proposed program might have on related undergraduate programs (i.e., increased undergraduate research opportunities, improved quality of instruction associated with cutting-edge research, improved labs and library resources).**

None of the programs will be impacted by a reallocation of resources for the MS with Major in Artificial Intelligence program. The undergraduate programs will not be affected at all. All graduate courses are taught by graduate faculty in the College of Engineering and Computer Science, mainly from the CEECS department. Only 2 new graduate courses have been added as part of this proposal, a core course and an elective course. Both courses will attract other graduate students in the college and can be taken as electives in other programs. The courses already existent will benefit from the new program MS with Major in Artificial Intelligence, as they are expected to increase their enrollment. These courses are offered both live and distance learning. The 3 core courses will be offered at least once every year. The proposed curriculum has a rich variety of courses listed as electives (i.e. 21 elective courses), thus the enrolment increase per course is not expected to be high. The MS with Major in Artificial Intelligence program provides a great opportunity for students obtaining their bachelor's degree in Computer Science or related areas to continue their academic preparation and specialize into a field with great potential to transform every segment of industry.

- D. Describe other potential impacts on related programs or departments (e.g., increased need for general education or common prerequisite courses, or increased need for required or elective courses outside of the proposed major).**

There is no impact on related programs or departments. There is only one new core course added as part of this proposal (CAP 5625 Computational Foundations of Artificial Intelligence), and this course does not have any additional prerequisites. One new elective course has been added as an elective to an already rich variety of courses. No additional prerequisites are needed for this elective as well.

- E. Describe what steps have been taken to obtain information regarding resources (financial and in-kind) available outside the institution (businesses, industrial organizations, governmental entities, etc.). Describe the external resources that appear to be available to support the proposed program.**

NSF invests currently over \$100 million annually to support AI research (https://www.nsf.gov/news/news_summ.jsp?cntn_id=245418). NSF is supporting fundamental research to bring AI technologies to maturity and to provide new opportunities for the American workers. DARPA is funding research in AI. For example the Explainable Artificial Intelligence (XAI) program (<https://www.darpa.mil/program/explainable-artificial-intelligence>) are expected to enable AI systems where machines understand the context and environment in which they operate, and build models that allow them to characterize real world phenomena. Local industry (i.e. Modernizing Medicine, Magic Leap) will provide great opportunities for

internships for the students in MSAI program.

IV. Projected Benefit of the Program to the University, Local Community, and State

Use information from Tables 1 and 2 in Appendix A, and the supporting narrative for “Need and Demand” to prepare a concise statement that describes the projected benefit to the university, local community, and the state if the program is implemented. The projected benefits can be both quantitative and qualitative in nature, but there needs to be a clear distinction made between the two in the narrative.

It is evident from the recent development that AI is one of the foundations of many cutting-edge technologies such as data science, robotics, Internet of Things, clouding computing, cyber security and cyber-physical systems. These cutting-edge technologies in term fuel job growth in many high-tech areas. A study released by the World Economic Forum shows that Data Analysis, AI and machine learning-related jobs will be the most in demand within the next four to five years. National Academies of Science, Engineering and Medicine released a report stating advancement of AI and machine learning is crucial for the wellbeing of the nation. Many federal research funding agencies, such as National Science Foundation, National Institute of Health, and Defense Advanced Research Projects Agency, launched requests for applications in the areas of AI, Deep Learning, and their applications. These activities provide challenges and opportunities for us to produce AI professionals that meet the needs and demand of the call. The proposed program, with the available resource in the College of Engineering and Computer Science, Florida Atlantic University, will produce up 40 MSAI graduates annually after five years. These graduates will contribute their talent to generate broader economic impact on the regional and state economic development.

V. Access and Articulation – Bachelor’s Degrees Only

- A. If the total number of credit hours to earn a degree exceeds 120, provide a justification for an exception to the policy of a 120 maximum and submit a separate request to the Board of Governors for an exception along with notification of the program’s approval. (See criteria in Board of Governors Regulation 6C-8.014)

N/A

- B. List program prerequisites and provide assurance that they are the same as the approved common prerequisites for other such degree programs within the SUS (see link to the Common Prerequisite Manual on [the resource page for new program proposal](#)). The courses in the Common Prerequisite Counseling Manual are intended to be those that are required of both native and transfer students prior to entrance to the major program, not simply lower-level courses that are required prior to graduation. The common prerequisites and substitute courses are mandatory for all institution programs listed, and must be approved by the Articulation Coordinating Committee (ACC). This requirement includes those programs designated as “limited access.”

If the proposed prerequisites are not listed in the Manual, provide a rationale for a request for exception to the policy of common prerequisites. NOTE: Typically, all lower-division courses required for admission into the major will be considered prerequisites. The curriculum can require lower-division courses that are not prerequisites for admission into the major, as long as those courses are built into the curriculum for the upper-level 60 credit hours. If there are already common prerequisites for other degree programs with the same proposed CIP, every effort must be made to utilize the previously approved prerequisites instead of recommending an additional “track” of prerequisites for that CIP. Additional tracks may not be approved by the ACC, thereby holding up the full approval of the degree program. Programs will not be entered into the State University System Inventory until any

exceptions to the approved common prerequisites are approved by the ACC.

N/A

- C. If the university intends to seek formal Limited Access status for the proposed program, provide a rationale that includes an analysis of diversity issues with respect to such a designation. Explain how the university will ensure that Florida College System transfer students are not disadvantaged by the Limited Access status. NOTE: The policy and criteria for Limited Access are identified in Board of Governors Regulation 6C-8.013. Submit the Limited Access Program Request form along with this document.

N/A

- D. If the proposed program is an AS-to-BS capstone, ensure that it adheres to the guidelines approved by the Articulation Coordinating Committee for such programs, as set forth in Rule 6A-10.024 (see link to the Statewide Articulation Manual on [the resource page for new program proposal](#)). List the prerequisites, if any, including the specific AS degrees which may transfer into the program.

N/A

INSTITUTIONAL READINESS

VI. Related Institutional Mission and Strength

- A. Describe how the goals of the proposed program relate to the institutional mission statement as contained in the SUS Strategic Plan and the University Strategic Plan (see link to the SUS Strategic Plan on [the resource page for new program proposal](#)).

The mission of the State University System of Florida is to provide undergraduate, graduate and professional education, research, and public service of the highest quality through a coordinated system of institutions of higher learning, each with its own mission and collectively dedicated to serving the needs of a diverse state and global society. The proposed MSAI program will produce AI professionals who are equipped with fundamentals of AI, data mining and analysis, and machine learning, as well as domain knowledge autonomous systems, robotics, computer vision, human machine interfacing, natural language processing, among other things. They will also gain the research and inquiry skills necessary to independently conduct research and answer questions within their area of choice. They will be well prepared with rich hands-on AI and machine learning skills to enter the high demand workforce in the era of big data and AI. The new program will thus enhance both graduate education and public service in fields important not only to South Florida but also the United States by producing graduates well situated to enter the workforce, ready to apply their skills to research, management and administrative questions related to data science and analytics. Graduates are expected to enter into higher education, government, private sector consulting positions and non-profit organizations.

The MSAI Program will also seek to provide public service through student internships with federal, state and local agencies and organizations. The internships would offer opportunities for FAU students to participate in research and monitoring efforts, learn new skills, obtain experience, and provide various types of support to local partners on research projects related AI and machine learning. Thus, the MSAI Program, its faculty and students will become a resource for local communities, government agencies, and local businesses in their efforts to find innovative solutions to problems facing coastal Florida.

- B. Describe how the proposed program specifically relates to existing institutional strengths, such as programs of emphasis, other academic programs, and/or institutes and centers.**

The newly proposed program MS with Major in Artificial Intelligence integrates well with the existing programs in the COECS, and provides a pathway of specialization for the students getting a bachelor's degree in engineering or science. CEECS department has a number of faculty conducting funded research in the AI - related areas (vision; data analytics and algorithms; knowledge management and reasoning; machine learning; and AI applications), and this represents great research opportunities for the students enrolled in the MSAI program, as well as great opportunities for advising MS theses. CEECS department has a Big Data Analytics certificate program. MSAI students that specialize in Data Analytics and Machine Learning (as result of selecting corresponding elective courses) will be eligible to receive this certificate. CEECS department has few laboratories that can be used for teaching and research in AI related areas: Artificial Intelligence and Deep Learning (AIDL) Training and Research Laboratory in Florida (Director: Dr. Hill Zhu); Big Data Training and Research Laboratory (Director: Dr. Taghi Koshgoftar); and Bidtellect Laboratory (Director: Dr. Hill Zhu).

- C. Provide a narrative of the planning process leading up to submission of this proposal. Include a chronology in table format of the activities, listing both university personnel directly involved and external individuals who participated in planning. Provide a timetable of events necessary for the implementation of the proposed program.**

Planning Process

Date	Participants	Planning Activity
October 2018	COECS Dean , COECS Associate Dean and CEECS chair	Initial plan for a new MSAI program
October 2018	Associate Dean and Assistant Provost for eLearning	Meeting to discuss the process and request the Market Analysis
January 2019	EAB contacted FAU	EAB Market Analysis - interim report received
February 2019	EAB contacted FAU	EAB Market Analysis - final report received
February 2019	COECS Associate Dean, CEECS Chair, Senior Associate Provost for Academic Affairs	Pre-proposal submitted
February 2019	Senior Associate Provost for Academic Affairs	Pre-proposal approved by CAVP
February 2019	CEECS Faculty, CEECS Associate chair, COECS Associate Dean	Meeting to discuss curriculum
March 2019	CEECS Associate Chair, COECS Associate Dean	Develop the proposal
March 2019	CEECS GPC, College GPC, University GPC	Approval
April 2019	FAU Senate	Approval

Events Leading to Implementation

Date	Implementation Activity
February 2019	CAVP approves the pre-proposal

March 2019	Proposal preparation, syllabi for new courses developed, catalog entry developed
March 2019	Approval by the CEECS GPC, COECS GPC, and UGPC

VII. Program Quality Indicators - Reviews and Accreditation

Identify program reviews, accreditation visits, or internal reviews for any university degree programs related to the proposed program, especially any within the same academic unit. List all recommendations and summarize the institution's progress in implementing the recommendations.

The program will be hosted in the Department of Computer and Electrical Engineering and Computer Science (CEECS). The CEECS department aims to find a balance of adhering to the mathematical and scientific fundamentals of our disciplines while also following their evolution and reflecting them in our offered curriculum and student training. We emphasize critical thinking, problem solving and teamwork, and stress the significance of lifelong learning. The goals of the College of Engineering and Computer Science are to encourage young people to consider careers in engineering and computer science by introducing them to these fields while in middle and high school; to prepare graduates in ways that provide them a basis for lifelong personal and professional development and that enable them to exercise leadership and make lasting contributions in their disciplines; to continue on new roads of research and discovery in its existing areas of expertise, in emerging disciplines and in related interdisciplinary areas; to provide the educational resources that working professionals need to keep pace with developments in their field; and to magnify its positive impact in serving regional, state, national and global needs by building mutually beneficial linkages with business, industry, state colleges, K-12 programs and schools and other constituencies. The CEECS department offers two programs related to the proposed MSAI program: Master of Science in Computer Science (MSCS), and Master of Science in Computer Engineering (MSCE). Both programs are accredited by the Southern Association of Colleges and Schools (SACS) Commission on Colleges. The programs are also reviewed regularly by the Board of Governors. No serious concerns were raised during the last visit. Recommendations include reducing teaching loads of untenured faculty and improving the output of faculty research and scholarly work. Since then, the teaching loads of untenured faculty members have been drastically cut (from 2 plus 2 to 1 plus 1) and new departmental and college research initiatives have been launched.

VIII. Curriculum

- A. Describe the specific expected student learning outcomes associated with the proposed program. If a bachelor's degree program, include a web link to the Academic Learning Compact or include the document itself as an appendix.**

AI is transforming every segment of industry, thus enhancing the lives of all people. Students in the MSAI program will understand how artificial intelligence works, by combining data with fast, iterative processing and intelligent algorithms, allowing the software to learn from patterns or features of the data. Students will have a broad understanding of the theories, methods and technologies which lay the foundation of artificial intelligence, and will get the opportunity to take courses in major AI areas of specialty: vision, data analytics and algorithms, knowledge management and reasoning, machine learning, and AI applications.

Student Learning Outcomes (SLO) - Master of Science in Artificial Intelligence
SLO1: Students master advanced knowledge in Artificial Intelligence

Students in the MSAI program will master advanced knowledge in AI through courses, term projects, algorithms, software assignments, and oral presentations of the class projects. The core courses provide the foundation for AI techniques. Students will then take classes from specialty groups: vision, data analytics and algorithms, knowledge management and reasoning, machine learning, and AI applications.

Implementation Strategy

Instructors design lectures and assignments aiming at improving students' mastery of advanced knowledge in their fields of study.

Assessment Method

Document and analyze students' work in terms of their understanding and mastery of knowledge in the fundamentals of AI and machine learning as well as applications. Instructors of the courses in the program offered in each academic year will document and assess students performance quantitatively and qualitatively through homework, tests, and class projects (among other things) in terms of students theoretical, analytical, and design skills.

SLO2: Students conduct independent research and or scholarly work in the areas related to the Artificial Intelligence discipline

Students enrolled in the thesis option will conduct original research, write and defend a thesis. The thesis students will demonstrate (1) the ability to survey the scientific literature; (2) the ability to develop a hypothesis, design algorithms, implement them, conduct scientific experiments and simulations, and draw conclusions; (3) the ability to analyze the complexity of the algorithms; (4) the ability to write a scientific thesis; and (5) the ability to communicate effectively during the thesis presentation.

Students interested in getting engaged in research can enroll in a research-oriented Directed Independent Study (DIS), for the duration of a semester. This represents an opportunity to get involved in research in AI related areas under the supervision of a professor working in this field.

Implementation Strategy

The evaluation of the thesis will be conducted by the thesis committee members, following the guidelines of the CEECS department. A digital copy of the thesis will be made available to the whole department at least 1 week before the defense. The committee members will carefully review the manuscript and provide feedback. The committee members will attend the defense presentation, which is opened to the university at large and to the public. The DIS will be evaluated by the professor supervising the DIS.

Assessment Method

Each member of the MS supervisory committee will complete an evaluation form, where they evaluate the thesis and the quality of the research conducted by the student, using a scale 1 through 5 (1=unsatisfactory; 3 = satisfactory; 5=excellent) for established criteria such as:

1. The ability to perform research
2. The development of an appropriate solution for the thesis based on fundamentals and advanced topics.

The professor supervising the research-oriented DIS will complete an evaluation form, where he/she will evaluate on a scale of 1 to 5 (1=unsatisfactory; 3 = satisfactory; 5=excellent) the following criteria:

1. The ability to perform research
2. The student has demonstrated an advanced level of knowledge in the selected topic

SLO3: Students possess effective oral and written communication skills

The thesis students will write a thesis and will present orally their research findings to the MS supervisory committee and other people attending the defense.

Implementation Strategy

The evaluation of the written thesis and the oral presentation will be conducted by the MS supervisory committee following the guidelines in the CEECS department. The research-oriented DIS is supervised by a professor working in AI - related areas.

Assessment Method

Each member of the MS supervisory committee will complete an evaluation form, where they evaluate the written thesis and the oral presentation by using a scale of 1 through 5 (1=unsatisfactory; 3 = satisfactory; 5=excellent) for established criteria such as:

1. Submission of a satisfactory written thesis.
2. Oral presentation of the thesis in a satisfactory manner.

The professor supervising the DIS will complete an evaluation form at the completion of the DIS, where they evaluate on a scale 1 to 5 (1=unsatisfactory; 3 = satisfactory; 5=excellent) the following criteria:

1. Submission of a satisfactory written report
2. Oral presentation of the DIS report in a satisfactory manner.

B. Describe the admission standards and graduation requirements for the program.

Admission Requirements

Each applicant to the MSAI program must meet the following requirements:

1. A baccalaureate degree in Computer Science or a related field (Students without a computer science background will be expected to take additional courses);
2. At least a 3.0 (of a 4.0 minimum) GPA in the last 60 credits attempted prior to graduation;
3. Submission of the Graduate Record Examination (GRE) scores. GRE scores more than five years old are normally not acceptable. The GRE requirement is waived for any student who has a baccalaureate degree from FAU's Department of Computer & Electrical Engineering and Computer Science (CEECS) with a GPA of at least 3.25 (out of a possible 4.0) in the last 60 credits attempted prior to graduation; and
4. International students from non-English-speaking countries must be proficient in written and spoken English as evidenced by a score of at least 500 (paper-based test) or 213 (computer-based test) or 79 (Internet-based test) on the Test of English as a Foreign Language (TOEFL) or a score of at least 6.0 on the International English Language Testing System (IELTS).

Applicants are expected to have taken the following prerequisite courses (or equivalents) before pursuing a master's degree. In some cases, prerequisite courses may be taken after admission to the graduate program.

Data Structures and Algorithm Analysis	COP 3530
Design and Analysis of Algorithms	COT 4400
Stochastic Models for Computer Science	STA 4821
Calculus with Analytic Geometry 1	MAC 2311
Calculus with Analytic Geometry 2	MAC 2312

Graduation Requirements

Both thesis and non-thesis options are available and require a minimum of 30 credits. Non-thesis students will take 3 core courses and 7 elective courses from the following AI-related groups: vision, data analytics and algorithms, knowledge management and reasoning, machine learning, and applications. The thesis students will take 3 core courses, 6 thesis credits and 5 elective courses from the areas indicated previously. Both non-thesis and thesis options allow up to 3 elective courses to be substituted with any course in the College of Engineering and Computer Science, with prior approval from the advisor.

- C. Describe the curricular framework for the proposed program, including number of credit hours and composition of required core courses, restricted electives, unrestricted electives, thesis requirements, and dissertation requirements. Identify the total numbers of semester credit hours for the degree.**

Both the thesis and non-thesis options of the MSAI program require a minimum of 30 credits in total.

Required Core Courses

The students are required to take 3 required core courses (9 credits):

CAP 5625 Computation Foundation of Artificial Intelligence

CAP 6635 Artificial Intelligence

CAP 6673 Data Mining and Machine Learning

Restricted Electives

Non-thesis students must take at least 7 elective courses (21 credits) from the following AI-related groups: vision, data analytics and algorithms, knowledge management and reasoning, machine learning, and applications. The thesis students will take at least 5 elective courses (15 credits) from the specified AI-related groups.

Unrestricted Electives

Both non-thesis and thesis options allow up to 3 elective courses to be substituted with any course in the College of Engineering and Computer Science, with prior approval from the advisor.

Thesis Requirements

Thesis option requires a minimum of 6 thesis credits.

- D. Provide a sequenced course of study for all majors, concentrations, or areas of emphasis within the proposed program.**

The MSAI program requires a minimum of 30 credits for both thesis and non-thesis options.

Required core courses (9 credits)

Computational Foundations of Artificial Intelligence	CAP 5625
Artificial Intelligence	CAP 6635
Data Mining and Machine Learning	CAP 6673

In addition, students pursuing the non-thesis option are required to take 7 elective courses from the groups: Vision, Data Analytics and Algorithms, Knowledge Management and Reasoning, Machine Learning, and Applications. Students pursuing the thesis option are required take 5 elective courses from the groups below and 6 thesis credits. Both non-thesis and thesis options allow up to 3 elective courses to be substituted with any course in the College of Engineering and Computer Science, with prior approval from the advisor.

Vision	
Foundations of Vision	CAP 6411
Computer Vision	CAP 6415
Machine Learning for Computer Vision	CAP 6618
Visual Information Retrieval	COP 6728
Data Analytics and Algorithms	
Big Data Analytics with Hadoop	CAP 6780
Social Networks and Big Data Analytics	CAP 6315
Introduction to Data Science	CAP 5768
Data Mining for Bioinformatics	CAP 6771
Analysis of Algorithms	COT 6405
Knowledge Management and Reasoning	
Information Retrieval	CAP 6776
Web Mining	CAP 6777
Natural Language Processing	CAP 6640
Semantic Web Programming	COP 5859
Machine Learning	
Introduction to Neural Networks	CAP 5615
Evolutionary Computing	CAP 6512
Deep Learning	CAP 6619
Advanced Data Mining and Machine Learning	CAP 6778
Sparse Learning	CAP 6617
Applications	
Robotic Applications	EEL 5661
Computational Advertising and Real-time Data Analytics	CAP 6807
Artificial Intelligence in Medicine and Healthcare	CAP 6683

E. Provide a one- or two-sentence description of each required or elective course.

Required Core Courses

CAP 5625 Computational Foundations of Artificial Intelligence

This course covers the mathematical and programming foundations of artificial intelligence (AI) and machine learning (ML) using contemporary programming languages and tools. As a result, students will develop familiarity with mathematical methods (and associated notation, software packages and libraries) that are widely used in AI and ML projects and literature.

CAP 6635 Artificial Intelligence

The basic concepts, techniques, and applications of artificial intelligence: representations, search strategies, control, communication, deduction, agents, evolutionary computation and machine learning.

CAP 6673 Data Mining and Machine Learning

Course deals with the principles of data mining and machine learning. Topics to be covered include machine learning methods, knowledge discovery and representation, classification and prediction models.

Elective courses per group

- **Vision**

CAP6411 Foundations of Vision

Study of the interdisciplinary science of vision combining the psychological, neurophysiological, and computational aspects of vision research. Research paper and project topics will be chosen from a list of latest developments in the field.

CAP6415 Computer Vision

Course covers fundamentals of computer vision and their applications in various areas such as medicine, homeland security, entertainment, and manufacturing.

CAP6618 Machine Learning for Computer Vision

Introduction to machine learning techniques and their application in computer vision problems. Discusses image processing principles, techniques and algorithms. Use of MATLAB for lab assignments and projects.

COP6728 Vision Information Retrieval

Studies the interdisciplinary research area of visual information retrieval. Research paper and project topics are chosen from a list of latest developments and open challenges and opportunities in the field.

- **Data Analytics and Algorithms**

CAP6780 Big Data Analytics with Hadoop

Course covers data mining and machine learning in relation to Big Data. Big Data challenges such as high dimensionality, class imbalance and quality of data are examined. Offers hands-on experience with Big Data analysis in Hadoop using a high performance computing cluster.

CAP6315 Social Networks and Big Data Analytics

This course teaches students basic concepts of Big Data Analytics with focus on social network analysis and modeling. The class covers three major topics: graphs and social network models, Big Data Analytics platform and MapReduce (Hadoop) programming, and social network analytics and mining algorithms.

CAP5768 Introduction to Data Science

This course will survey foundational topics in data science and reinforce practical programming skills in the context of data analytics. Students will learn fundamentals of computational data analysis using statistics and machine learning and gain experience working with data sets from a variety of domains.

CAP6546 Data Mining for Bioinformatics

Course focuses on the principles of data mining as it relates to bioinformatics. Topics covered include gene selection, class imbalance, classification, biomarker discovery and prediction models. No prior knowledge of biology is required.

COT6405 Analysis of Algorithms

Design and analysis of algorithms from several areas of computer science. Topics include advanced data structures, dynamic programming, greedy algorithms, approximation algorithms, and probabilistic algorithms.

- **Knowledge Management and Reasoning**

CAP6776 Information Retrieval

This course teaches concepts, techniques and popular tools and applications in information retrieval (IR), which aims to obtain relevant information from a collection of resources. The class covers efficient text indexing, text processing, web search and text mining. New applications are also introduced.

CAP6777 Web Mining

Course covers the techniques used to model, analyze, and understand the Internet and the web, especially the web graph and hypertext data.

CAP6640 Natural Language Processing

This course will provide students with both theory and applications of Natural Language Processing. It includes relevant background material in Linguistics, Mathematics, Probability, and Computer Science. Some of the topics covered in the class are Text Similarity, Part-of-Speech Tagging, Parsing, Semantics, Question Answering, Sentiment Analysis, and Text Summarization.

COP5859 Semantic Web Programming

Semantic web building blocks (standards, languages and frameworks). Open source tools. Integrated flow with our examples. Build an infrastructure to develop personal and practical Apps. Open to majors in computer science and engineering and others with consent of instructor.

- **Machine Learning**

CAP5615 Introduction to Neural Networks

Brief introduction to biological neural systems. Models of neural mechanisms of learning and memory. Neural net applications to image processing, pattern recognition, machine learning, optimization problems, and robotics. Hardware implementation issues.

CAP6512 Evolutionary Computing

Course provides understanding and exploration of biologically inspired computation. In-depth look at genetic algorithms (variables to be optimized and/or minimized), genetic programming (tree representation and parsing), classifier systems (GA variations and production rules), and evolutionary programming and strategies. Students will have a number of hands-on simulations and design assignments.

CAP6619 Deep Learning

This course teaches students basic concepts of deep learning with applications in computer science, engineering, business and other areas. The class covers major topics including math preliminaries, machine learning basics, deep forward networks, convolution networks, autoencoders, representation learning networks and their implementations and applications.

CAP6778 Advanced Data Mining and Machine Learning

The study of advanced topics in data mining and machine learning. Current research issues in data mining and its application in bioinformatics, computer network security, computer science, and software engineering.

CAP6617 Sparse Learning

This course introduces new concepts, theory, algorithms, and applications of sparse representation and modeling, and their relationship with deep learning. Topics covered include mathematical preliminaries, L1 optimization, pursuit algorithms, sparse representation classifiers, sparse dictionary learning, sparse deep learning, and applications.

- **Applications**

EEL5661 Robotic Applications

Robot classification, robot systems, economic justification; product design for robot assembly; programming, part feeding, tooling.

CAP6807 Computational Advertising and Real-Time Data Analytics

This course teaches students basic concepts of computational advertising with a focus on real-time data analytics for displaying advertisement. The class introduces different key aspects of building platforms for online advertising, the computational requirement, tools and solutions.

CAP6683 Medical Applications for Artificial Intelligence

This course introduces the underlying concepts, methods, and the potential of intelligent systems in medicine. It explores the application of artificial intelligence (AI) and machine learning methods, techniques, and tools to specific areas in medicine and healthcare. As a research and project-based course, students will have opportunities to identify and specialize in particular AI methods, clinical/healthcare applications, and relevant tools.

- F. For degree programs in the science and technology disciplines, discuss how industry-driven competencies were identified and incorporated into the curriculum and indicate whether any industry advisory council exists to provide input for curriculum development and student assessment.**

The aim of the MSAI program to produce AI professionals who will be able to work all sectors of employment, including industry, government and defense. The coursework and research projects to be undertaken by students will help them to meet the needs of a wide range of employers. The Industry Advisory Board of the Department of Computer and Electrical Engineering and Computer Science will meet regularly to ensure that the needs of the employers will be identified and incorporated into the curriculum.

- G. For all programs, list the specialized accreditation agencies and learned societies that would be concerned with the proposed program. Will the university seek accreditation for the program if it is available? If not, why? Provide a brief timeline for seeking accreditation, if appropriate.**

At this time, we are not seeking accreditation for the MS with Major in Artificial Intelligence program, since this is not a professional development program.

- H. For doctoral programs, list the accreditation agencies and learned societies that would be concerned with corresponding bachelor's or master's programs associated with the proposed program. Are the programs accredited? If not, why?**

N/A

- I. Briefly describe the anticipated delivery system for the proposed program (e.g., traditional delivery on main campus; traditional delivery at branch campuses or centers; or nontraditional delivery such as distance or distributed learning, self-paced instruction, or external degree programs). If the proposed delivery system will require specialized services or greater than normal financial support, include projected costs in Table 2 in Appendix A. Provide a narrative describing the feasibility of delivering the proposed program through collaboration with other universities, both public and private. Cite specific queries made of other institutions with respect to shared courses, distance/distributed learning technologies, and joint-use facilities for research or internships.**

The courses for the MSAI program will be delivered in traditional classroom, distance learning, and online. Most of the courses included in this program are courses already offered by the CEECS department. One new core course (CAP5625 Computational Foundations of Artificial Intelligence) and one elective course (CAP6683 Medical Applications for Artificial Intelligence) have been developed by CEECS to support the development of this program. There is not a perceived need to look outside FAU at this time for shared courses and technologies in regard to the newly proposed MSAI program.

Students enrolled into the MSAI program will be involved in research by pursuing the thesis option, by taking a research-based-DIS course, or through research assistantships. Many of the courses enclosed in this program are of interest to our industry partners. We will work with the department and college Industry Advisory Board to provide opportunities for the students enrolled in the MSAI to gain industry experience.

IX. Faculty Participation

- A. Use Table 4 in Appendix A to identify existing and anticipated full-time (not visiting or adjunct) faculty who will participate in the proposed program through Year 5. Include (a) faculty code associated with the source of funding for the position; (b) name; (c) highest degree held; (d) academic discipline or specialization; (e) contract status (tenure, tenure-earning, or multi-year annual [MYA]); (f) contract length in months; and (g) percent of annual effort that will be directed toward the proposed program (instruction, advising, supervising internships and practica, and supervising thesis or dissertation hours).**

Table 4 in Appendix A lists all graduate faculty associated with the program in Years 1 and 5. There is no new faculty hiring needed. The following estimates are used in computing the values in Table 4:

- If a faculty teaches a core course specifically for MSAI (CAP 5625, CAP6635), then the effort is projected to be 33%
- If a faculty teaches a core course which is included in other programs as well (i.e. CAP 6673), then the effort is estimated to be 20%
- If a faculty is the program advisor, then the effort is 15%
- If a faculty is involved in teaching an existing course for the program, thus adding few MSAI students to the class, then the effort is projected to be 6% in the first year. The effort doubles in the fifth year if thesis advising is projected.

- B. Use Table 2 in Appendix A to display the costs and associated funding resources for existing and anticipated full-time faculty (as identified in Table 4 in Appendix A). Costs for visiting and adjunct faculty should be included in the category of Other Personnel Services (OPS). Provide a narrative summarizing projected costs and funding sources.**

The proposed budget includes 1 graduate teaching assistant per year in years 1, 2, and 3, and 2 graduate assistants per year for years 3 and 4, at the rate (stipend + rate benefits) set by the Graduate College. The graduate teaching assistants positions are reallocated within the CEECS department. Additional details are presented in Table 2 in Appendix A.

- C. Provide in the appendices the abbreviated curriculum vitae (CV) for each existing faculty member (do not include information for visiting or adjunct faculty).**

The abbreviated CVs have been included in the appendices. Brief research interests of the faculty is presented below.

Dr. Taghi M. Khoshgoftaar is Motorola Endowed Chair professor of the Department of Computer and Electrical Engineering and Computer Science, Florida Atlantic University and the Director of NSF Big Data Training and Research Laboratory. His research interests are in big data analytics, data mining and machine learning, health informatics and bioinformatics, social network mining, fraud detection, and software engineering. He has published more than 700 refereed journal and conference papers in these areas. He is the conference chair of the IEEE International Conference on Machine Learning and

Applications (ICMLA 2019). He is the Co-Editor-in Chief of the journal of Big Data. He has served on organizing and technical program committees of various international conferences, symposia, and workshops.

Dr. Xingquan (Hill) Zhu is a professor in the Department of Computer and Electrical Engineering and Computer Science at FAU. Dr. Zhu's research interests are data mining, machine learning, multimedia systems, and bioinformatics.

Dr. Hanqi Zhuang is Associate Chair and a professor in the CEECS department. Dr. Zhuang's research interests span signal and image processing, robotics and computer vision, dictionary learning and deep learning, and their applications.

Dr. Oge Marques is a professor in the CEECS department with research interests in intelligent processing of visual information, a combination of artificial intelligence, image processing, computer vision, human vision, and machine learning, with recent emphasis on medical applications. In addition to applying artificial intelligence to image analysis and computer vision problems, Dr. Marques' research has been inspired by the human factors associated with visual perception, object recognition, image retrieval, and other intelligent visual processing tasks. He has also devoted a significant amount of effort researching the cognitive foundations of human visual perception and building serious games and other human computation solutions (e.g., crowdsourcing) to engage users in such tasks.

Dr. Dingding Wang's primary research interest lies in data mining, information retrieval, and machine learning for improving document understanding. In particular, her research goal is to help users to better understand and utilize large real document data sets via document clustering, summarization, and storyline generation. She also works on research topics related to social network analytics, bioinformatics, music information retrieval, recommendation systems, and malware detection.

Dr. Yufei Tang is an Assistant Professor in the Department of CEECS and a Faculty Fellow of I-SENSE at Florida Atlantic University (FAU), where he is also the Director of the Intelligent and Resilient Systems (IRS) Research Group. His research interests are in the areas of Computational Intelligence (e.g., Machine Learning, Networked Big Data Mining) and Cyber-Physical Systems (e.g., Ocean Energy Systems, Smart Grid). Currently, his research foci are networked big data and system analytics (e.g., social networks and sensor networks), and predictive maintenance of marine structures/systems (e.g., marine hydrokinetic turbine monitoring, harmful algal blooms prediction).

Dr. Feng-Hao Liu is an Assistant Professor in the CEECS department with research interests in cryptography (foundations and applications), and broadly theoretical computer science. Specific topics include: how to compute on encrypted data, how to verify computation in outsourced environments, how to protect memory and computation from physical attacks, and various settings of multiparty computation.

Dr. Kwang-Soo Yang is an Assistant Professor in the CEECS department with research interests in the broadly area of Spatial Big Data (SBD). Examples of SBD include temporally detailed road maps that provide speeds every minute for every road-segment, GPS trace data from cell-phones, and engine measurements of fuel consumption, greenhouse gas emissions, etc. SBD has the potential to transform society via next-generation routing services, emergency and disaster response, and discovery of potentially useful patterns embedded in these datasets. However, SBD poses significant challenges as the size, variety, and update rate of mobile datasets exceed the capacity of commonly used spatial computing and spatial database technologies to learn, manage, and process the data with reasonable effort. My research has focused on two issues within Spatial Big Data: storage of big spatio-temporal network (STN) data and design of scalable algorithms for big spatial networks.

Dr. Dimitris Pados is a Professor in the CEECS department, ISENSE Fellow, and director of the ExtremeComms Laboratory. His research interests are in Communications Theory and Systems (Cognitive Software-defined Radios and Networks; Interference Avoiding Networking; Secure Wireless Communications; Underwater Cognitive Hi-rate/Long-distance Acoustic Communications; Autonomous/Unmanned Aerial/Ground/Underwater System Communications) and Machine Learning and Adaptive Signal Processing (L1-norm Principal-component Analysis (L1-PCA); Robust Feature Extraction from Faulty Data Sets;

Digital Data Embedding/Hiding; Compressed-sensed (Multi-view) Imaging and Video; Localization in GPS-less Environments; Ad-hoc/Dynamic Geometry Beamforming and Array Radar; Communications-Radar Coexistence).

Dr. Elias Bou-Harb is an Assistant Professor in the CEECS department. Dr. Bou-Harb is an expert in cyber threat intelligence, real-time traffic analysis and correlation, and digital/network forensics. Throughout his academic and technical career, Dr. Bou-Harb has gained the ability to represent information in various methods, the aptitude to design and conduct an observational, testing and an application experiment, and the capability to effectively communicate scientific ideas and results. Moreover, he has gained operational engineering capabilities in cyber security R&D, realtime big data analytics, cyber-attack detection and mitigation, efficient malware fingerprinting and real-time traffic analysis.

Dr. Behnaz Ghoraani is an Assistant Professor in the CEECS department and ISENSE. Dr. Ghoraani research interests span biosensor and biomedical signal analysis, non-stationary data analytics, feature extraction and classification, time-frequency signal analysis, pattern classification and recognition, dictionary learning, computer-aided clinical decision making.

Dr. Ravi Shankar is a Professor in the CEECS department. Dr. Shankar's research interests span systems and all issues pertinent so systems. Over the years, he has built up background and expertise, always with a systems perspective, in biomedical engineering, analog and mixed signal design, VLSI and chip design, engineering design automation, concurrent and distributed processing, engineering management, engineering design productivity, software automation, cyberlearning, complex systems, and App development for smart phones, robotics, and the semantic web.

Dr. Mihaela Cardei is a Professor in CEECS department and Associate Dean for Graduate Studies. Dr. Cardei's research interests are in the areas of design of efficient protocols and algorithms for managing communication and energy resources in ad hoc wireless networks: wireless communications and energy efficiency in wireless networks QoS; routing and data dissemination schemes in wireless networks; power-aware scalable topology control in wireless networks; and optimization problems in wireless networking.

- D. Provide evidence that the academic unit(s) associated with this new degree have been productive in teaching, research, and service. Such evidence may include trends over time for average course load, FTE productivity, student HC in major or service courses, degrees granted, external funding attracted, as well as qualitative indicators of excellence.**

The CEECS Department has over 800 undergraduate, 200 M.S. and 75 Ph.D. students. Its three programs (Electrical Engineering, Computer Engineering and Computer Science) are all accredited by the American Board of Engineering Training (ABET) and Southern Association of Colleges and Schools (SACS). The 5-year trend of degrees awarded and 6-year trend of research expenditures are shown in the tables below.

	2013-14	2014-15	2015-16	2016-17	2017-18
Bachelor's	190	171	226	225	232
Master's	71	59	41	54	85
PhD	10	16	5	7	14
Total	271	246	272	286	331

Total Departmental Research Expenditure

FY2012-13	FY2013-14	FY2014-15	FY2015-16	FY2016-17	FY2017-18
1,021,174	867,727	850,795	1,457,057	2,370,294	2,463,447

The CEECS Department is home to two NSF IUCRC (Industry – University Cooperative Research Centers), two named laboratories (Bidtellect and Tecore). In AY 2017-18, CEECS faculty have published 9 books, 220 peer reviewed publications, 142 conference presentations and submitted 56 grant proposals.

X. Non-Faculty Resources

- A. Describe library resources currently available to implement and/or sustain the proposed program through Year 5. Provide the total number of volumes and serials available in this discipline and related fields. List major journals that are available to the university's students. Include a signed statement from the Library Director that this subsection and subsection B have been reviewed and approved.**

All FAU campuses have onsite libraries, with extensive physical and electronic collections. The total number of print volumes that could be categorized as related to Artificial Intelligence is 24,740. The call number ranges and subject areas are included in the Appendix E. There are two print journals in areas related to Artificial Intelligence: Florida Scientist and Scientific American.

FAU also has access through subscriptions to a number of electronic journal titles and databases, such as JSTOR, related to Artificial Intelligence areas. The number of journal titles is 765. The journal titles and the databases are listed in the Appendix E.

- B. Describe additional library resources that are needed to implement and/or sustain the program through Year 5. Include projected costs of additional library resources in Table 2 in Appendix A. Please include the signature of the Library Director in Appendix B.**

No additional library resources are needed to implement and support the program.

- C. Describe classroom, teaching laboratory, research laboratory, office, and other types of space that are necessary and currently available to implement the proposed program through Year 5.**

The existing space is sufficient for both teaching and research activities associated with the proposed program MSAI. More specifically, the following facility and research labs are available.

Artificial Intelligence and Deep Learning (AIDL) Training and Research Laboratory in Florida (Director: Dr. Hill Zhu)

Hosted at the university, FAU's AIDL laboratory will be shared across multiple campuses and research disciplines and will significantly advance FAU's role in artificial intelligence and deep learning-based intelligent information analysis. FAU's AIDL laboratory

infrastructure features a graphics processing unit (GPU) cluster – a computer cluster that enables the performance of very fast calculations – and includes 18 GPU servers and 72 Nvidia Tesla V-100 GPU cards and a 38.4 Terabyte flash memory server. The GPU cards are among the world's best technology for artificial intelligence and deep learning. This project will nearly quadruple the number of GPU cards at FAU from 31 to 103 cards and will increase the onboard GPU memory six times from 381GB to 2,304 GB.

The platform will be shared across FAU's campuses, resulting in a centralized cross-campus interdisciplinary platform and augmented deep learning and related artificial intelligence tools for interdisciplinary research. The AIDL laboratory also will serve as the training and research platform to support graduate student teaching and research activities across multiple campuses, colleges, and disciplines as well as FAU's research pillars.

Big Data Training and Research Laboratory (Director: Dr. Taghi Koshgoftaar)

NSF Big Data Training and Research Laboratory project consisted of procurement and deployment of a large computing cluster appropriate for Big Data research and led to the developed large-scale computational resources capable of solving Big Data challenges at Florida Atlantic University (FAU). The tools and resources provided by this project include a high performance computer cluster and advanced databases and facilities to store, maintain, and secure large quantities of data.

The computational facilities constructed as a part of this project provide student and faculty researchers with access to state-of-the-art hardware and software required to work with Big Data. Researchers have access to multiple distributed file systems including Hadoop and Lustre, and can leverage GPU accelerated nodes for training deep artificial neural networks and for use in other highly parallel tasks. Since the facility's inception, its resources have been used in over 100 published peer reviewed journal and conference papers and continue to be used in many ongoing research projects in a number of Big Data and/or Deep Learning application domains, including anomaly detection, fraud detection, sports medicine, network security, transfer learning, facial recognition, social media mining, fake review detection, and text mining. six PhD and three Masters Students have utilized these facilities to complete their dissertation or thesis and graduate since 2015, with many more set to graduate in the near future.

Additionally, the resources and tools acquired through this project have led to the development of new educational courses for graduate students and advanced undergraduates specifically focused on the tools and techniques necessary for Big Data research, such as using the Hadoop distributed file system for machine learning, and Deep learning.

Bidtellect Laboratory (Director: Dr. Hill Zhu)

The Bidtellect Laboratory is an incubator to support big data analytics and digital advertising research, as well as serve as an educational platform. Bidtellect's proprietary state of the art technology allows native ad planning, buying, selling and overall management on a single platform. By utilizing Bidtellect's Native DSP (nDSP), Native SSP (nSSP) and openRTB 2.3 Native Exchange, advertisers and publishers can now implement effective Native campaigns at scale with maximum optimization.

- D. Describe additional classroom, teaching laboratory, research laboratory, office, and other space needed to implement and/or maintain the proposed program through Year 5. Include any projected Instruction and Research (I&R) costs of additional space in Table 2 in Appendix A. Do not include costs for new construction because that information should be provided in response to X (E) below.**

N/A

- E. If a new capital expenditure for instructional or research space is required, indicate where this item appears on the university's fixed capital outlay priority list. Table 2 in Appendix A includes only Instruction and Research (I&R) costs. If non-I&R costs, such as indirect costs affecting libraries and student services, are expected to increase as a result of the program, describe and estimate those expenses in narrative form below. It is expected that high enrollment programs in particular would necessitate increased costs in non-I&R activities.**

N/A

- F. Describe specialized equipment that is currently available to implement the proposed program through Year 5. Focus primarily on instructional and research requirements.**

The Department of Computer and Electrical Engineering and Computer Science, which will host the MSAI program, has a comprehensive list of equipment. In addition, the CEECS Department received two major research equipment grants recently, one for big data and another for deep learning, from National Science Foundation, to purchase new equipment, which will be available for the faculty and students in the program. There are no new requests for additional equipment and all the courses that exist or have been developed have considered the impact of additional students.

- G. Describe additional specialized equipment that will be needed to implement and/or sustain the proposed program through Year 5. Include projected costs of additional equipment in Table 2 in Appendix A.**

No additional specialized equipment is needed, as the program is modeled on existing master's degree programs in the CEECS Department.

- H. Describe any additional special categories of resources needed to implement the program through Year 5 (access to proprietary research facilities, specialized services, extended travel, etc.). Include projected costs of special resources in Table 2 in Appendix A.**

The College of Engineering and Computer Science, in particular the CEECS Department will use available resources, including facilities and services, to ensure the success of the MSAI program. There are no additional requests for this new program.

- I. Describe fellowships, scholarships, and graduate assistantships to be allocated to the proposed program through Year 5. Include the projected costs in Table 2 in Appendix A.**

Students in this program will be eligible to receive research and teaching assistantships provided that they satisfy the departmental criteria. Due to the fact that many of the students will possess knowledge and skills in AI and machine learning, which will give them advantages in completing departmental scholarships. In fact, many of our faculty have research funding but cannot find qualified students. The MSAI program will help our faculty in their research in a very constructive way. No additional funds are requested.

- J. Describe currently available sites for internship and practicum experiences, if appropriate to the program. Describe plans to seek additional sites in Years 1 through 5.**

Currently we have internship with NCCI, JM Family, Citrix, Goldman Sachs, American Express, Nexis and Lexis, Oak Ridge National Lab, Florida Power and Light, and Motorola, among others. The departments plan to seek addition sites via joint collaboration to attract local industry partners.

APPENDIX A

**TABLE 1-A
PROJECTED HEADCOUNT FROM POTENTIAL SOURCES
(Baccalaureate Degree Program)**

Source of Students (Non-duplicated headcount in any given year)*	Year 1		Year 2		Year 3		Year 4		Year 5	
	HC	FTE	HC	FTE	HC	FTE	HC	FTE	HC	FTE
Upper-level students who are transferring from other majors within the university**	0	0	0	0	0	0	0	0	0	0
Students who initially entered the university as FTIC students and who are progressing from the lower to the upper level***	0	0	0	0	0	0	0	0	0	0
Florida College System transfers to the upper level***	0	0	0	0	0	0	0	0	0	0
Transfers to the upper level from other Florida colleges and universities***	0	0	0	0	0	0	0	0	0	0
Transfers from out of state colleges and universities***	0	0	0	0	0	0	0	0	0	0
Other (Explain)***	0	0	0	0	0	0	0	0	0	0
Totals	0	0	0	0	0	0	0	0	0	0

* List projected annual headcount of students enrolled in the degree program. List projected yearly cumulative ENROLLMENTS instead of admissions.

** If numbers appear in this category, they should go DOWN in later years.

*** Do not include individuals counted in any PRIOR CATEGORY in a given COLUMN.

APPENDIX A
TABLE 1-B
PROJECTED HEADCOUNT FROM POTENTIAL SOURCES
(Graduate Degree Program)

Source of Students (Non-duplicated headcount in any given year)*	Year 1		Year 2		Year 3		Year 4		Year 5	
	HC	FTE	HC	FTE	HC	FTE	HC	FTE	HC	FTE

*Identify reallocation sources in Table 3.

**Includes recurring E&G funded costs ("reallocated base," "enrollment growth," and "new recurring") from Years 1-4 that continue into Year 5.

***Identify if non-recurring.

Faculty and Staff Summary

Total Positions	Year 1	Year 5
Faculty (person-years)	1.03	1.43
A & P (FTE)	0.05	0.05
USPS (FTE)	0.15	0.25

Calculated Cost per Student FTE

	Year 1	Year 5
Total E&G Funding	\$261,144	\$394,950
Annual Student FTE	16	30
E&G Cost per FTE	\$16,322	\$13,165

Table 2 Column Explanations

Reallocated Base* (E&G)	1	E&G funds that are already available in the university's budget and will be reallocated to support the new program. Please include these funds in the Table 3 – Anticipated reallocation of E&G funds and indicate their source.
Enrollment Growth (E&G)	2	Additional E&G funds allocated from the tuition and fees trust fund contingent on enrollment increases.

New Recurring (E&G)	3	Recurring funds appropriated by the Legislature to support implementation of the program.
New Non-Recurring (E&G)	4	Non-recurring funds appropriated by the Legislature to support implementation of the program. Please provide an explanation of the source of these funds in the budget section (section III. A.) of the proposal. These funds can include initial investments, such as infrastructure.
Contracts & Grants (C&G)	5	Contracts and grants funding available for the program.
Philanthropy Endowments	6	Funds provided through the foundation or other Direct Support Organizations (DSO) to support of the program.
Enterprise Auxiliary Funds	7	Use this column for continuing education or market rate programs and provide a rationale in section III.B. in support of the selected tuition model.
Subtotal columns 1+...+7	8	Subtotal of values included in columns 1 through 7.
Continuing Base** (E&G)	9	Includes the sum of columns 1, 2, and 3 over time.
New Enrollment Growth (E&G)	10	See explanation provided for column 2.
Other*** (E&G)	11	These are specific funds provided by the Legislature to support implementation of the program.
Contracts & Grants (C&G)	12	See explanation provided for column 5.
Philanthropy Endowments	13	See explanation provided for column 6.
Enterprise Auxiliary Funds	14	Use this column for continuing education or market rate programs and provide a rationale in section III.B. in support of the selected tuition model.
Subtotal columns 9+...+ 14	15	Subtotal of values included in columns 9 through 14.

Selected Sponsored Research Projects

1. Game Changer Tech
Title: Center for Advanced Data Analytics (Phase 1 and Phase 2)
Principal Investigator (Jan 23, 2017 – Jan 22, 2019) \$150,000
2. National Science Foundation grant
Title: MRI: Acquisition of Big Data Training and Research Laboratory
Principal Investigator (August 1, 2014 -- July 31, 2017) \$600,000
3. LexisNexis (Boca Raton, Florida grant (NSF I/UCRC)
Title: Developing Machine Learning Algorithms on HPCC/ECL Platform
Principal Investigator (April 2012 -- August 2019) \$310,000
4. National Science Foundation grant
Title: Industry/University Cooperative Research Center for Advanced Knowledge Enablement
Investigator (August 1, 2015 -- July 31, 2020) \$250,000

5. Emerson grant (NSF I/UCRC)
Title: Predictive Battery Analysis
Principal Investigator (July 2012 -- May 2013) \$40,000

6. Center of Ocean Energy and Technology grant (State of Florida)
Title: Machine Condition Monitoring
Principal Investigator (August 2009 -- December 2012) \$450,000

Synergistic Activities

1. North American Editor of Software Quality Journal (July 1995 - June 1997), and Member of the Editorial Boards of the Software Quality Journal (1992 - Present), the Empirical Software Engineering Journal (2002 - 2006), the Software Engineering and Knowledge Engineering (2009-present), Knowledge and Information Systems (2009-2012), Social Network Analysis and Mining (2010-present) and Journal of Fuzzy Systems (2004- 2012). Co-Editor-in-Chief, Journal of Big Data (2014-present)
2. Program Chair (2004 and 2011) and General Chair (2005 and 2013) of IEEE International Conference on Tools with Artificial Intelligence.
3. Program Chair (2010) and Conference Chair (2012 and 2016) of the IEEE International Conference on Machine Learning and Applications.
4. Served on Technical Program Committees of various international conferences, symposia, and workshops; organized numerous technical sessions at various conferences; served on various panels; gave tutorials at conferences; and gave numerous invited talks in industry, conferences, research centers, and universities.
5. Served on the NSF panels for SBIR and Software Engineering and Languages, and reviewed other proposals (via email or mail)

Theses and Dissertations Supervised and Completed

1. Supervised 27 PhD dissertations to completion
Currently supervising 14 PhD dissertations
Participated in several dissertations as a member of supervisory committees
2. Supervised 61 master theses to completion
Currently supervising two theses
Participated in several theses as a member of supervisory committees

Selected Professional Recognition

1. Elected Fellow of the Knowledge Systems Institute, June 2013.
2. Was awarded Sabbatical (full-pay) Leave, FAU, Fall 2012.
3. Received Excellence Graduate Mentoring (Inaugural) Award, FAU, June 2008.
4. Received Travel Grant Award, FAU, September 2006.
5. Received the College of Engineering and Computer Science Researcher of the Year Award at the level of Full Professor, March 2006.
6. Received Travel Grant Award, FAU, December 2005.
7. Received College of Engineering Dean's Faculty Award, FAU, December 2004.
8. Was awarded Sabbatical (full-pay) Leave, FAU, Fall 2004.

9. Received College of Engineering Dean's Faculty Award, FAU, December 2002.
10. Received the FAU Researcher of the Year Award at the level of Full Professor, April 2000.

Instructional Experience- Courses Taught at FAU

1. Foundations of Computer Science (undergraduate)
2. Data Structures and Algorithm Analysis (undergraduate)
3. Design and Analysis of Algorithms (undergraduate)
4. Principles of Software Engineering (undergraduate)
5. Introduction to Computer Systems Performance Evaluation (undergraduate)
6. Introduction to Data Mining and Machine Learning (undergraduate)
7. Introduction to Web and Internet Mining (undergraduate)
8. Stochastic Models for Computer Science (undergraduate)
9. Senior Seminar (undergraduate)
10. Software Engineering (graduate)
11. Computer Systems Performance Evaluation (graduate)
12. Computer Performance Modeling (graduate)
13. Software Reliability Engineering (graduate)
14. Software Engineering Measurements (graduate)
15. Software Testing (graduate)
16. Testing and Analysis of Object-Oriented Software (graduate)
17. Data Mining and Machine Learning (graduate)
18. Web Mining (graduate)
19. Advanced Data Mining and Machine Learning (graduate)
20. Big Data Analytics with Hadoop (graduate)
21. Data Mining for Bioinformatics (graduate)
22. Deep Learning

CURRICULUM VITA

Research Interests

Big data, large scale machine learning, and data mining

Real-time analytics and decision support systems

Biomedical, bioinformatics, and health information systems

Professional Experience

- August 2018: Professor, Department of Computer & Electrical Engineering and Computer Science, Florida Atlantic University, Boca Raton, FL 33431, USA

Research Grants

1. MRI: MRI: Acquisition of Artificial Intelligence & Deep Learning (AIDL) Training and Research Laboratory
Xingquan Zhu (PI)
Sponsor: National Science Foundation
Duration: 2018-2021 Amount: \$652,850 (NSF) + \$279,793 (Cost-share)
2. III: Medium: Collaborative Research: KMELIN: Knowledge Mining and Embedding Learning for Complex Dynamic Information Networks
Xingquan Zhu (PI)
Sponsor: National Science Foundation
Duration: 2018-2022 Amount: \$599,983
3. Real-Time Bidding Price Optimization
Xingquan Zhu (PI)
Sponsor: Bidtellect.com
Duration: 2016 - 2018 Amount: \$89,915.0
4. NSF I/UCRC: Machine Learning Algorithms for Uses Cases in Auto Industry
Xingquan Zhu (PI) and Borko Furht
Sponsor: National Science Foundation (FAU I/UCRC, JM Family)
Duration: 2016 - 2017 Amount: \$39,809.0
5. NSF I/UCRC: Application of Common Machine Learning Algorithms for Uses Cases in Auto Industry - Phase 2
Dingding Wang (PI), **Xingquan Zhu** (Co-PI), and Borko Furht (Co-PI)
Sponsor: National Science Foundation (FAU I/UCRC, JM Family)

Duration: 2017-2018 Amount: \$60,087

6. PFI:AIR - TT: A Clinical Predictive Model Based Smart Decision Support System for Congestive Obstructive Pulmonary Disease (COPD) related Re-hospitalization
Ankur Agarwal (PI), Andrew Duffell, Ravi Behara, and **Xingquan Zhu** (Co-PI)
Sponsor: National Science Foundation (IIP: 1444949)
Duration: 2014 - 2016 Amount: \$199,594.0
7. MRI: Acquisition of Big Data Training and Research Laboratory
Taghi Khoshgoftaar (PI), Ramesh Teegavarapu, Hari Kalva, **Xingquan Zhu** (Co-PI), and Pierre-Philippe Beaujean.
Sponsor: National Science Foundation (CNS: 1427536)
Duration: 2014-2017 Amount: \$600,000.0
8. RED-CAKE: Novel Data Mining Approaches for Knowledge Based Skill Matching for Employers (research study)
Xingquan Zhu (PI) and Borko Furht (Co-PI)
Sponsor: National Science Foundation (FAU I/UCRC, incVersity)
Duration: 2014 Amount: \$ 5,000
9. Database-centric data analysis of molecular simulations
Xingquan Zhu (PI)
Sponsor: National Institutes of Health (subcontract NIH 1R01GM086707-01A1)
Duration: 2010 - 2015 Amount: \$ 56,319
10. Comparative Pancreatic Cancer Study Using Discriminative Gene Regulatory Network
Xingquan Zhu (PI)
Sponsor: American Cancer Society Institute Research Grants (ACS-IRG)
Duration: 2009 Amount: \$ 30,000.0
11. US Army Research, Travel grant
Xingquan Zhu (PI)
Sponsor: US Army Research (W911NF-06-1-0270)
Duration: 2007 Amount: \$ 8000.0
12. ICHECK: Identifying Deception Data with Impact-Sensitive Instance Ranking
Xingquan Zhu (PI) and Xindong Wu (Co-PI)
Sponsor: NSF-EPSCoR (subcontract EPS-0236976)
Duration: 2005 Amount: \$ 25,000.0
13. Pattern Matching with Wildcards and Length Constraints
Xindong Wu (PI), Abdullah N. Arslan, and **Xingquan Zhu** (Co-PI)
Sponsor: NSF (CCF-0514819)
Duration: 2005-2008 Amount: \$ 200,000.0

Keynote Speech

- *IEEE DSC 2017 Workshop on Data Science and Web Analytics*, June 26, 2017, Shenzhen, China.
- Data Mining track of the *30th Florida Artificial Intelligence Research Society annual conference (FLAIRS-30)*, May 16-18, 2016, Key Largo, Florida, USA
- *IEEE ICDM 2014 Workshop on Scalable Data Analytics: Theory and Applications*, Dec. 14-17, 2014, Shenzhen, China.
- *The First International Conference on Data Science*, May 27-28, 2014, Beijing, China.
- *International Conference on Mobile Learning, E-Society & E-Management*, Sep. 6-7, 2011, Prague, Czech Republic.
- *The 2nd International Conference on Open Source Technologies*, Dec. 17-18, 2007, Lahore, Pakistan.

Tutorial

- *The 2nd IEEE International Conference on Data Science in Cyberspace*, June 26-29, 2017, Shenzhen, China.
 - Title: Data Science in Online Digital Advertising

Best Paper Award

- L. Chi, B. Li, and X. Zhu, Fast Graph Stream Classification Using Discriminative Clique Hashing, *Proc. Of the 17th Pacific-Asia Conference on Knowledge Discovery and Data Mining (PAKDD-2013)*, April 14-17, Brisbane, Australia. (**Best Paper Award**)
- M. Fang and X. Zhu, I Don't Know the Label: Active Learning with Blind Knowledge, *Proc. Of the 21st International Conference on Pattern Recognition (ICPR-12)*, November 11-15, 2012, Tsukuba, Japan. (**Best Student Paper Award**)
- Y. Zhang, X. Zhu, X. Wu, and J. P. Bond, ACE: An Aggressive Classifier Ensemble with Error Detection, Correction and Cleansing, *Proc. of the 17th IEEE International Conference on Tools with Artificial Intelligence (ICTAI)*, Hong Kong, November 14-16, 2005. (**Best Paper Award**)

IEEE Digital Library Most Popular Paper

- Xindong Wu, Xingquan Zhu, Gong-Qing Wu, Wei Ding: Data Mining with Big Data. *IEEE Transactions on Knowledge and Data Engineering*, 26(1): 97-107, 2014.
Ranked No. 7 across all IEEE digital library publications in December 2016
<http://ieeexplore.ieee.org/Xplore/home.jsp>

Award and Membership

- Distinguished Visiting Professor, Fudan University, 2015
- IEEE Senior Member, 2012
- Australian Research Council (ARC) Future Fellowship (Level 2), 2010

Professional Activities

Editor:

1. **Associate Editors/Editorial Board**
 - A. ACM Trans. on Knowledge Discovery from Data (TKDD), 2017 to date.
 - B. IEEE Trans. On Knowledge and Data Engineering (TKDE), 2008 – 2012, 2014 to date
 - C. International Journal of Social Network Analysis and Mining (SNAM), 2010 to date
 - D. Journal of Big Data (JBD) (2013-Date)
 - E. Network Modeling Analysis in Health Informatics and Bioinformatics (NetMAHIB)(2014-Date)
 - F. International Journal of Monitoring & Surveillance Technologies Research (IJMSTR)(2014-Date)
 - G. International Journal of Machine Intelligence and Sensory Signal Processing (2016 – Date)
 - H. Knowledge and Information Systems Journal (KAIS), 2003 – 2008.
 - I. Advances in Data Warehousing and Mining, IGI Press, Inc (USA). 2007 – 2008
2. **Guest Editor/Book Editor**
 - A. Special Issue on Data Mining Applications and Case Study, Neurocomputing, 2011
 - B. Special Issue on Data Mining Applications and Prospect, Artificial Intelligence Review, 2011
 - C. Special Issue on Data Mining, International Journal of Software and Informatics (IJSI), 2008
 - D. X. Zhu and Ian Davidson (Eds.), "Knowledge Discovery and Data Mining: Challenges and Realities", IGI Publishing, April 2007
 - E. Special Issue on Mining Low-Quality Data, J. of Knowledge and Information System (KAIS), 2007

International Conference/Workshop Co-Chair:

- (a). **Conference Co-Chair**
 1. **ICMLA 2012:** The Eleventh IEEE International Conference on Machine Learning and Applications (ICMLA 2012), Boca Raton, 2012.
- (b). **Program Committee Co-Chair**
 1. BIBE 2014: The 14th IEEE International Conference on BioInformatics and BioEngineering (BIBE-2014), Boca Raton, FL, USA, Nov. 10-12, 2014.
 2. GRC 2013: The 2013 IEEE International Conference on Granular Computing (GRC-2013), Beijing, China, Dec. 13-15, 2013.

3. **ICTAI 2011:** The 23rd IEEE International Conference on Tools with Artificial Intelligence, Boca Raton, FL, USA, Nov. 7-9, 2011.
4. **ICMLA 2010:** The Ninth IEEE International Conference on Machine Learning and Applications (ICMLA 2010), Washington DC, USA, Dec. 12-14, 2010.
- (c). **Program Vice Chair (Senior PC)**
 1. **BigData 2017:** The IEEE International Conf. on Big Data, Boston, MA, USA, Dec 11-14, 2017.
 2. **ICDM 2017:** The 17th IEEE International Conf. on Data Mining, New Orleans, USA. Nov. 18-21, 2017.
 3. **ICTAI 2017:** The 29th IEEE International Conf. on Tools with Artificial Intelligence, Boston, MA, USA, Nov. 6-Nov. 8, 2017.
 4. **ICDM 2013:** The 13th IEEE International Conf. on Data Mining, Dallas, Texas, USA, Dec. 8-11, 2013.
 5. **CIKM 2013:** The 22nd ACM International Conference on Information and Knowledge Management, Burlingame, CA, USA, Oct. 27-Nov. 1, 2013.
 6. **ICDM 2011:** The 11th IEEE Intl. Conf. on Data Mining, Vancouver, Canada, Dec. 11-14, 2011.
 7. **CIKM 2011:** The 20th ACM International Conference on Information and Knowledge Management, Glasgow, Scotland, UK, Oct. 24-28, 2011.
 8. **ICMLA 2011:** The 2011 IEEE International Conference on Machine Learning and Applications, Honolulu, Hawaii, USA, on December 18-21, 2011.
 9. **CIKM 2010:** The 19th ACM International Conference on Information and Knowledge Management, Toronto, Canada, Oct. 26-30, 2010.

International Conference Program Committee Members:

- (a) Served on the international conference program committee members (over 200 times)

Selected Publications (87 journal articles and 146 conference proceeding papers)

Book:

- **Xingquan Zhu**, Haicheng Tao, Zhiang Wu, Jie Cao, Kris Kalish, and Jeremy Kayne, *Fraud Prevention in Digital Advertising*, Springer Briefs in Computer Science, ISBN 978-3-319-56792-1, 2017.
- **X. Zhu**, R. Alhajj, T. Khoshgoftaar, and N. Bourbakis, Proceedings of the IEEE 14th International Conference on Bioinformatics and Bioengineering, Boca Raton, FL, USA, Nov. 10-12, November 2014.
- D. Tao, M. Reformat, A. Wani, T. Khoshgoftaar, and **X. Zhu**, Proceedings of the 11th International Conference on Machine Learning and Applications, volume 1, Boca Raton, FL, USA, Dec. 12-15, 2012.
- A. Wani, T. Khoshgoftaar, **X. Zhu**, and N. Seliya, Proceedings of the 11th International Conference on Machine Learning and Applications, volume 2, Boca Raton, FL, USA, Dec. 12-15, 2012.

HANQI ZHUANG, Ph.D.
Professor and Assoc. Chair

Department of Computer & Electrical Engineering and Computer Science
Florida Atlantic University, Boca Raton, FL 33431
(561) 297-3413 (O), (561) 756-5372 (C), zhuang@fau.edu

1. EDUCATIONAL BACKGROUND

- Ph.D. in Electrical Engineering, Florida Atlantic Univ., Boca Raton, FL, 1989
- M.S. in Electrical Engineering, Florida Atlantic Univ., Boca Raton, Florida, 1986
- B.S. in Electrical Engineering, Shanghai Univ., 1982.

2. EMPLOYMENT HISTORY

- 1999 - Present Prof., Dept. Comput. & Electr. Eng. & Comput. Sci., FAU
- 1994 - 1999 Assoc. Prof. Dept. Electr. Eng., FAU
- 1990 - 1994 Assist. Prof. Dept. Electr. Eng., FAU

3. INSTRUCTIONAL ACTIVITIES

- Undergraduate Courses Taught at FAU: 14 courses
- Graduate Courses Taught at FAU: 15 courses
- Ph.D. Dissertations Supervised: 14 completed.
- M.S. Theses Supervised: 19 completed.
- Number of Senior Projects Supervised: > 200 groups.

4. SCHOLARLY ACHIEVEMENTS

4.1 Publications

4.1.1 Refereed Books:

1. Bai, Y., H. Zhuang, and D. Wang, *Advanced Fuzzy Logic Technologies in Industrial Applications*, Springer, 2006.
2. Zhuang, H. and Z. S. Roth, *Camera-Aided Robot Calibration*, CRC Press, 1996.

4.1.2 Recent Refereed Journal Articles¹:

1. Ibrahim, A., H. Zhuang, L.M. Cherubin, and N. Erdol, "Automatic Classification of Grouper Species by Their Sounds using Deep Neural Networks," *J. Acoustical Society of America - EL*, in Press.
2. Ibrahim, A., L.M. Cherubin, H. Zhuang, M.T. S. Umpierre, F. Dalgleish, N. Erdol, B. Ouyang, and A. Dalgleish, "An Approach for Automatic Classification of Grouper Vocalizations with Passive Acoustic Monitoring," *J. Acoustical Society of America*, Vol. 143, No. 2, February 2018.
3. Vegad, S., H. Patel, H. Zhuang, and M. Naik, "Audio-Visual Person Recognition Using Deep Convolutional Neural Networks," (Undergraduate Student Paper), *J Biostatics and Biometrics*, Vol. 8, No. 5, Oct. 2017, pp. 1-7, 2017.
4. Muhamed-Ali A., H. Zhuang, and A. Ali, "An Approach for Facial Expression Recognition," *Int Journal of Biometrics*, Vol. 9, No. 2, pp96-112, 2017.
5. Esfahanian, M., H. Zhuang, N. Erdol, and E. Gerstein, "Two-stage Detection of North Atlantic Right Whale Upcalls using Local Binary Patterns and Machine Learning Algorithms," *J. Applied Acoustics*, Vol. 120, May 2017, pp 158-166.

¹ All the Journals listed are international journals and papers published are reviewed by anonymous reviewers

6. Esfahanian, M., H. Zhuang, and N. Erdol, "Sparse Representation for Classification of Dolphin Whistles by Type," *J. Acoustical Society of America – EL*, Vol. 136 (1), July, 2014.

Florida Atlantic University (FAU), College of Engineering & Computer Science, CEECS Department
777 Glades Road, Boca Raton, FL - 33431 USA
Phone: +1 (561) 297-3857 (office) | +1 (561) 866-7144 (mobile)(preferred)
Email: omarques@fau.edu | <http://www.eng.fau.edu/directory/faculty/marques/>

Education (selected)

- Ph.D. in Computer Engineering, Florida Atlantic University, Boca Raton, FL (USA), Aug. 2001.
- Master's in Electronic Engineering, Philips International Institute, Eindhoven (NL), May 1989.
- B.Sc. in Electrical Engineering, CEFET-PR, Curitiba-PR (Brazil), Feb. 1987.

Current and Past Positions (selected)

- Professor, College of Engineering & Computer Science, FAU (2001 – Present)
- Professor (by courtesy), College of Business, FAU (2015 – Present)
- Associate Director, NSF Industry/University Cooperative Research Center (I/U CRC) for Advanced Knowledge Enablement (CAKE), FAU (2016 – Present)
- Associate Professor, CEECS Department, FAU (2007–2014)
- Assistant Professor, Department of Computer Science and Engineering, FAU (2001–2007)

Professional Recognition, Honors, and Awards (selected)

- *Leshner Leadership Institute Public Engagement Fellow*, AAAS (American Association for the Advancement of Science) (2019-2020).
 - Engineering Educator of the Year Award, The Engineers' Council, West Palm Beach, FL (2019).
 - Excellence and Innovation in Undergraduate Teaching Award, FAU (2018, 2011 and 2004).
 - ACM Distinguished Speaker (2014 - present).
 - *Outstanding Mid-Career Teaching Award*, American Society for Engineering Education - Southeastern Section (ASEE-SE) (2011).
 - *Senior Member* of the IEEE (Institute of Electrical and Electronics Engineers) (2009 - present).
 - *Senior Member* of the ACM (Association for Computing Machinery) (2009 - present).
 - Member of Tau Beta Pi, the oldest engineering honor society, inducted as *Eminent Engineer* (2009 - present).
 - Member of Sigma Xi, the honor society of research scientists and engineers (2009 - present).
 - Member of Upsilon Pi Epsilon, the first honor society dedicated to the discipline of the computing and information disciplines (2004 - present).
 - College of Engineering and Computer Science *Dean's Faculty Award* (2004-05).
 - Member of Phi Kappa Phi, the oldest all-discipline honor society (1999 - present).
-

Membership in Professional Associations and Societies

- Senior Member, Association for Computing Machinery (ACM)
- Senior Member, Institute of Electrical and Electronics Engineers (IEEE)
- Member, American Society for Engineering Education (ASEE)
- Member, American Association for the Advancement of Science (AAAS)
- Member, Society for Imaging Informatics in Medicine (SIIM)

Languages

- *Portuguese*: native language
- *English*: fluent (speaking, reading, writing)
- *Spanish*: fluent (speaking, reading); intermediate (writing)
- *French*: intermediate (speaking, reading); basic (writing)

Public Speaking Engagements (selected, 2014 – present)

- Invited talk: “Human Augmentation”, *Technische Universität Wien*, Vienna, Austria, July 2019. (*upcoming*)
 - Invited talk: “Human Augmentation”, Center for Brains, Minds and Machines (CBMM), Massachusetts Institute of Technology (MIT), May 2019. (*upcoming*)
 - Invited talk: “Using games to solve challenging multimedia problems”, St. Pölten University of Applied Sciences, St. Pölten, Austria, December 2018.
 - Invited talk: “Medical image analysis using deep learning”, *Technische Universität Wien*, Vienna, Austria, December 2018.
 - Guest lecture: “Machine Learning and Applications”, *FH Campus Wien*, University of Applied Sciences, Vienna, Austria, December 2018.
 - Invited talk: “Medical image analysis using deep learning”, Johns Hopkins University, Baltimore, MD, November 2018.
 - Guest lecture: “Introduction to medical image analysis using deep learning”, Johns Hopkins University, Baltimore, MD, November 2018.
 - Invited talk: “Medical image analysis and medical information retrieval, with and without deep learning”, Lister Hill National Center for Biomedical Communications, National Library of Medicine (NLM), National Institutes of Health (NIH), Bethesda, MD, October 2018.
 - Invited talk: “The Artificial Intelligence revolution in Medicine: technology, risks, applications and implications”, *Université d’Orléans*, Orléans, France, September 2018.
 - Tutorial: “Deep Learning for Computer Vision Using MATLAB”, ENSEEIHT Engineering School, University of Toulouse, France, September 2018.
 - Seminar: “Machine Learning and Applications”, *Université d’Orléans*, Orléans, France, September 2018.
 - Invited talk: “Machine Learning and its applications”, Vlatacom Institute, Belgrade, Serbia, August 2018.
 - Invited talk: “Can you trust what you see? The magic of visual perception”, University of Belgrade, Serbia, August 2018.
-

- Invited talk: "Using games to solve challenging multimedia problems," Wichita State University, Wichita, KS, April 2018.
- Lecture: "Self-driving cars, robot radiologists, and more: how artificial intelligence is changing the world forever", Lifelong Learning Society (LLS), Florida Atlantic University, March 2018.
- Lecture: "Looking through the artist's eyes", Lifelong Learning Society (LLS), Florida Atlantic University, March 2018.
- Lecture: "Visual intelligence: using works of art to sharpen world perception", Lifelong Learning Society (LLS), Florida Atlantic University, December 2017.
- Tutorial: "Medical image analysis using deep learning", *IEEE 7th International Conference on Image Processing Theory, Tools and Applications (IPTA 2017)*, Montreal, Nov 28 – Dec 1, 2017.
- Keynote speech: "Using games to solve challenging multimedia problems," SBGames (*XVI Simpósio Brasileiro de Jogos e Entretenimento Digital*) 2017, Curitiba, Brazil, Nov 2-4, 2017.
- Invited talk: "Using games to solve challenging multimedia problems," U.S. Army Corps of Engineers Engineering Research and Development Center (ERDC), Vicksburg, MS, June 2017.
- Invited talk: "Can you trust what you see? The magic of visual perception", *Technische Universität Wien*, Vienna, Austria, May 2017.
- Tutorial: "Medical image analysis using deep learning", *IASTED International Conference on Biomedical Engineering*, Innsbruck, Austria, February 2017.
- Invited talk: "Machine Learning and Applications", Indian Institute of Information Technology and Management, Kerala (IIITM-K), Trivandrum, India, December 2016.
- Plenary talk: "Inspiring Actions for Successful Engineering Education", Fourth IEEE International Conference on MOOCs, Innovation and Technology in Education (MITE 2016), Madurai, India, December 2016.
- Lecture: "Face recognition by humans and computers", Lifelong Learning Society (LLS), Florida Atlantic University, November 2016.

Research Summary

Focus: *intelligent processing of visual information*, a combination of artificial intelligence, image processing, computer vision, human vision, and machine learning, with recent emphasis on medical applications.

In addition to applying artificial intelligence to image analysis and computer vision problems, my research has been inspired by the **human factors** associated with visual perception, object recognition, image retrieval, and other intelligent visual processing tasks. Consequently, I have also devoted a significant amount of effort researching the **cognitive foundations of human visual perception** and building **serious games** and other human computation solutions (e.g., crowdsourcing) to engage users in such tasks.

My research has been funded by the National Science Foundation (NSF), Office of Naval Research (ONR), and the Department of Defense (DoD), among others. Results of my research have been published in widely recognized international journals and conferences (see ***Publications***). I currently (co-)supervise 2 PhD Dissertations (one at FAU, one at *Alpen-Adria Universität Klagenfurt* (Austria)) and one Master's student (at FAU). I have previously (co-) supervised to completion 6 PhD students and 15 Master's students, in three different countries/universities.

Publications (selected, 1999 - present)

Summary: one patent, 10 books, 20+ refereed international journal publications, 70+ refereed papers in scientific conferences, and several book chapters, invited papers, and other publications. Publications reflect collaborations with different teams of authors/editors and have led to **2372 citations**, an **h-index of 25**, and an **i10-index of 44** (source: Google Scholar, last update: February 25, 2019). A complete list of publications (along with other information) can be found at my ORCID profile: <http://orcid.org/0000-0003-4321-2719>. A **partial list** follows.

Patent

- **O. Marques**, L.M. Mayron, and G.B. Borba, "System and Methods of Image Retrieval", 2011. US Patent 7,933,452.

Books

- **O. Marques** and H. Vieira Neto, "Processamento Digital de Imagens" ("Digital Image Processing") (in Portuguese), Editora Brasport, Rio de Janeiro, Brazil, 1999.
- **O. Marques** and B. Furht, "Content-Based Image and Video Retrieval", *Kluwer Academic Publishers*, Norwell, MA, 2002.
- **O. Marques**, "Practical Image and Video Processing Using MATLAB®", *Wiley-IEEE Press*, New York, NY, 2011.
- M. Lux and **O. Marques**, "Visual Information Retrieval Using Java and LIRE", *Morgan & Claypool*, 2013.
- **O. Marques**, "Practical Image and Video Processing Using MATLAB" (in Chinese), *Tsinghua University Press / John Wiley & Sons*, 2013.
- J. Gibson and **O. Marques**, "Optical Flow and Trajectory Estimation Methods", Springer, 2016.
- **O. Marques**, "Innovative Technologies in Everyday Life", Springer, 2016.
- B. Stojanović, **O. Marques** and A. Nešković, "Segmentation and separation of overlapped latent fingerprints: algorithms, techniques, and datasets", Springer, 2019 (to appear).
- **O. Marques**, "Image Processing and Computer Vision for iOS", Springer, 2019 (to appear).

Journal Papers and Magazine Articles (selected)

- **O. Marques**, L.M. Mayron, G.B. Borba, and H.R. Gamba, "An attention-driven model for grouping similar images with image retrieval applications", *EURASIP Journal on Advances in Signal Processing*, Special Issue on Image Perception, Vol. 2007, Article ID 43450, 17 pages, 2007.
 - D. Culibrk, **O. Marques**, D. Socek, H. Kalva, and B. Furht, "Neural Network Approach to Background Modeling for Video Object Segmentation", *IEEE Transactions on Neural Networks*, Vol. 18, No. 6, pp. 1614-1627, November 2007.
 - D. Socek, S.S. Magliveras, D. Culibrk, **O. Marques**, H. Kalva and B. Furht, "Digital Video Encryption Algorithms Based on Correlation-Preserving Permutations", *EURASIP Journal on Information Security*, Volume 2007, Article ID 52965, 15 pages, DOI:10.1155/2007/52965.
 - M. Lux, **O. Marques**, K. Schöffmann, L. Böszörményi, G. Lajtai, "A Novel Tool for Summarization of Arthroscopic Videos", *Multimedia Tools and Applications*, 2009, DOI: 10.1007/s11042-009-0353-1.
 - K. Schöffmann, F. Hopfgartner, **O. Marques**, L. Böszörményi, and J.M. Jose, "A Review on Video Browsing Interfaces and Applications", *SPIE Reviews* 1, 018004 (2010), DOI: 10.1117/6.0000005.
-

- **O. Marques**, E. Barenholtz, and V. Charvillat, "Context modeling in computer vision: techniques, implications, and applications", *Multimedia Tools and Applications*, 2010, DOI: 10.1007/s11042-010-0631-y.
- A. Marcus and **O. Marques**, "An Eye on Visual Sensor Networks", *IEEE Potentials*, April 2012, 31(2), 38-43, DOI: 10.1109/MPOT.2011.2178279.
- S. Chatzichristofis, C. Iakovidou, Y. Boutalis, and **O. Marques**, "Co.Vi.Wo.: Color Visual Words Based on Nonpredefined Size Codebooks", *IEEE Transactions on Systems, Man, and Cybernetics. Part B, Cybernetics*, July 2012, DOI: 10.1109/TSMCB.2012.2203300
- A. Carlier, A. Salvador, X. Giro-i-Nieto, V. Charvillat, and **O. Marques**, "Assessment of Crowdsourcing and Gamification Loss in User-Assisted Object Segmentation". *Multimedia Tools and Applications*, September 2015, DOI: 10.1007/s11042-015-2897-6.
- J. Gibson and **O. Marques**, "Sparsity in Optical Flow and Trajectories", *Signal, Image and Video Processing*, March 2016, Volume 10, Issue 3, pp 487-494.
- B. Stojanović, **O. Marques** and A. Nešković, "Latent overlapped fingerprint separation: a review". *Multimedia Tools and Applications* (2016). DOI:10.1007/s11042-016-3908-y
- M. Taschwer and **O. Marques**, "Automatic Separation of Compound Figures in Scientific Articles". *Multimedia Tools and Applications* (2016). DOI: 10.1007/s11042-016-4237-x
- **O. Marques**, "Visual Information Retrieval: the state of the art", *IEEE IT Professional*, vol. 18, no. 4, pp. 7-9, July-Aug. 2016. doi: 10.1109/MITP.2016.70 (*invited paper*)
- C. Lager, M. Lux, and **O. Marques**. "What Makes People Watch Online Videos: An Exploratory Study". *ACM Comput. Entertain.* 15, 2, Article 6 (2017) <https://doi.org/10.1145/3034706>.
- J. Burdick, **O. Marques**, J. Weinthal, and B. Furht, "Rethinking Skin Lesion Segmentation in a Convolutional Classifier", *Journal of Digital Imaging* (2017) <https://doi.org/10.1007/s10278-017-0026-y>
- B. Stojanović, **O. Marques**, and A. Nešković, "Deep learning-based approach to latent overlapped fingerprints mask segmentation", *IET Image Processing Journal* (2018). DOI: 10.1049/iet-ipr.2017.1227

Conference Proceedings (selected)

- J. Gibson and **O. Marques**, "Stereo Depth with a Unified Architecture GPU", Workshop on "Computer Vision on GPUs", co-located with IEEE Computer Society Conference on Computer Vision and Pattern Recognition (CVPR) 2008, June 24-26, 2008, Anchorage, Alaska.
 - A. Romero Lopez, X. Giro-i-Nieto, J. Burdick, and **O. Marques**, "Skin lesion classification from dermoscopic images using deep learning techniques", *LASTED International Conference on Biomedical Engineering*, Innsbruck, Austria, February 2017. DOI: 10.2316/P.2017.852-053
 - A. Ishay and **O. Marques**, "ImageCLEF 2018 Tuberculosis Task: Ensemble of 3D CNNs with Multiple Inputs for Tuberculosis Type Classification", Conference and Labs of the Evaluation Forum (CLEF) 2018, Avignon, France, September 2018.
 - M. Lungren, L.S. Folio, H.M. Do, **O. Marques**, S. Antani, and L.R. Folio, "Proposed Launchpad of Publicly Available Diagnostic Imaging Databases," *SIIM Annual Meeting*, Denver, CO, June 2019. (*accepted*)
 - F. Farhadi, J. Dakai, L.B. Machado, J. Yao, G. Cohen, Z. Xu, H.M. Do, **O. Marques**, and L.R. Folio, "Optimal radiologist annotations for accelerating deep learning training," *SIIM Annual Meeting*, Denver, CO, June 2019. (*accepted*)

Dingding Wang

Department of Computer & Electrical Engineering and Computer Science
Florida Atlantic University
777 Glades Road, EE96/Rm 510, Boca Raton, FL 33431
Email: wangd@fau.edu Phone: 1+(954) 644-0561
Webpage: <http://faculty.eng.fau.edu/wangd/>

Research Interest

My primary research interests are in data mining and big data analytics, information retrieval, and machine learning studying both algorithmic and application issues.

Education

Ph.D. Computer Science, Florida International University, Dec. 2010
B.S. Computer Science, University of Science and Technology of China, Jul. 2003

Research Experience

Assistant Professor, Florida Atlantic University, Boca Raton, FL, August 2014–Present
Research Intern, NEC Laboratories America, Inc., Cupertino, CA, Summer 2007, 2008, 2009

Teaching

COP 3540 Introduction to Database Structures

COP 4703 Applied Database Systems

CAP 6776 Information Retrieval

CAP 6930 Natural Language Processing

Graduate Students

Ph.D Advisor of Sahar Sohangir (since Spring 2015), Feng Liu (since Fall 2016).

Services

Program Co-Chair of the 18th International Conference on Machine Learning and Applications (ICMLA 2019); Poster and Demo Chair of 14th IEEE International Conference on Machine Learning and Applications (ICMLA 2015); Program Co-Chair of Web Information Systems and Engineering (WISE 2015); Local Arrangement Chair of IEEE 14th International Conference on Bioinformatics and Bioengineering (BIBE 2014); Registration Chair of The 12th International Society for Music Information Retrieval Conference (ISMIR 2011).

Program committee of AAAI 2019, the International Joint Conference on Artificial Intelligence (IJCAI 2017), the 23rd ACM SIGKDD International Conference on Knowledge Discovery and Data Mining (KDD 2017), the 16th International Conference on Machine Learning and Applications. (ICMLA 2017), IEEE International Conference on Semantic Computing (ICSC 2015), ACM 21st Conference on Information and Knowledge Management (CIKM 2012), Conference on Empirical Methods in Natural Language Processing (EMNLP 2010), the 10th International Conference on Machine Learning and Applications. (ICMLA 2011).

Journal Reviewer for Decision Support Systems, Knowledge and Information Systems, IEEE Transactions on Knowledge and Data Engineering, ACM Transactions on Intelligent Systems and Technology, International Journal of Intelligent Systems Technologies and Applications, International Journal of Machine Learning and Cybernetics, Computational Intelligence, Central European Journal of Computer Science, Theory of Computer Science.

Patents

Multi-Document Summarization Utilizing Document Clustering. US Patent Issued #8,402,369. March 19, 2013.

Research Faculty Fellow, Institute for Sensing and Embedded Network Systems Engineering, Florida Atlantic University	08/2016–present

EDUCATION

Ph.D. in Electrical Engineering, University of Rhode Island, USA Dissertation: “ <i>A Computational Intelligence Framework for Smart Grid</i> ” Advisor: Prof. Haibo He (Department Chair & Robert Haas Endowed Chair Professor)	08/2016
M.S. in Electrical Engineering and Automation, Hohai University, China Thesis: “ <i>Coordinated Optimal Control of Power System with Wind Farm</i> ”	06/2011
B.Eng. in Electrical Engineering and Automation, Hohai University, China	06/2008

TEACHING

-
1. EEL-6935: “Smart Grid,” at FAU, Fall 2017, Fall 2018.
 2. EEL-4216: “Electric Power Systems,” at FAU, Spring 2017, Spring 2018.
 3. EEL-5613: “Modern Control,” at FAU, Summer 2019 (plan).
 4. Spring 2012: TA of URI ELE-202 “Digital Circuit Design Lab.”
 5. Fall 2011: TA of URI ELE-215 “Linear Circuits Laboratory.”

ACADEMIC AWARDS

IEEE PESGM Best Conference Paper in Stability Control and Protection	2017
URI Steve Bouley and Rhonda Wilson Graduate Fellowship	2016
IEEE Transactions on Smart Grid Best Reviewer	2015
IEEE PESGM Graduate Student Poster Contest Winner, Second Prize	2015
Chinese Government Award for Outstanding Students Abroad	2015
IEEE International Conference on Communications (ICC) Best Paper Award	2014

PUBLICATIONS (SELECTED)

Peer-Reviewed Journal Papers. Underlines indicate the students under supervision.

INVITED TALKS AND LECTURES (SELECTED)

-
1. "Big Data in Smart Grid: Opportunities and Challenges for Machine Intelligence," Florida Power & Light (FPL) Company, Juno Beach, FL, Nov. 2018.
 2. "Resilient Power and Energy Systems," College of Engineering & Computing, Florida International University, Miami, FL, Oct. 2018.
 3. "Proactive Defense Against Cyber-Physical Smart Grid Attacks," Florida Center for Cybersecurity Annual Conference, Tampa, FL, April, 2018.
 4. "Towards an Adaptive Learning Framework for Smart, Secure and Efficient Connected Autonomy," Lockheed Martin, Orlando, FL, April, 2018.

RESEARCH GRANT AND CONTRACTS

1. PI: "Optimized Integration of Hydrokinetic Energy for Remote, Networked, and Resilient Microgrids," Walter and Lalita Janke Innovations in Sustainability Science Research Fund, Co-PI: James VanZwieten (FAU), 11/01/2017-04/30/2019, Award: \$ 50,000.
2. PI: "Proactive Defense Against Cyber-Physical Smart Grid Attacks," Florida Center for Cybersecurity (FC2), Co-PI: Zhuo Lu (USF), 07/01/2017-12/30/2018, Award: \$ 50,000.
3. Co-PI: "Collaborative Research: Design and Control of Networked Offshore Hydrokinetic Power-Plants with Energy Storage," National Science Foundation (NSF), PI: James VanZwieten (FAU), Grant No. ECCS-1809164, 08/15/2018-07/31/2021, Award: \$ 103,085.
4. Co-PI: "SeeGan: Deep Learning-Aided Human Attention Modeling for Robots Learning," I-SENSE, PI: Elan Barenholtz (FAU), 05/01/2018-04/30/2019, Award: \$ 26,000.
5. Senior Personnel: "MRI: Acquisition of Artificial Intelligence & Deep Learning (AIDL) Training and Research Laboratory," National Science Foundation (NSF), PI: Xingquan Zhu (FAU), Grant No. CNS-1828181, 10/01/2018-09/30/2021, Award: \$ 652,850.
6. Senior Personnel: "REU Site: Removing Barriers to Ocean Current Based Electricity Production through Undergraduate Research," National Science Foundation (NSF), PI: James VanZwieten (FAU), Grant No. EEC-1659468, 03/15/2017-02/29/2020, Award: \$ 400,000.
7. Senior Personnel: "REU Site: Sensing and Smart Systems," National Science Foundation (NSF), PI: Jason Hallstrom (FAU), Grant No. CNS-1659484, 01/01/2017-12/31/2019, Award: \$ 339,984.

LEADERSHIP, OUTREACH AND SERVICE

Leadership: I have established concrete local and international collaborations with researchers from world-class research institutions. In the US, these collaborations include University of Rhode Island (URI), Texas A&M University (TAMU), Mississippi State University (MSU), Auburn University, and the Florida Center for Cyber Security (FC2) at the University of South Florida (USF). In China, I have established collaborations with researchers from Wuhan University, Huazhong University of Science and Technology, and Tianjin University. These ties are employed to (1) secure research data and collaboratively extract high priority research problems/topics, (2) generate fundable research proposals with high impact, and (3) contribute to science and technology by means of publications and development of technologies and capabilities.

Outreach and Supervisory: I demonstrate strong commitment to equity, diversity, and inclusion by attracting, supporting, and supervising minority students, women, undergraduates, and K-12 students. To date, I have trained (including currently training) a total of 14 students: 4 Ph.D., 3 Master's, 5 undergraduates, and 2 high school interns.

Since 2016, I have been empowering hands-on Cyber-Physical Systems curriculum development by preparing and introducing several new graduate and undergraduate courses at FAU. These include, but are not limited to, a graduate course "Smart Grid" for big data analysis in smart power grid with cyber-infrastructure, and an undergraduate course "Electric Power Systems" with renewable energy focus, respectively. I have also committed to bringing broader impact for my research, examples include representative of I-SENSE for "2017 Science Center Engineer It Competition and Family Day" at the South Florida Science Center and Aquarium, and the leading faculty (co-Director) for "2018 Middle School Summer Engineering Technology Program, Summer Camp: Building Smart Cities" at the FAU College of Engineering & Computer Science.

Service and Committee Experience: I currently serve as reviewer on various top-tier journals, such as IEEE Journal of Oceanic Engineering, IEEE Transactions on Smart Grid, IEEE Transactions on Big Data, IEEE Transactions on Neural Networks and Learning Systems, and IEEE/CAA Journal of Automatica Sinica. I also serve as program committee on many top conferences, such as AAAI Conference on Artificial Intelligence, International Joint Conference on Neural Networks, and IEEE Power and Energy Society General Meeting.

EDUCATION

Ph.D., Computer Science Sep 2009 - May 2013
Brown University, Providence, RI.
Thesis: "*Error Tolerant Cryptography*"
Advisor: Anna Lysyanskaya

Sc.M., Computer Science Sep 2007 - May 2009
Brown University, Providence, RI.

B.S., Electrical Engineering Sep 2001- Jun 2005
National Taiwan University, Taipei, Taiwan.
Minor: Mathematics

RESEARCH INTERESTS

I am interested in information security and cryptography to tackle security challenges in various scenarios of cloud computing. I have studied and developed new techniques for different security tasks, such as: how to compute on encrypted data, how to verify computation in outsourced environments, and how to protect memory/computation under physical attacks.

APPOINTMENTS

Assistant Professor, *Florida Atlantic University* May 2015 - Current

Postdoctoral Research Associate, *Maryland Cybersecurity Center at University of Maryland*
July 2013 - May 2015

- Hosted by Prof. Jonathan Katz, Prof. Elaine Shi and Prof. Dana Dachman-Soled

Research Assistant, *Dept. of Computer Science, Brown U., RI.* Sep 2009 - May 2013

- Worked with Prof. Anna Lysyanskaya

Summer Intern, *Microsoft Research, Redmond, WA* Jun 2012 - Aug 2012

- Worked with Dr. Melissa Chase and Dr. Nishanth Chandran in the Crypto Group
- Investigated different applications of re-encryption, relaxations of obfuscation, and lattice-based constructions

Research Assistant, *IIS, Academia Sinica, Taiwan.* Dec 2006 - Jun 2007

- Worked with Prof. Bo-Yin Yang
- Implemented several multivariate cryptographic systems, in Java and C++

- Investigated a new stream cipher QUAD, and made generalizations and improvements

Second Lieutenant, Chung Cheng Armed Forces Preparatory School, Taiwan.

Jul 2005 - Oct 2006

- Oversaw over 80 senior high school students, teaching both discipline and academic studies
- Advised as a math teaching assistant that increased average math scores and admission rates of all senior students by 15%, from 75% to 90%

ADVISING

- Linir Zamir MS towards PHD, Fall 2017 - current
- Qiqi Lai Visiting Scholar, May 2018 - current
- Zhedong Wang Visiting PHD student (Co-Advice), Sep 2017 - current
- Deepthi Chigurupalli MS, graduated Fall 2017
- Chengbo Xu Visiting Scholar, Dec 2016 - Dec 2017

FUNDING

NSF CRII: SaTC: Practical Cryptographic Coding Schemes Against Memory Attacks. PI (175,000).

HONORS

Selected as U.S. delegate to Heidelberg Laureate Forum via ORAU	Aug 2015
Best Student Paper Award of Theoretical Cryptography Conference (TCC) 2010	Feb 2010
Outstanding Mandatory Military Officer Award, Taiwan, ROC	Oct 2006
Bronze Medal, ranked 4 in Taiwan, Asian Pacific Mathematics Olympiad (APMO)	Nov 2001
2nd prize, ranked 4 ~ 10 in Taiwan, National Mathematics Contest, Taiwan	Jan 2001

INVITED RESEARCH LECTURES

Improved Identity-based Encryption from Lattices.

- Chongqing University Dec 2017
- Tsinghua University Dec 2016

Constant-Round MPC with Fairness and Guarantee of Output Delivery.

- Florida Atlantic University (CCIS Seminar) Sep 2015
- Crypto, Santa Barbara, USA Aug 2015

Computation in the Presence of Leakage.

- United States Naval Academy Dec 2014
- Virginia Commonwealth University Nov 2014

Locally Decodable and Updatable Non-Malleable Codes and Their Applications.

- University of Athens, Greece July 2014

Multi-input Functional Encryption.

- Eurocrypt, Denmark May 2014

Public-Key Cryptography from New Multivariate Quadratic Assumptions.

- Microsoft Research - Redmond Jun 2012
- Public Key Cryptography, Darmstadt, Germany May 2012

Delegation in the Cloud.

- Brown Industrial Partners Program Symposium Feb 2012

Tamper and Leakage Resilience in the Split-State Model.

- Crypto, Santa Barbara, USA Aug 2012
- NYU Theory Seminar Nov 2011
- IBM TJ Watson Crypto Seminar Nov 2011

Efficient String-Commitment from Weak Bit-Commitment.

- *Asiacrypt, Singapore* *Dec 2010*
- Algorithmic Tamper-Proof Security Under Probing Attacks.***
- *Security and Cryptography for Networks (SCN), Italy* *Sep 2010*
- Fully Homomorphic Encryption Using Ideal Lattices.***
- *Seminar in Academia Sinica, Taiwan* *July 2009*

TEACHING

- Instructor, CEECS Department, Florida Atlantic University, FL***
- COT 6930/6446: Randomized Algorithms and Secure Designs
 - COT 6200: Philosophy of Computation
 - STA 4821: Stochastic Models in CS
 - COT 4420: Formal Languages and Automata Theory
 - COP 3530: Data Structures and Algorithm Analysis
 - COP 2200: Introduction to Programming in C

OTHER SELECTED ACTIVITIES

Program Committee Member

- PKC 2019, Asiacrypt 2017, Asiacrypt 2016, AsiaPKC 2016, PKC 2016, International Workshop on Security in Cloud Computing (Asiaccs-SCC 2014), Information Security Conference (ISC 2014)

Volunteer at Brown Ballroom Competitions, Brown Ballroom Dance Team *Nov 2011 & 2012*

- Processed registration data for the scrutineering system

Moderator at Strait Talk Symposium, Watson Institute, Brown U., RI. *Oct 2012*

- Moderated a discussion panel in the symposium about the topic: "Cyber-security and US-China-Taiwan Relations"

Theory Lunch Organizer, Dept. of Computer Science, Brown U., RI. *Sep 2009 - Dec 2009*

- Voluntarily organized a weekly event theory lunch for the theory group

External Reviewer

- Crypto, Eurocrypt, TCC, PKC, STOC, FOCS, ICALP (multiple years).

Thesis Committee

- Andrew Steinberg (MS, FAU)

KwangSoo Yang

Affiliation: Florida Atlantic University,
Department of Computer & Electrical Engineering and Computer Science
Mailing Address: 777 Glades Road, EE 428, Boca Raton, FL 33431-0991
Email: yangk@fau.edu
Telephone: 561-297-1205

Research Interests: Spatial Database, Spatial Data Mining, Transportation Science

Education

Yonsei University (South Korea)	Electricity Engineering	B.S.	1998
University of Minnesota	Computer Science	M.S.	2010
University of Minnesota	Computer Science	Ph.D.	2015

Sponsored Research

- **NSF OAC CAREER:** Spatial Network Database approach for Emergency Management Information Systems (Mar. 2019 - Feb. 2024, National Science Foundation)
- Development of a Traffic Map Evaluation Tool for TMC Applications (\$243,706); Feb. 2017 – Dec. 2018, Florida Department of Transportation, (Co-PI with PI Dr. Stevanovic, FAU)

Professional Experience

- Assistant Professor, Florida Atlantic University, Boca Raton, FL. 2015-present
- Software Engineer, LG-CNS, Seoul, Korea (<http://www.lgcns.com>), 2001–2008

Publications (in chronological order)

Peer-reviewed journal articles

1. Kwang Woo Nam, Wei Ding, KwangSoo Yang, "Measuring similarity between geo-tagged videos using largest common view", Electronics Letters, IET (2019).
2. KwangSoo Yang, Apurv Shekhar, Dev Oliver, Shashi Shekhar, "Capacity-Constrained Network-Voronoi Diagram", IEEE Transactions on Knowledge & Data Engineering, 27(11):2919-2932 (2015)
3. KwangSoo Yang, Apurv Shekhar, Faizan Ur Rehman, Hatim Lahza, Saleh Basalamah, Shashi Shekhar, Imtiaz Ahmed, Arif Ghafoor, "Intelligent Shelter Allotment for Emergency Evacuation Planning: A Case Study of Makkah", IEEE Intelligent Systems, 30(5): 66-76 (2015)
4. Venkata Gunturi, Shashi Shekhar, KwangSoo Yang, "A Critical-time-point Approach to All-departure-time Lagrangian Shortest Paths", IEEE Transactions on Knowledge & Data Engineering, 27(10): 2591 - 2603 (2015)
5. KwangSoo Yang, Michael R. Evans, Venkata M.V. Gunturi, James M. Kang, Shashi Shekhar, "Lagrangian Approaches to Storage of Spatio-temporal Network Datasets," IEEE Transactions on Knowledge & Data Engineering, 26(9): 2222-2236 (2014)

Abstracts

1. KwangSoo Yang, Apurv Hirsh Shekhar, Dev Oliver, Shashi Shekhar: Capacity-Constrained Network-Voronoi Diagram (Extended Abstract), IEEE 32nd International Conference on Data Engineering (ICDE), ISBN: 978-1-5090-2020-1 (2016)
2. KwangSoo Yang et al., Capacity-Constrained Network-Voronoi Diagram: An Extended Abstract, Proceedings of the 12th International Conference on GeoComputation (2013)

Technical Reports

1. KwangSoo Yang, Faizan Ur Rehman, Hatim Lahza, Saleh Basalamah, Shashi Shekhar, Arif Ghafoor, "Intelligent Shelter Allotment for Emergency Evacuation Planning: A Case Study of Makkah", HajjCore tech. report P1104-T1 (2012)

Patents

1. Shortest Travel Path Determination Using Critical Start Time Points, Publication number: US20140058674 A1, Publication type: Application, Application number US 13/974,777, Publication date: Feb 27, 2014, Inventors: Shashi Shekhar, Venkata Maruti Viswanath Gunturi, KwangSoo Yang
2. Conveyance planning using dartboard network, Publication number: WO2013172959 A2, Publication type: Application, Application number PCT/US2013/031478, Publication date: Nov 21, 2013, Inventors: Shashi Shekhar, KwangSoo Yang, Venkata Maruti Viswanath Gunturi

Teaching

- COP 3540 Introduction to Database Structures
- COP 6731 Theory and Implementation of Database Systems
- COP 6726 New Directions in Database

Synergistic Activities

- TPC member for GraphSM 2017
- PC member for ACM SIGSPATIAL 2016
- Editorial Board Member of Korea Spatial Information Society

Awards and Honors

- NSF Career Award 2019
- Doctor Dissertation Fellow, The University of Minnesota Doctoral Dissertation Fellowship.
- Received a "Thank a Teacher" note from students (UMN Center for Teaching&Learning)
- Distinguished Service Award, Leader of IT Research Division, (LG-CNS) Dec. 2002

Dimitris A. Pados

Office: Engineering East 325, Florida Atlantic University, 777 Glades Rd, Boca Raton, FL 33431-0991; Tel.: (561) 297-2988;
E-mail: dpados@fau.edu

Home: 6094 Via Crystalle, Delray Beach, FL 33484-6495; Cell.: (716) 465-4880

Date: March 5, 2019

Technical Areas of Specialization

Machine learning and adaptive signal processing; data analytics; communications theory and systems. Applications to connected autonomous systems; data conformity evaluation; feature extraction from faulty data; L_1 -norm principal-component analysis; digital data embedding and hiding; cognitive software-defined radios and networks; autonomous secure wireless communications; underwater communications; mmWave and THz communications.

Employment History (1990 - present)

- Aug.'17–present *Charles E. Schmidt Eminent Chair Professor* (June 2018-present); *I-SENSE Fellow*; *Director, Center for Connected Assured Autonomy*, Dept. of Computer and Electrical Eng. & Computer Science, Florida Atlantic University, Boca Raton, FL. Courses developed and taught: EEL 6935 (graduate) Smart Antennas, EEL 6532 (graduate) Information Theory.
- Aug.'97–Aug.'17 *Clifford C. Furnas Chair Professor* (2014-Aug. 2017); *Dept. Chair of Electrical Engineering* (appointed June 2017); *Professor* (2007-2014); *Dept. Associate Chair of Electrical Eng.* (2009-2010); *Associate Professor* (2002-2007); *Assistant Professor* (1997-2002), Department of Electrical Engineering, University at Buffalo, State University of New York, Buffalo, NY. Courses developed and taught: EE 634 (graduate) Principles of Information Theory and Coding, EE 614 (graduate) Smart Antennas for Wireless Communications, EE 484 (senior) Communication Systems 2. Other courses taught: EE 203 (sophomore) Circuit Analysis 2.
- May'97–July'97 *Summer Research Faculty*, Air Force Research Laboratory, Surveillance Division, Rome, NY. Research on adaptive airborne array radar and space-time adaptive processing.
- Aug.'94–Aug.'97 *Assistant Professor*, Department of Electrical and Computer Engineering and Center for Telecommunications Studies, University of Louisiana, Lafayette, LA. Courses developed and taught: Signals and Systems (senior), Digital Logic Design (junior). Other courses taught: Probability Theory (graduate), Introduction to Computer Engineering (freshman).
- Sept.'90 –Aug.'94 *Research Assistant*, Communications Systems Laboratory, Dept. of Electrical Eng., University of Virginia, Charlottesville, VA; *Teaching Assistant* (1992), Dept. of Computer Science and Dept. of Electrical Engineering, University of Virginia, Charlottesville, VA.

Education

- Ph.D. Electrical Engineering, *University of Virginia*, August 1994.
Major area of concentration: *Communications*.
Minor areas of concentration: *Mathematics, Computer Science (Data Networks)*.
Dissertation: "On Neural Classification and Decentralized Hypothesis Testing."
- Diploma Computer Engineering and Science (5-year), *Univ. of Patras*, Greece, Oct. 1989.

Publications

Journal Publications: Sixty-two (62) predominantly *IEEE* journal papers

Select recent journal papers:

Research Grants

Summary: Total dollar value **\$12,406,580**; own share of expenditures **\$4,481,868**.

Select recent research grants:

- [1] PI/PD (%effort: 50%), “All-spectrum Interference-avoiding Communications: Theory and Software-defined-radio Implementations,” *Air Force Research Laboratory*, Mar. 1, 2019 – Sept. 30, 2019, \$25,000. Administrative Unit: FAU Division of Research.
- [2] Co-PI/PD (%effort: 50%), “Toward Mobile Quantum Links,” *Harris Corporation*, Jan. 1, 2019 – Dec. 31, 2019, \$50,000. Administrative Unit: FAU Division of Research.
- [3] PI/PD (%effort: 50%), “Autonomous Interference Avoiding Networking on the Mxxx GE Platform,” *GE Aviation; Advanced and Special Projects Division*, Nov. 1, 2018 – Aug. 31, 2019, \$225,000. Administrative Unit: FAU Division of Research, Acc. # TAG006803.
- [4] Co-PI/PD (%effort: 20%), “MRI: Acquisition of Artificial Intelligence & Deep Learning (AIDL) Training and Research Laboratory,” *National Science Foundation*, Division of Computer and Network Systems, Proposal No. CNS-1828181, Sept. 1, 2018 – Aug. 31, 2021, \$652,850. PI/PD: Xingquan Zhu, Assist. Prof. CEECS, Florida Atlantic Univ., Boca

Raton, FL. Administrative Unit: FAU Division of Research.

- [5] Co-PI/PD (%effort: 33%), “I-Corps Sites: Type I - Florida Atlantic University I-Corps Site for Advancing Entrepreneurship and Innovation,” *National Science Foundation*, Division of Industrial Innovation and Partnerships, Proposal No. IIP-1829243, Oct. 1, 2018 – Sept. 30, 2021, \$254,997. PI/PD: Ken Dawson-Scully, Assoc. Prof. Dept. of Biology, Florida Atlantic Univ., Boca Raton, FL. Administrative Unit: FAU Division of Research.
- [6] Co-PI/PD (%effort: 50%), “Cognitive Networking of the Oceans: Localization and Tracking Fundamentals,” *National Science Foundation*, Division of Computer and Network Systems, Award No. CNS-1704813, Sept. 1, 2017 – Aug. 31, 2020, \$500,000; PI/PD S. N. Batalama, Prof. and Dean College of Eng. and Comp. Sc., Florida Atlantic University. Administrative Unit: FAU Division of Research, Acc. # TAG005579.
- [7] Co-PI/PD (%effort: 20%), “CRI: II-New: TeraNova: An Integrated Testbed for True Terahertz Communications,” *National Science Foundation*, July 1, 2017 – Dec. 31, 2018, \$749,979. PI/PD: J. Jornet, Assist. Prof. EE, Univ. at Buffalo, SUNY. Administrative Unit: Research Foundation of SUNY.
- [8] Co-PI/PD (%effort: 25%), “II-New: X60: A Cross-Layer Reconfigurable Multi-Gigabit WLAN Testbed at 60 GHz,” *National Science Foundation*, Division of Computer and Network Systems, Award No. CNS-1629929, Sept. 1, 2016 – Aug. 31, 2018, \$629,000. PI/PD: D. Koutsonikolas, Assist. Prof. CSE, Univ. at Buffalo, SUNY. Administrative Unit: Research Foundation of SUNY.

Honors, Awards, Recognitions

- 2019 Best Paper Finalist: *IEEE Intern. Workshop on Antenna Tech. (iWAT)*, Miami, FL, March 2019, w/ K. Tountas and G. N. Sklivanitis.
- 2016 Best Paper Selection: *IEEE Intern. Conf. on Multimedia Big Data (IEEE BigMM)*, Taipei, Taiwan, April 2016, w/ Ying Liu and Chia-Hung Yeh.
- 2015 **ResearchGate**: Your research is in the spotlight. “... you were the most downloaded researcher from your department [SUNY-Buffalo EE] last week” (each week since beginning of RG data (7/2015) until end of download reporting (11/2015).)
- 2014 Best of **IEEE GLOBECOM** - Top 50 Papers Special Presentation (2171 submissions);, Austin, TX, December 2014, w/ Lili Wei, Rose Q. Hu, and Geng Wu.
- 2014 **Nutaq** Software-Defined Radio Academic US National Contest Grand Winner (w/ Georgios Sklivanitis, Ph.D. student, EE Dept., UB; prize \$16,000).
- 2013 The **ISWCS** (International Symposium on Wireless Communication Systems) Best Paper Award in Physical Layer Communications and Signal Processing, Ilmenau, Germany, August 2013, w/ P. P. Markopoulos and G. N. Karystinos.
- 2011 University at Buffalo Exceptional Scholar - Sustained Achievement Award. “This award was created to recognize an unprecedented accomplishment in a senior scholar’s career, distinguishing a body of work of enduring importance that has gone beyond the norm in a particular field of study.”

Honors, Awards, Recognitions (cntd)

- 2010 IEEE ICC (International Conf. on Communications) Best Paper Award in Signal Proc. for Communications, Cape Town, South Africa, May 2010, w/ W. Su, F. Chen, and J. D. Matyjas.
- 2009 SUNY Chancellor's Award for Excellence in Teaching. *"The Chancellor's Awards for Excellence are System-level honors conferred to acknowledge and provide system-wide recognition of and tribute to these individuals' expertise, dedication, and commitment. Award recipients personify professional excellence and serve as role models for the State University of New York community – 'To Learn, to Search, to Serve.' "*
- 2005 Web of Science Highly Cited Article (New bounds on the total squared correlation and optimum design of DS-CDMA binary signature sets), " ... in the top 1% within its field according to Essential Science IndicatorsSM. Your work is highly influential, and is making a significant impact among your colleagues in your field of study. "
- 2003 IEEE Transactions on Neural Networks Outstanding Paper Award (papers published in 2000 and 2001 w/ G. N. Karystinos.
- 2001 IEEE ICT (International Conf. on Telecomm.) Best Paper Award, Bucharest, Romania, June 2001 w/ G. N. Karystinos.

Professional Activities in 2018-2019

- Keynote Speaker, BLUEMED European Union Interreg MED Programme, International Scientific Conference in Management of Accessible Underwater Cultural and Natural Heritage Sites, "Dive in Blue," Athens, Greece, October 16 – 18, 2019.
- Organizer IEEE INFOCOM 2019 "Wireless Communications and Networking in Extreme Environments (WCNEE) Workshop," Paris, France, April 29 – May 2, 2019.
- Technical Program Committee, SPIE Defense + Commercial Sensing Symposium, Big Data: Learning, Analytics, Baltimore, MD, April 14-18, 2019.
- Technical Program Chair, Symposium on Tensor Methods for Signal Processing and Machine Learning, IEEE GlobalSIP 2018, Anaheim, CA, Nov. 26-28, 2018.
- Organizer, Special Session "Signal Processing and Communications for Resilient Autonomous Systems," Tenth IEEE Sensor Array and Multichannel Signal Processing (SAM) Workshop, Sheffield, UK, July 8-11, 2018.
- Organizer, Special Session "L1-norm array data processing," 52nd Annual Asilomar Conference on Signals, Systems, and Computers, Oct. 28-31, 2018.
- Technical Program Committee, SPIE Defense + Commercial Sensing Symposium, Compressive Sensing VII: From Diverse Modalities to Big Data Analytics, Orlando, FL, April 18-19, 2018.
- Organizer IEEE INFOCOM 2018 "Wireless Communications and Networking in Extreme Environments (WCNEE) Workshop," Honolulu, HI, April 16-19, 2018.

ELIAS BOU-HARB, Assistant Professor at FAU

Cyber Security R&D | Data Analytics | Critical Infrastructure Security

1-754-551-0812, ebouharb@fau.edu, West Palm Beach, FL, USA

<http://cybersec.fau.edu>

Dr. Bou-Harb possesses more than 14 years of experience in the global IT field, 9 years in the cyber security area, 4 years in the strategic and technical consultancy domain and 2 years as an executive in the financial sector. A tenure-track faculty, at 30 years old, specializing in cyber security R&D, Dr. Bou-Harb is an expert in cyber threat intelligence, real-time traffic analysis and correlation, and digital/network forensics. His impactful work in that area generated several operational cyber security capabilities, produced more than 60 academic and technical publications in prestigious international conferences and journals and awarded him several top-notch grants valued at more than \$3M in the past two years. Dr. Bou-Harb is the recipient of 4 best paper awards at international venues due to his excellent oral and written communication skills. He is distinguished by his significant critical thinking capabilities, vast research ability and potential, extreme enthusiasm, high levels of determination and aptitude to complete milestones within specific stringent deadlines.

Throughout his academic and technical career, Dr. Bou-Harb has gained the ability to represent information in various methods, the aptitude to design and conduct an observational, testing and an application experiment, and the capability to effectively communicate scientific ideas and results. Moreover, he has gained operational engineering capabilities in cyber security R&D, real-time big data analytics, cyber-attack detection and mitigation, efficient malware fingerprinting and real-time traffic analysis.

After executing a Postdoctoral fellowship funded by the Natural Sciences and Engineering Research Council of Canada at the prestigious Carnegie Mellon University, USA, Dr. Bou-Harb has joined the department of Computer Science at Florida Atlantic University (FAU) in January 2016 as a tenure-track Assistant Professor.

- ▶ Cyber Forensics
- ▶ Security for Internet of Things
- ▶ Security for Cyber-Physical Systems
- ▶ Deep learning
- ▶ Cyber Attacks' Detection & Mitigation
- ▶ Darknet, Malware & Passive DNS Analysis

Grants & Awards

- ▶ U.S. Department of Homeland Security Grant, \$2.3M
- ▶ U.S. National Science Foundation Grant, \$500K
- ▶ Canadian NSERC PostDoc Fellowship, \$90,000
- ▶ Best Paper Award – Symposium on Personal, Indoor and Mobile Radio Communications, Canada
- ▶ Best Paper Award – Conference on Availability, Reliability and Security, Germany
- ▶ Best Paper Award – Symposium on Network Computing and Applications, USA
- ▶ Best Paper Award – Digital Forensics Research Conference, USA

ORGANIZATIONS SERVED

- ▶ Florida Atlantic University
- ▶ Carnegie Mellon University
- ▶ Canadian RCMP/CSIS
- ▶ Ericsson Canada
- ▶ Concordia University
- ▶ Deloitte Cyber Consulting
- ▶ New Horizons IT Training

GRANTS, AWARDS & HONORS

- ▶ **National Science Foundation (NSF)** Grant: *CyberTraining CIP: Cyberinfrastructure Expertise on High-throughput Networks for Big Science Data Transfers*. (\$500,000). 2018-2021. **Awarded. Co-PI.**
- ▶ **U.S. Department of Homeland Security (DHS)** Grant. *CPSTraps: Towards Large-scale Empirical Data Collection, Curation and Analysis for Securing CPS*. (\$2,340,652). 2018-2021. **Accepted. PI.**
- ▶ **National Science Foundation (NSF)** research Initiation Initiative (CRII) Grant: *CRII: OAC: Inferring, Attributing, Mitigating and Analyzing the Malicious Orchestration of Internet-scale Exploited IoT Devices: A Network Telescope Approach*. (\$175,000). 2017-2019. **Awarded. Sole PI.**
- ▶ **Qatar's National Priorities Research Program (NPRP)** Grant. *Assessing and managing ICT security risks of industrial controls systems for oil and natural gas production and transmission*. (\$120,000). 2017-2019. **Awarded. Co-PI.**
- ▶ **The Florida Center for Cybersecurity (FC2)** 2017 **Capacity Building** Program: *An Operational Cyber Security Capability for Analyzing the Darknet Space for Predictive Indicators of Cyber Threat Activity*. (\$75,000). 2017-2018. **Awarded. Sole PI.**
- ▶ **National Institute of Standards and Technology (NIST)**, The measurement science and engineering (MSE) research grant program: *Large-scale Empirical Measurements for Inferring, Attributing and Analyzing the Malicious Orchestration of Compromised IoT Devices*. (\$375,000). 2019-2021. **Under Review. Sole PI.**
- ▶ **National Science Foundation (NSF)** Grant: *OAC Core: Small: Devising Data-driven and Formal Methodologies by Employing Large-scale Empirical Data to Fingerprint, Attribute, Remediate and Analyze Internet-scale IoT Maliciousness* (\$500,000). 2019-2022. **Under Review. PI.**
- ▶ **U.S. Office of Naval Research (ONR)** Young Investigator Program (YIP): *A Multidimensional Approach for Securing US Cyberspace & Critical Infrastructure by Investigating Malware*. (\$510,000). **Under Review.**
- ▶ **Natural Sciences and Engineering Research Council of Canada (NSERC)** Postdoctoral Fellowship (PDF): **Top 1%** of all Canadian Computer Science Ph.D. Students, (\$90, 000). **Sole PI.**
- ▶ **Fonds Québécois de la Recherche sur la Nature et les Technologies (FQRNT)** Postdoctoral Fellowship, (\$70, 000). **Sole PI.**
- ▶ **4 Best paper awards. IEEE PIMRC 2017, ACM DFRW 2014, IEEE ARES 2013, IEEE NCA 2013.**

CONTRIBUTIONS TO RESEARCH AND DEVELOPMENT

A. Published referred contributions (1 book chapter and 25 journal publications)

Book Chapters

- **E. Bou-Harb** and C. Fachkha, "On inferring and characterizing large-scale probing and DDoS campaigns," in *Computer and Network Security Essentials*, pp. 461-474, Springer, Cham, 2018. (My role: conception of ideas, research design and development, and writing of manuscript. 70% contribution)

Refereed Journal Publications

- S. Torabi, **E. Bou-Harb**, C. Assi, A. Boukhtouta, and M. Debbabi, "Investigating Internet-Scale Reconnaissance Activities by Compromised IoT Devices Through the Lens of A Large-Scale Network Telescope," in *IEEE Transactions on Information Forensics and Security*, "In Press", 2019. (My role: conception of ideas, research design and development, and writing of manuscript. 35% contribution)
- M. Safaeipour and **E. Bou-Harb**, "Implications of theoretic derivations on empirical passive measurements in the presence of the Mirai Botnet," *Elsevier's Computer & Security*, "In Press", 2018. (My role: discussion of ideas, providing guidance on research plan, reviewing and discussing results, editorial modifications. 35% contribution)
- J. Crichigno, **E. Bou-Harb** and N. Ghani, "A Comprehensive Tutorial on Science DMZ," *IEEE Communications Surveys & Tutorials*. "In Press", 2018. (My role: conception of ideas, research design and development, and writing of manuscript. 35% contribution)
- D. Olivera, N. Ghani, J. Crichigno, **E. Bou-Harb**. SDN Testbed for Evaluation of Large-Scale Electro-Magnetic Pulse (EMP) Attacks. *IEEE Communications Magazine*, "In Press", 2018. (My role: discussion of ideas, providing guidance on research plan, reviewing and discussing results, editorial modifications. 20% contribution)
- **E. Bou-Harb** and N. Ghani, "Passive inference of attacks on CPS communication protocols," *Elsevier's Journal of Information Security and Applications*, "In Press", 2018. (My role: conception of ideas, research design and development, and writing of manuscript. 80% contribution).
- Husák, M., Komárková, J., **Bou-Harb, E.**, and Čeleda, P. (2018). Survey of Attack Projection, Prediction, and Forecasting in Cyber Security. *IEEE Communications Surveys & Tutorials*. (My role: discussion of ideas, providing guidance on research plan, reviewing and discussing results, editorial modifications. 35% contribution)
- **E. Bou-Harb**, C. Assi, and M. Debbabi, "CSC-detector: a system to infer large-scale probing campaigns," in *IEEE Transactions on Dependable and Secure Computing*, vol. PP, no. 99, pp. 1-1, 2018. (My role: conception of ideas, research design and development, and writing of manuscript. 85% contribution)
- Shaikh, F., **Bou-Harb, E.**, Neshenko, N., Wright, A. P., and Ghani, N. (2018). Internet of Malicious Things: Correlating Active and Passive Measurements For Inferring and Characterizing Internet-scale Unsolicited IoT Devices. *IEEE Communications Magazine*, 56(9), 170-177. (My role: discussion of ideas, providing guidance on research plan, reviewing and discussing results, editorial modifications. 40% contribution)

- **E. Bou-Harb**, M. Husák, M. Debbabi, and C. Assi, "Big data sanitization and cyber situational awareness: a network telescope perspective," in *IEEE Transactions on Big Data*, Special Issue on Big Data Applications in Cyber Security and Threat Intelligence, vol. PP, no. 99, pp. 1-1, 2018. doi: 10.1109/TBDATA.2017.2723398. (My role: conception of ideas, research design and development, and writing of manuscript. 80% contribution)
- **E. Bou-Harb** and M. Scanlon, "Behavioral service graphs: a formal data-driven approach for prompt investigation of enterprise and internet-wide infections," in *Digital Investigation*, vol. 20, Supplement, pp. S47-S55, 2017. ISSN 1742-2876. doi: 10.1016/j.diin.2017.02.002. (My role: conception of ideas, research design and development, and writing of manuscript. 90% contribution)
- **E. Bou-Harb**, W. Lucia, N. Forti, S. Weerakkody, N. Ghani, and B. Sinopoli, "Cyber meets control: a novel federated approach for resilient CPS leveraging real cyber threat intelligence," in *IEEE Communications Magazine*, vol. 55, no. 5, pp. 198-204, May 2017. doi: 10.1109/MCOM.2017.1600292CM. (My role: conception of ideas, research design and development, and writing of manuscript. 80% contribution)
- J. Crichigno, M. Pourvali, F. Shaikh, A. Rayes, **E. Bou-Harb**, and N. Ghani, "Optimal traffic scheduling for intrusion prevention systems," in *International Journal of Advances in Telecommunications, Electrotechnics, Signals and Systems*, vol. 6, no. 2, pp. 73-79, 2017. (My role: discussion of ideas, providing guidance on research plan, reviewing and discussing results, and editorial modifications. 15% contribution)
- **E. Bou-Harb**, M. Debbabi, and C. Assi, "Big data behavioral analytics meet graph theory: on effective botnet takedowns," in *IEEE Network*, vol. 31, no. 1, pp. 18-26, January/February 2017. doi: 10.1109/MNET.2016.1500116NM. (My role: conception of ideas, research design and development, and writing of manuscript. 85% contribution)
- **E. Bou-Harb**, M. Debbabi, and C. Assi, "A novel cyber security capability: inferring Internet-scale infections by correlating malware and probing activities," in *Computer Networks*, vol. 94, pp. 327-343, 2016. ISSN 1389-1286. doi: 10.1016/j.comnet.2015.11.004. (My role: conception of ideas, research design and development, and writing of manuscript. 85%contribution)
- C. Fachkha, **E. Bou-Harb**, and M. Debbabi, "Inferring distributed reflection denial of service attacks from darknet," in *Computer Communications*, vol. 62, pp. 59-71, 2015. ISSN 0140-3664. doi: 10.1016/j.comcom.2015.01.016. (My role: discussion of ideas, research and design, reviewing and discussing results, and writing most of the manuscript. 35% contribution)
- C. Fachkha, **E. Bou-Harb**, and M. Debbabi, "On the inference and prediction of DDoS campaigns," in *Wireless Communications and Mobile Computing*, vol. 15, pp. 1066–1078, 2015. doi: 10.1002/wcm.2510. (My role: discussion of ideas, research and design, reviewing and discussing results, and writing most of the manuscript. 35% contribution)
- **E. Bou-Harb**, N.-E. Lakhdari, H. Binsalleeh, and M. Debbabi, "Multidimensional investigation of source port 0 probing," in *Digital Investigation*, vol. 11, Supplement 2, pp. S114-S123, 2014. ISSN 1742-2876. doi: 10.1016/j.diin.2014.05.012. (My role: conception and discussion of ideas, research design and development, and writing most of the manuscript. 65% contribution).

B. Other refereed contributions (42 conference publications including 4 best paper awards)

Refereed Conference Publications

- M. Husák, M. Safaeipour, N. Neshenko, **E. Bou-Harb**, and P. Čeleda, "Assessing Internet-wide Cyber Situational Awareness of Critical Sectors," in Proceedings of the *IEEE 13th International Conference on Availability, Reliability and Security (ARES 2018)*, p. 22, ACM, 2018. (My role: discussion of ideas, providing guidance on research plan, reviewing and discussing results, editorial modifications. 35% contribution)
- S. Torabi, **E. Bou-Harb**, C. Assi, A. Boukhtouta, and M. Debbabi, "Inferring, Characterizing, and Investigating Internet-Scale Malicious IoT Device Activities", in Proceedings of the *IEEE/IFIP 48th International Conference on Dependable Systems and Networks (DSN-2018)*. (My role: conception of ideas, research design and development, and writing of manuscript. 40% contribution)
- M. Husák, M. Safaeipour, N. Neshenko, **E. Bou-Harb**, and P. Čeleda, "Data-Driven Intelligence for Characterizing Internet-scale IoT Exploitations," in Proceedings of *IEEE Conference on Communications and Network Security (CNS 2018)*. (My role: discussion of ideas, providing guidance on research plan, reviewing and discussing results, editorial modifications. 35% contribution)
- M. Safaeipour and **E. Bou-Harb**, "Implications of Theoretic Derivations on Empirical Passive Measurements for Effective Cyber Threat Intelligence Generation," in Proceedings of *IEEE International Conference on Communications (ICC)*, Kansas City, 2018. (My role: conception of ideas, research design and development, and writing of manuscript. 50% contribution)
- Christian Miranda, Georges Kaddoum and **E. Bou-Harb**, "Cross-Layer Authentication Protocol Design for Ultra-Dense 5G HetNets," in Proceedings of *IEEE International Conference on Communications (ICC)*, Kansas City, 2018. (My role: conception of ideas, research design and development, and writing of manuscript. 30% contribution)
- Farooq Shaikh, **Elias Bou-Harb**, Jorge Crichigno, Nasir Ghani, "A Machine Learning Model for Classifying Unsolicited IoT Devices by Observing Network Telescopes", in Proceedings of *IEEE Conference on Communications and Network Security (CNS 2018)*. (My role: conception of ideas, research design and development, and writing of manuscript. 35% contribution)
- Sameera Almula, Claude Fachkha, **E. Bou-Harb**, "Cyber Security Threats Targeting CPS Systems: A Novel Approach Using Honeypots", In Proceedings of the *IEEE 12th International Conference on Emerging Security Information, Systems and Technologies (SecureWare 2018)*. (My role: conception of ideas, research design and development, and writing of manuscript. 30% contribution)
- Jorge Crichigno, Zoltan Csibi, **Elias Bou-Harb**, Nasir Ghani, "Impact of Segment Size and Parallel Streams on TCP BBR", In Proceedings of the *IEEE 2018 41st International Conference on Telecommunications and Signal Processing (TSP)*. (My role: conception of ideas, research design and development, and writing of manuscript. 30% contribution)
- Charles Wheelus, **Elias Bou-Harb**, Xingquan Zhu, "Tackling Class Imbalance in Cyber Security Datasets", In Proceedings of the *2018 IEEE International Conference on Information Reuse and Integration (IRI)*. (My role: conception of ideas, research design and development, and writing of manuscript. 40% contribution)

Curriculum Vitae

Behnaz Ghoraani, B.Sc., M.Sc., Ph.D.

Address: 777 Glades Rd

Boca Raton, FL 33431

Phone: 561-297-4031

E-mail: bghoraani@fau.edu

Home page: <http://biomedsignal.com>

EDUCATION

Postdoctoral Fellow	2010-2012
Faculty of Medicine, University of Toronto, Toronto, Canada	
Doctor of Philosophy	2006-2010
Department of Electrical and Computer Engineering, Ryerson University, Toronto, Canada	
Thesis: <i>Developed Advanced Signal Processing Techniques in Multimedia and Biomedical Engineering.</i>	
Master of Applied Science	1998-2000
Department of Electronics and Electrical Engineering, Amir Kabir University of Technology, Tehran, Iran	
Bachelor of Applied Science	1994-1998
Department of Electronics and Electrical Engineering, Sharif University of Technology, Tehran, Iran	

RESEARCH INTERESTS

Biosensor and Biomedical signal analysis, Non-stationary Data Analytics, Feature extraction and classification, Time-frequency signal analysis, Pattern classification and recognition, Dictionary learning, Computer-aided clinical decision making

SELECTED HONOURS, AWARDS, AND RECOGNITIONS [Selected]

<i>Graduate Student received NSF young professional award</i>	August 2016
<i>Graduate Student Selected as an IEEE EMBS Student Paper Competition Finalist</i>	July 2016
<i>Senior Member of the Institute of Electrical and Electronics (IEEE)</i>	2012
<i>The G. Gordon M. Sterling Engineering Intern Award</i>	2011
<i>Appreciation of the extraordinary service to the IEEE Women in Engineering Society</i>	2011
<i>Outstanding New Leader Award In appreciation to excellent service</i>	2008-2009

PROFESSIONAL AND ACADEMIC EXPERIENCE

<i>Computer and Electrical Engineering at Florida Atlantic University, Boca Raton, FL</i>	August 2016- present
Assistant Professor – Tenure track	
<i>Institute for Sensing and Embedded Network Systems Engineering, Boca Raton, FL</i>	August 2016- present
Faculty Fellow	
<i>Biomedical Engineering at Rochester Institute of Technology (R.I.T.), Rochester, NY</i>	August 2012–August 2016
Assistant Professor – Tenure track	
<i>PhD in Engineering at R.I.T., Rochester, NY</i>	August 2014–August 2016
Core Graduate Faculty	
<i>Microsystems Engineering at R.I.T., Rochester, NY</i>	August 2012–August 2016
Core Graduate Faculty	

<i>Ph.D. in Computing and Information Sciences at R.I.T., Rochester, NY</i>	December 2012–August 2016
Extended Faculty	
<i>Biomedical Engineering at Ryerson University, Toronto, Canada</i>	2009–2012
Instructor	
<i>Division of Cardiology at Toronto General Hospital, Toronto, Canada</i>	2008–2010
Research Assistant	
<i>Electrical and Computer Engineering at Ryerson University, Toronto, Canada</i>	2005–2010
Research Assistant	
<i>Faculty of Engineering at Ryerson University, Toronto, Canada</i>	2006–2010
Teaching Assistant	
<i>Alcatel at Celestica, Toronto, Canada</i>	2004–2005
Test Engineer	
<i>Kanavaran Inc., Tehran, Iran</i>	2000–2004
Electronics Design Engineer	

INTELLECTUAL PROPERTY

Systems and Methods for Localizing Signal Sources using Multi-Pole Sensors

U.S. Patent Application Serial No. 15/595,110

Filed: May 15, 2017

Systems and Methods for Guiding a Multi-Pole Sensor Catheter to Locate Cardiac Arrhythmia Sources

U.S. Patent Application Serial No. 15/727,393

Filed: September 25, 2017

ACTIVE FUNDED RESEARCH PROPOSALS

<i>Florida Department of Health</i>	2019-2021
Technology-based Systems to Measure Dual-task (Motor-cognitive) Performance as a Biomarker for Early Detection of Alzheimer's Disease	\$94K
Role: PI	
<i>National Institute of Health (NIH) Heart, Lung, and Blood Institute</i>	2015-2019
Catheter Guidance Algorithm for Identification of Atrial Fibrillation Ablation Targets	\$456K
Role: PI	
<i>National Science Foundation CNS</i>	2017-2019
REU Site: Sensing and Smart Systems	\$340K
Role: Co-PI	

COURSES DEVELOPED

Biosignal Analysis – Graduate level, Florida Atlantic University	2017-2019
Data Analytics – Graduate level, R.I.T.	2015-2016
Biomedical Signals and Systems Analysis – 3 rd year students, R.I.T.	2012-2016
Numerical and Statistical Analysis of Complex Biomedical System – 4 th year students, R.I.T.	2013-2014
Quarter to Semester Conversion	
Engineering Analysis II– 3 rd year students, R.I.T.	2012-2013
Computations in Genetic Engineering – Graduate elective, Ryerson University	2010-2011

REVIEW DUTIES FOR GOVERNMENT PROPOSALS/Awards/CONFERENCES [Last 5 years]

Assistant Editor of the IEEE Signal Processing Magazine eNewsletter	2019-2020
Chair of the IEEE Signal Processing Society Young Professional Committee	2018-2020
Women in Engineering Chair	2017, 2018
IEEE Life Sciences Conference, Sydney, Australia ('17) Montreal, Canada ('18)	
Track Chair "Biosensors and Biomedical Signals"	2017, 2018
IEEE Life Sciences Conference, Sydney, Australia ('17) Montreal, Canada ('18)	
Organized Special Track session, "Biomedical Imaging and Signal Processing Tools for Cardiac Arrhythmias: Diagnosis, Treatment Planning and Therapy Delivery", at the IEEE International Symposium on Computer-based Medical Systems (CBMS), Thessaloniki, Greece ('17) Sweden ('18)	2017, 2018
Committee of the Sheehan's Scholarship for Exceptional Women in CEECS	February 2017
Panelist at the Women in Engineering/Computer Science Panel Discussion @ FAU,	November 2016
Austrian Science Funding Reviewer	September 2016
Invited Session Chair "Neurological Disorders"	August 2016
At the 38th Annual International Conference of the IEEE Engineering in Medicine and Biology Society	
NIH Early Career Reviewer	2015–present
NSF panel review	2014–present
AdvanceRIT Faculty Connect Grants Steering and Review Committee	2015–2016

REVIEW DUTIES FOR JOURNALS

IEEE Transactions on Signal Processing, IEEE Transactions on Biomedical and Health Informatics, Digital Signal Processing, Medical Engineering & Physics, Biomedical Signal Processing and Control, Transactions on Neural Systems & Rehabilitation Engineering, International Journal of Entropy, International Journal of Advancements in Computing Technology, International Journal of PLOS ONE, Numerical Methods in Biomedical Engineering, International Journal of Computer Science and System Biology, International Journal of Molecular Science, British Journal of Applied Sciences and Technology, EP EuroPace, Computer Methods and Programs in Biomedicine, Computers in Biology and Medicine, Journal of Entropy, The IEEE Transactions on Audio, Speech and Language Processing, The Journal of European Association for Signal Processing (EURASIP), The Elsevier journal on Biomedical Signal Processing and Control,

STUDENT ADVISING**Current PhD/Masters Students**

Prasanth Ganesan – Ph.D. in Engineering, FAU	2015–present
Murtadha Hssayeni – Ph.D Computer Engineering, FAU	2018-present
Tuan Vo Nhut – Ph.D. in Engineering, FAU	2019-present

Graduated Masters Students

Murtadha Hssayeni – M.S. Computer Engineering, R.I.T.	2016
Anthony Salmin – B.S./M.S. Electrical Engineering, R.I.T.	2016
Sathyashree Basavaraju – M.S. Electrical Engineering, R.I.T.	2018

Vignesh Ramji – M.S. Electrical Engineering, R.I.T.	2016
Miguel Dominguez – M.S. Electrical Engineering, R.I.T.	2016
Now: PhD student in PhD in Engineering Program at RIT	
Prasanth Ganesan – M.S. Electrical Engineering, R.I.T.	2015
Now: PhD student in Dr. Ghoraani's lab.	
Supachan Traitruengsakul – M.S. Electrical Engineering, R.I.T.	2015
Now: Lecturer at Ratchasuda Collage Mahidol University, Thailand	
Daniel Sinkiewicz – BS./M.S. in Electrical Engineering, R.I.T.	2014
Now: Communications Engineer at The Mitre Corporation	
Baabak Mamaghani – BS./M.S. in Electrical Engineering, R.I.T.	2014
Now: Research Assistant at R.I.T.	
Steven Ladavich – B.S./M.S. in Electrical Engineering, R.I.T.	2014
Now: Technical Sales Representative at Texas Instruments	

INVITED TALKS [last 2 years]

BioFlorida Conference, HealthIT Advancements: Going Digital to Improve Healthcare & Treatment	October 2018
Women in Data Science Conference, Biomedical Signal Feature Extraction for Computer-assisted Clinical Decision Making	March 2018
Massachusetts General Hospital, Developing Algorithms to Localize AF ablation Targets	November 2017
FAU College of Nursing, Applying Technology to Research Proposals	November 2017
Florida Atlantic University, Women in Engineering/Computer Science Panel Discussion	November 2017
Life Sciences Career Event, BioFlorida	October 2016

Ghoraani**, "A Tracking Algorithm to Guide Multi-pole Diagnostic Catheters Towards Atrial Fibrillation Sustaining Sources in Simulated Fibrotic Tissue", *Abstract at Proceedings of the 38th Heart Rhythm Scientific Sessions*, Chicago, May 2017.

Ravi Shankar, PhD, MBA, PE, Fellow (AHA)

Director, Center for Systems Integration (CSI) shankar@fau.edu
Professor, Comp. and Elec. Eng. and Comp. Science (CEECS) Off: (561) 297-3470
Florida Atlantic University (FAU), Boca Raton, FL 33431 Cell: (561) 306-5625
Profile: <http://faculty.eng.fau.edu/shankar/> Research: <http://csi.fau.edu/>
Team course sites: <http://android.fau.edu/>, <http://robotics.fau.edu/>, <http://semanticweb.fau.edu/>
Github open source App site: <https://github.com/RShankar?tab=repositories>
LinkedIn profile: <https://www.linkedin.com/in/shankar2015>

Objective:

- Contribute to progress on issues of national importance by leveraging my various strengths in
- Technology (systems, engineering, medicine, algorithms, semantic web, and automation),
 - Education (STEM education, eLearning and interdisciplinary collaboration), and
 - Management (innovation, management, leadership, industry experience, and grantsmanship)

Experience:

Education: Data Science Certificate, Coursera (non-degree), Johns Hopkins U, Oct 2015 (expected)
MBA, College of Business, Florida Atlantic University, Boca Raton, FL, May 2000
PhD, Electrical and Computer Engineering, University of Wisconsin, Madison, 1982
M.S, Electrical and Computer Engineering, University of Wisconsin, Madison, 1977

Employment and Professional Experience:

- **2012-2013, Sabbatical**, On building a consortium for smart phone and mobile Apps ([CUSP](#))
- **1993-Present, Director**, [CSI](#), a center for multi-college university-industry collaboration
- **1982-Present, Promoted and Tenured**, Assistant to Full Professor, CEECS disciplines, FAU
- **2009-Present**, On multi-college teaching coordination to help [student teams](#) develop Apps
- **2003-2008, Research Director**, Motorola Grant (\$1 M). Increased [design productivity](#) six fold
- **2001-2002, Senior Consultant**, Cadence Design Systems, leading maker of chip design software
- **1998-1999, Sabbatical**, On rapid and low cost prototyping for [STEM](#) hands-on experience.
- **1991-2002, Consultant**, Vasocor, on clinical studies for [early prediction](#) of atherosclerosis
- **1992-1993, Research Director**, Vasocor Grant (\$750K), on medical imaging for atherosclerosis.
- **1986-2008, Consultant**, IBM, APTEK, Harris, and Motorola, on engineering design automation.
- **1977-1982, Teaching & Research Assistant**, Elec. and Comp. Eng., U of Wisconsin, Madison, WI

Teaching Experience:

- **2008- Present**, [Mobile Applications](#), based on open source tools for Google's [Android](#), Arduino for [robotics](#), Jena and Protégé for the [semantic web](#), and EMF for [auto code](#) generation.
- **2000-2007**, *System on a chip (SoC)*, with courses on Network on Chip, Concurrency, SystemC for mixed-signal systems, Design and Verification, and Biologically Inspired Architectures.
- **1999-2000**, *Innovation*, with course on new product development, College of Business
- **1986-1999**, *VLSI*, with courses on Microelectromechanical Systems (MEMS), Neural VLSI; Low Power Design, Silicon-on-Insulator (SOI), Structured VLSI Design; Introduction to VLSI
- **1982-1992**, *Computer Architecture*, with courses on Embedded System Design, Concurrent Processing, Neural Networks, Microcomputers, Digital Computer Architecture
- **1985-2000**, *Engineering Design Automation*, with courses on CAD-Based Computer Design, Structured Digital Design; Computer Hardware Design, Semi-custom VLSI Design in DSP

- **1982-1985, Data Acquisition, Data Acquisition and Measurement Systems and Biomedical Instrumentation Lab** (at the Univ. of Wisconsin-Madison)

Scholarly Achievements

Statement of Professional Interests: Mobile Systems, System Complexity, Semantic and Intelligent web, Engineering Design Productivity, Systems Integration, Concurrency Modeling, SoC (System-on-a-chip) Design, VLSI (analog, digital and neural) Design, Computer Architecture, Distributed Parallel Processing, MEMS, and Biomedical Engineering.

Theses and Dissertations Supervised: 30 MS theses (4 on-going) and 9 PhD dissertations (one on-going) in the following domains (current to earlier): Semantic Web, System Modeling, Productivity, Computer Architecture, Concurrency, Artificial Neural Networks, Design Automation, VLSI Design, Instrumentation, and Biomedical Engineering.

Patents (in Computer and Biomedical Engineering): Click [here](#) for details.

- Two patents on highly scaleable multiplier architecture for low power mobile systems. US patents numbers: 7,873,823 (issued in January 2011 and 7080114 (issued in January 2005)
- Five patents on early and/or noninvasive diagnostic methods for atherosclerosis and diabetes. US patent numbers: 8,197,416 (issued in June 2012), 8,185,182 (issued in June 2012), 5,343,867 (issued in September 1994), 5,297,556 (issued in March 1994), and 5,241,963 (issued in September 1993).

• Character Recognition with Neural Networks (PI: Pandya), IBM, 1990-92	\$86 K
• Layout Topology Optimization for DCVS Logic (Co-PI: Barrett), IBM, 1990-91	\$77 K
• Wafer Scale Integration for Image Perception, DARPA/SUS, 1989-1990	\$78 K
• VLSI Implementation issues for neural networks, FHTIC, 1989-1992	\$109 K
• Early Detection of Atherosclerosis, FAU, 1989-1990	\$27 K
• Patterned Functional Electrical Stimulation for Hemiplegics, FHTIC, 1989-1990	\$35 K
• Design of Analog VLSI Cell Library, USF, Tampa, 1986-1988	\$40 K
• VLSI Design of Communication Systems (Co-PI: Szabo), APTEK, 1986-1987	\$75 K
• Early Noninvasive Detection of Atherosclerosis, FHTIC, 1985-1987	\$133 K
• Distributed Computing and VLSI Design (Co-PI: Raskin), IBM 1984-1986	\$125 K

Synergistic (and Large Team) Activities:

- **Consortium for Smart Phone, Mobile and Web Applications (CUSP) (2011 to Present):** Multi-disciplinary efforts that combines my various backgrounds in biomedical, electrical, computer engineering, computer science, innovation, and management. Multi-college joint courses have evolved on smart phones, robotics and the semantic web. These span high school to graduate school, across a number of colleges. This has facilitated communication across colleges which can be leveraged to evolve a university infrastructure of research enhancement, social entrepreneurship and STEM.
- **Android Smart Phone Apps (2009- Present):** SBA funded us in 2009 to develop courses on Android Mobile phone App development. Since then, we have offered courses for high school to graduate level and beyond, and have involved students and faculty members from arts, anthropology, and engineering to develop marketable Apps. During the last year, we expanded the course to include business students in a face-to-face course; and later offered it as an eLearning course. Our [Android site](#) is well visited by developers around the world (220 K visits).
- **Multi-Disciplinary Engineering Collaborations (2003-2008):** I led groups of 20+ computer science, computer and electrical engineering faculty members and students on a major 6 year Motorola project on radically increasing engineering design productivity. The group changed year-to-year with new goals. This was entitled “One Pass to Production” (OPP)
- **Industry Research and Development (2001-2002):** I worked as a senior consultant and technical account manager at Cadence supporting all system and chip design activities at Motorola. This allowed me to meet engineers and managers in all the disciplines and understand their design and product development flow. Citations of the OPP publication are at the [CSI site](#).
- **Technology Transfer (1991-2001):** My biomed patents resulting from pilot studies on human and monkey subjects were licensed to Vasocor Inc. I led a 30+ technical group (5/92-5/93) in developing Vasogram I. Vasogram II was used in a multi-center clinical validation study. (Herrington et al., [Circulation](#), 2004). My noninvasive measure for atherosclerosis was successfully correlated with abdominal aortic measurements with MRI.

Professional Recognition:

- Panel Member, Education Alternatives for Combining Engineering and Management, IEMC, Newfoundland, CA, September 2005
- Outstanding Faculty Award, Annual Award, College of Engineering, FAU, December 2003.
- Plaque of Appreciation, for leadership in implementing ‘One Pass to Production’ and ‘Digital Six Sigma’ programs, Motorola’s iDEN Cell Phone Division, September 2003.

- Leadership award, for leading the department in establishing collaborative relationship with Motorola, CSE Dept., FAU, March 2003.
- Panel Member, Education Alternatives in Biomedical Eng., Biocomplexity Conf., Dartmouth, 2002
- Team of the Year award, to our Motorola Enterprise Team at Cadence Design Systems, 2002.

Other Information

Research Commercialization: FAU's first licensing contract based upon my research on early and non-invasive detection of atherosclerosis, signed March 1991. Royalty payments of \$1 Million have been received by the FAU Research Corporation through 2004.

Continuing Education:

- Certification of Achievement. Web 2.20 Tools You can Use to Improve Learning, The Sloan Consortium, December 2012.
- eLearning Designer/Facilitator Certification at FAU, passed with honors, May 2012
- CITI (Collaborative Institutional Training Initiative) Certification obtained for both Biomedical Research Investigators and Social & Behavioral Research investigators, September 2011
- NIH, UMLS (Unified Medical Language System) One-day Training, Fall 2007
- Rhapsody, UML Tool for Real-Time, Motorola Funding, FAU, April 2004
- NSF Sponsored Workshop on Biocomplexity, at Dartmouth College, Hanover, NH, July 2002.
- Leadership Training, Three-day course, The Client Partner, Aspen Consulting Inc., April 2002.
- Senior Consultant at Cadence, with focus in the complex and challenging area of SFV (Systems and Functional Verification), during January 2001 to July 2002.
- Active support of Cadence tools and design flow, during January 2001 – 2003 at Motorola.
- Design experience with UML, MLD, SystemC, Verilog, SPW, Cascade, Analogy, PSPICE, HSPICE, Matlab, HP Tester, Xilinx, and several microcontrollers
- Executive MBA – to enhance and expand our college wide center and our product engineering consortium (comprised of centers at four universities).

Collaborators and Other Affiliations:

- Industrial: Jaime Borrás, ex-VP and CTO, iDEN, Motorola, Plantation, FL, now President, MTC (mobile Technology Consortium), FL; Jerry Merckel, ex-Senior Manager, IBM, Boca Raton, FL.
- Academic: Fran McAfee, Michael Harris, and Don Ploger, Faculty members at FAU
- Biomedical: John G Webster, Professor Emeritus, University of Wisconsin, Madison, WI, and M. G. Bond, Professor Emeritus, Bowman Gray School of Medicine, Winston-Salem, NC

Dr. Mihaela Cardei

Associate Dean for Graduate Studies and Professor
Computer & Electrical Engineering and Computer Science
Florida Atlantic University
777 Glades Road, Boca Raton, FL 33431

Phone: 561- 297-3459
Fax: 561-297-2800
Email: mihaela@cse.fau.edu
Web: www.cse.fau.edu/~mihaela

Research Interest

Wireless Networking, Wireless Sensor Networks, Combinatorial Optimization in Wireless Networks, Network Protocols and Algorithm Design.

Education

Ph.D. in Computer Science, University of Minnesota, Minneapolis, MN, 2003
M.S. in Computer Science, University of Minnesota, Minneapolis, MN, 1999
M.S. in Computer Science, Politehnica University of Bucharest, Romania, 1996
B.S. in Computer Science, Politehnica University of Bucharest, Romania, 1995

Honors and Awards

Researcher of the Year (Assistant Professor), Florida Atlantic University, 2006-2007.
Best paper award, The 35th IEEE International Performance Computing and Communications Conference (IEEE IPCCC), Dec. 2016.
Best paper award, The 10th IEEE International Conference on Mobile Ad-hoc and Sensor Networks (IEEE MSN), Dec. 2014.
Best paper award, The 2nd IEEE International Conference on Mobile Ad-hoc and Sensor Systems (IEEE MASS), Nov. 2005.
FAU Faculty Travel Award: Mar. 2005 and Aug. 2005.
Doctoral Dissertation Fellowship, Graduate School, University of Minnesota, 2002-2003.
Academic Merit Award, Dept. Computer Science & Engineering, University of Minnesota, 1999.

Professional Experience

Professor, FAU, Computer & Electrical Engineering and Computer Science, Aug. 2014 – present
Associate Professor, FAU, Computer Science & Engineering, Aug. 2008 – July 2014
Assistant Professor, FAU, Computer Science & Engineering, Aug. 2003 – July 2008
Intern, Honeywell Laboratories, Minneapolis, Apr. 1999 – Oct. 1999
Development Engineer, CoManage Corporation, Sep. 2000 – Jun. 2001

Grant Awards

- **Equipment Grant:** MSC-Mobile Switching Center, GSN-GPRS Support Node, GSM Base Station (1900 MHz) and OMCR, CDMA Base Station (850 MHz) and BSM Server, FAU NSF/IUCRC, co-PI, Jan 2012 – Dec 2014, \$965,000.
- **Efficient Protocols and Algorithms for Wireless Networks**, FAU NSF/IUCRC, co-PI, Feb 2012 – May 2014, \$17,359 (Total grant \$100,000).
- **Design and Evaluation of Wireless Networks Protocols**, FAU Foundation/Tecore Networks, co-PI, Jan 2012 – May 2014, \$15,156 (Total grant \$100,000).
- **Data Link and Communication Protocols for Underwater Laser Sensor Networks**, FAU Division of Research (Seed Grant), co-PI, 2012-2013, \$20,000.
- **Campus-2020 project: Campus Driving and Directions Assistant**, FAU NSF/IUCRC, investigator, 2012-2013, \$20,240 (Total grant \$300,000).
- **NSF CAREER Optimization Problems in Wireless Sensor Network Design and Applications**, National Science Foundation (NSF), PI, 06/01/06-01/31/12, \$400,000.
- **NSF Research Experiences for Undergraduates (REU)**, National Science Foundation (NSF), 05/15/09 – 12/15/09 PI, \$15,750.
- **NSF CISE Instrumentation: Wireless and Sensor Networking Laboratory**, National Science Foundation (NSF) & Division of Research at FAU, PI, 09/01/04-09/01/07, \$85,851.
- **Secure Telecommunication Networks, Secure Routing Protocols for Ad Hoc Wireless Networks**, DoD Defense-wide RTDE grant, investigator, 09/01/04-08/31/06, \$37,000.
- **New Project Development Program, Wireless Sensor Networks Design and Experimentation**, FAU Division of Research, PI, 01/01/06-12/31/06, \$15,000.
- **NSF MRI: Acquisition of a NUMA-based Supercluster for High Performance Computing**, National Science Foundation (NSF), co-PI, 08/01/05-07/31/09, \$459,065.
- **Secure Telecommunication Network, Global Information Grid Simulation**, DoD Defense-wide RTDE grant, investigator, 01/09/08-01/09/09, \$35,000.

Teaching

Graduate Courses:

- COT 6930: Wireless Networks
- COT 6405: Analysis of Algorithms

- COT 6930: Algorithms for Bioinformatics
- COT 6930: Wireless Networks Design and Optimization
- COT 6930: Distributed Algorithms
- COT 6930: Wireless Sensor Networks

Undergraduate Courses:

- CDA 4500: Introduction to Data Communications
- COT 4400: Design and Analysis of Algorithms
- COT 4420: Introduction to Formal Languages and Automata
- STA 4821: Stochastic Models for CS

Student Supervision

Ph.D. Dissertations Supervised (7)

Master's Theses Supervised (8)

Professional Organizations

Senior Member, Institute of Electrical and Electronics Engineers (IEEE)

Professional Activities

- Editor for *Ad Hoc & Sensor Wireless Networks* Journal, OCP Science, September 2009 – September 2012.
- Editor for *Computer Communications* Journal, Elsevier, February 2009 – February 2010.
- Panelist, National Science Foundation, 2003, 2005, 2008, 2012.
- Organizer of the *Wireless Networking Seminar* at the University of Minnesota, 2001-2003.
- One of the organizers of the *Doctoral Dissertation Fellows Seminar* (2002-2003), event conducted by the Graduate School at the University of Minnesota.
- Co-editor of *Theoretical and Algorithmic Aspects of Sensor, Ad Hoc Wireless, and Peer-to-Peer Networks*, special issue in the Journal of Parallel and Distributed Computing (JPDC), Vol 65, No 2, Feb. 2005.

LEGAL CAVEAT

EAB Global, Inc. ("EAB") has made efforts to verify the accuracy of the information it provides to members. This report relies on data obtained from many sources, however, and EAB cannot guarantee the accuracy of the information provided or any analysis based thereon. In addition, neither EAB nor any of its affiliates (each, an "EAB Organization") is in the business of giving legal, accounting, or other professional advice, and its reports should not be construed as professional advice. In particular, members should not rely on any legal commentary in this report as a basis for action, or assume that any tactics described herein would be permitted by applicable law or appropriate for a given member's situation. Members are advised to consult with appropriate professionals concerning legal, tax, or accounting issues, before implementing any of these tactics. No EAB Organization or any of its respective officers, directors, employees, or agents shall be liable for any claims, liabilities, or expenses relating to (a) any errors or omissions in this report, whether caused by any EAB organization, or any of their respective employees or agents, or sources or other third parties, (b) any recommendation by any EAB Organization, or (c) failure of member and its employees and agents to abide by the terms set forth herein.

EAB is a registered trademark of EAB Global, Inc. in the United States and other countries. Members are not permitted to use these trademarks, or any other trademark, product name, service name, trade name, and logo of any EAB Organization without prior written consent of EAB. Other trademarks, product names, service names, trade names, and logos used within these pages are the property of their respective holders. Use of other company trademarks, product names, service names, trade names, and logos or images of the same does not necessarily constitute (a) an endorsement by such company of an EAB Organization and its products and services, or (b) an endorsement of the company or its products or services by an EAB Organization. No EAB Organization is affiliated with any such company.

IMPORTANT: Please read the following.

EAB has prepared this report for the exclusive use of its members. Each member acknowledges and agrees that this report and the information contained herein (collectively, the "Report") are confidential and proprietary to EAB. By accepting delivery of this Report, each member agrees to abide by the terms as stated herein, including the following:

1. All right, title, and interest in and to this Report is owned by an EAB Organization. Except as stated herein, no right, license, permission, or interest of any kind in this Report is intended to be given, transferred to, or acquired by a member. Each member is authorized to use this Report only to the extent expressly authorized herein.
2. Each member shall not sell, license, republish, distribute, or post online or otherwise this Report, in part or in whole. Each member shall not disseminate or permit the use of, and shall take reasonable precautions to prevent such dissemination or use of, this Report by (a) any of its employees and agents (except as stated below), or (b) any third party.
3. Each member may make this Report available solely to those of its employees and agents who (a) are registered for the workshop or membership program of which this Report is a part, (b) require access to this Report in order to learn from the information described herein, and (c) agree not to disclose this Report to other employees or agents or any third party. Each member shall use, and shall ensure that its employees and agents use, this Report for its internal use only. Each member may make a limited number of copies, solely as adequate for use by its employees and agents in accordance with the terms herein.
4. Each member shall not remove from this Report any confidential markings, copyright notices, and/or other similar indicia herein.
5. Each member is responsible for any breach of its obligations as stated herein by any of its employees or agents.
6. If a member is unwilling to abide by any of the foregoing obligations, then such member shall promptly return this Report and all copies thereof to EAB.

1) Research Methodology

Project Challenge

Leadership at Florida Atlantic University approached the Forum as they considered the development of a master's-level artificial intelligence program. Through quantitative data analytics and secondary research, the Forum sought to assess the market viability of a master's-level artificial intelligence program.

EAB's market research function provides insights which guide strategic programmatic decisions at member institutions. The Forum combines qualitative and quantitative data to help administrators identify opportunities for new program development, assess job market trends, and align curriculum with employer and student demand.

EAB reports rely primarily on labor market data from the Emsi's Analyst and Alumni Insight™ tool (description below). Reports occasionally use data from the United States Census Bureau and United States Bureau of Labor Statistics data to explore occupation and job trends. Market research reports may also incorporate Integrated Postsecondary Education Data System (IPEDS) data to assess student enrollment, demographics, and completion rates across competitor programs.

Methodology and Definitions

Methodology: Unless stated otherwise, this report includes data from online job postings from January 2018 to December 2018. The Forum identified the top titles, employers, educational attainment, and reported earnings for master's-level artificial intelligence professionals in the profiled region and statewide. To identify relevant job postings, the Forum examined postings for master's-level professionals with relevant skills (e.g., 'deep learning,' 'natural language processing').

Definitions: "Regional data" and the "region" refer to the following states:

- Alabama,
- Florida,
- Georgia,
- Mississippi,
- North Carolina,
- South Carolina, and
- Tennessee.

"Master's-level artificial intelligence professionals" refers to professionals with a master's-level degree and relevant skills (e.g., 'deep learning,' 'natural language processing').

Emsi's Analyst and Alumni Insight

EAB's Partner for Comprehensive Labor Market Data

This report includes data made available through EAB's partnership with Emsi (Economic Modeling Specialists International), a labor market analytics firm serving higher education, economic development, and industry leaders in the U.S., Canada and the United Kingdom.

Emsi curates and maintains the most comprehensive labor market data sets available for academic program planning, providing real-time job posting data, workforce and alumni outcomes data, and traditional government sources of data. Under this partnership, EAB may use Emsi's proprietary Analyst™ and Alumni Insight™ tools to answer member questions about employer demand, the competitive landscape, in-demand skills, postings versus actual hires, and skills gaps between job postings and professionals in the workforce. The Emsi tools also provide EAB with in-depth access to unsuppressed, zip-code-level government data for occupations, industries, programs, and demographics. For more complete descriptions of the Emsi tools, visit:

- <http://www.economicmodeling.com/analyst/>
- <https://www.economicmodeling.com/alumni-insight/>

To learn more about Emsi and its software and services, please contact Bob Hieronymus, Vice President of Business Development at bob.hieronymus@economicmodeling.com or (208) 883-3500.

Project Sources

The Forum consulted the following sources for this report:

- EAB's internal and online research libraries (eab.com)
- National Center for Education Statistics (nces.ed.gov)

2) Executive Overview

Increased employer demand for master's-level artificial intelligence professionals and increased completions of relevant master's-level programs indicate an opportunity for program development. From September 2016 to December 2018, regional demand for master's-level artificial intelligence professionals increased 420 percent (i.e., from 327 to 1,700 postings) and statewide employer demand increased 423 percent (i.e., from 86 to 450 postings). Additionally, growth in nationwide completions of master's-level "artificial intelligence" programs suggests an increase in student demand for similar programs. Nationwide completions of master's-level "artificial intelligence" programs (i.e., classification of instructional programs (CIP) code 11.0102) increased 127 percent between the 2012-2013 academic year and the 2016-2017 academic year (i.e., completions increased from 81 to 184).

Emphasize high reported earnings in relevant occupations to attract prospective students interested in career advancement. The median hourly regional and statewide earnings in the five most common occupations for master's-level artificial intelligence professionals exceeds the median hourly earnings across all occupations in Florida. For example, 'computer and information research scientists' earn a median of \$51.25 an hour regionally, and \$46.05 an hour statewide. Comparatively, workers in Florida earn a median hourly income of \$16.07 per hour across all occupations. A focus on the high potential earnings of program graduates can attract prospective students who seek a degree with a high return on investment. A marketing approach that focuses on student outcomes can effectively attract prospective students because it allows them to envision program outcomes.¹

1) [Competing on Student Outcomes to Attract Today's Career Changer](#)

3) Market Demand Trends

Employer Demand over Time

Growth in Regional and Statewide Employer Demand Indicates Potential for Program Development

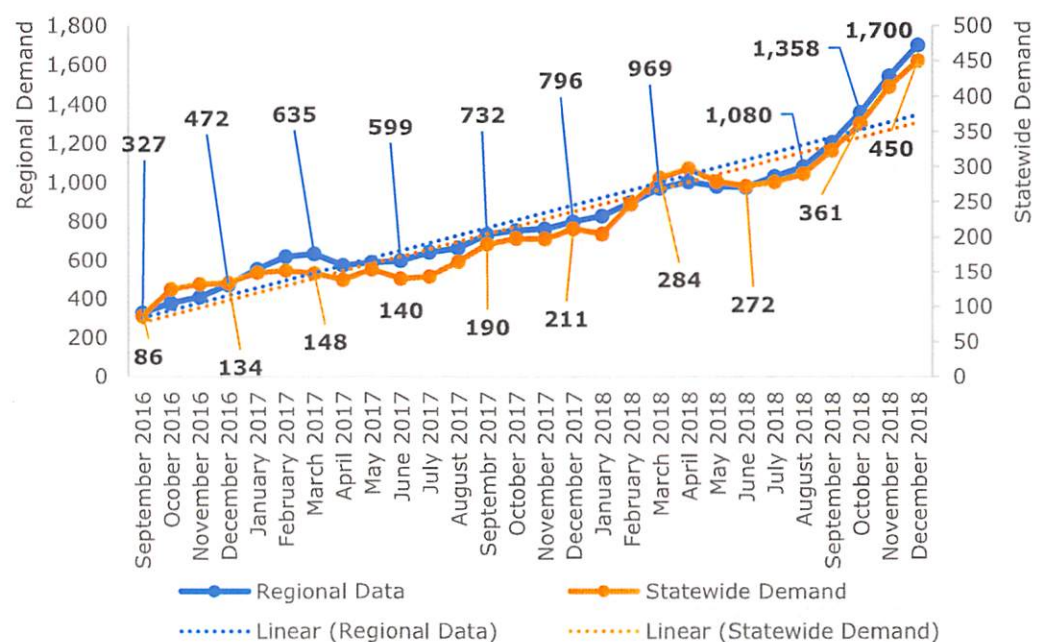

Overall positive employer demand trends indicate potential for program development. Statewide employers post 423 percent more openings for master's-level artificial intelligence professionals in December 2018 than in September 2016 (i.e., demand grew from 86 to 450 postings). Similarly, regional employer demand for master's-level artificial intelligence professionals grew 420 percent from September 2016 to December 2018 (i.e., from 327 to 1,700 postings). Notably, statewide and regional employer demand exhibited a consistent upward trend over the last two years, with no significant declines in demand. Between September 2016 and December 2018, statewide demand for master's-level artificial intelligence professionals increased approximately nine postings per month on average and regional demand increased by an average of approximately 33 postings per month.

Additionally, the Bureau of Labor Statistics (BLS) projects nationwide employment of "software developers, applications" (e.g., "application integration engineer," "software applications architect") will increase about 30 percent from 2016 to 2026, above the average projected growth in employment for all occupations during the period (i.e., 7.4 percent).² Emsi Analyst™ projects a 29 percent growth in regional employment of "software developers, applications" during the same period. The BLS also projects nationwide employment of "computer and information research scientists" to increase about 19 percent from 2016 to 2026. Emsi Analyst™ projects a 43 percent growth in regional employment of "computer and information research scientists" from 2016 to 2026, higher than national occupational growth projections.

Linear trend lines represent the average monthly change in statewide and regional employer demand for master's-level artificial intelligence professionals.

Historical Employer Demand for Master's-Level Artificial Intelligence Professionals

³ Emsi Analyst™

Top Titles

Prepare Students for Analytics and Research Roles to Align with Employer Demand

Analytics and research positions (e.g., 'research analysts,' 'business analysts') account for seven of the top 20 roles for which regional employers seek master's-level artificial intelligence professionals in the last 12 months, and 10 of the top 20 positions statewide employers specify over the same period. Graduates of a prospective master's-level artificial intelligence program can qualify for analytics and research roles across multiple areas (e.g., finance, computer and information). Prospective students interested in analytics across various fields can enroll in a prospective master's-level artificial intelligence program to gain relevant skills.

Regional and statewide employers also request master's-level artificial intelligence professionals for engineering and development roles (e.g., 'software engineers,' 'business intelligence developers'). Engineering and development roles account for nine of the top 20 titles regional employers most frequently post for master's-level artificial intelligence professionals. Similarly, engineering and development positions compose five of the top 20 titles statewide employers most frequently post for master's-level artificial intelligence professionals in the last 12 months.

Top Regional Titles for Master's-Level Artificial Intelligence Professionals

n = 4,697 job postings

* Research Analysts (Life, Physical, and Social Science)

** Business Analysts (Business and Financial Operations)

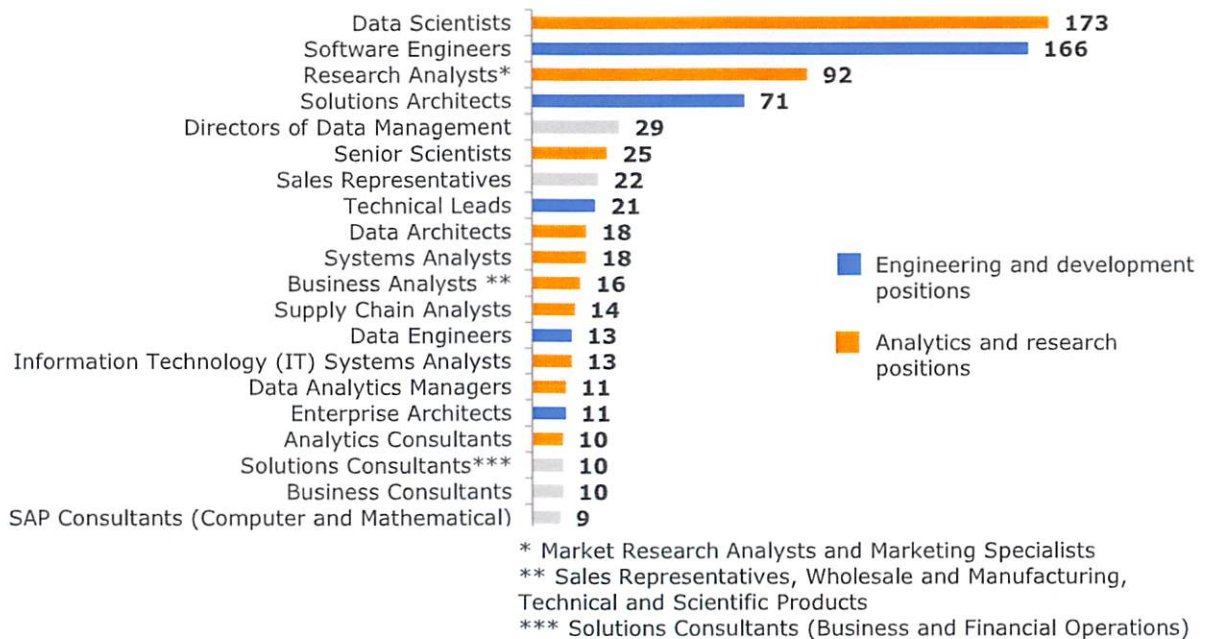

*** Systems Engineers (Computer and Mathematical)

**** Solutions Consultants (Business and Financial Operations)

Top Statewide Titles for Master's-Level Artificial Intelligence Professionals

January 2018-December 2018, Statewide Data⁵

n = 1,214 job postings

Employers with High Demand

Partner with Consulting and Technical Companies with High Relevant Demand to Recruit Students for a Master's-Level Artificial Intelligence Program

Partner with consulting firms, banks and financial organizations, and technology companies with high demand for master's-level artificial intelligence professionals to recruit prospective students. [EAB research](#) indicates institutions should consider partnerships with employers in industries that express high levels of demand for program graduates. Develop these partnerships through meetings with local employers to discuss industry needs. Employer feedback allows administrators to define distinct, sector-specific employment shortages for professionals and customize partnerships to meet those needs. Consulting companies represent five of the top 20 regional employers and three of the top 20 statewide employers that seek master's-level artificial intelligence professionals in the last year (e.g., Deloitte, LLP, KPMG, LLP). Emphasize demand among consulting firms to attract prospective students who seek career advancement and students interested in work in this industry. Additionally, banks and financial organizations (e.g., Wells Fargo & Company, American Express Company) account for three of the top 20 regional and statewide employers that seek master's-level artificial intelligence professionals. As expected, technology companies (e.g., IBM, Inc., Boeing Co.) account for four of the top 20 regional and statewide employers for master's-level artificial intelligence professionals.

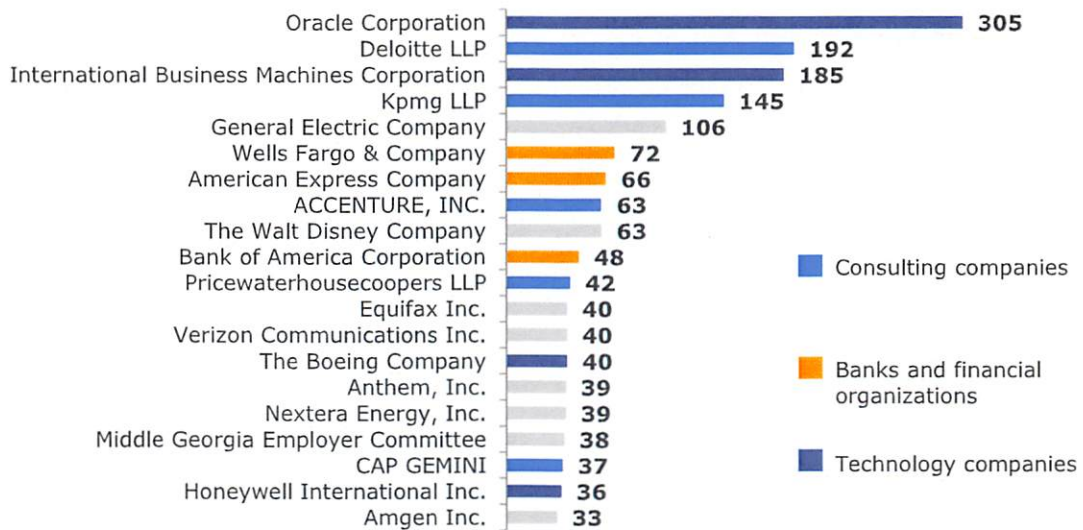

Additionally, highlight diverse employment opportunities for master's-level artificial intelligence professionals to attract prospective students with wide-ranging career interests. Other top regional and statewide employers for master's-level artificial

intelligence professionals span many industries including health care (e.g., Anthem, Inc.) and energy companies (e.g., Nextera Energy, Inc.).

6) Emsi Analyst™

7) Emsi Analyst™

Advertised Education Requirements

Advertise a Master's-Level Artificial Intelligence Program as a Pathway to Career Advancement to Attract Outcomes Focused Prospective Students

Regional employers specify for a bachelor's-level degree in 86 percent of postings for artificial intelligence professionals in the last 12 months (i.e., 10,433 of 12,108 postings). Comparatively, regional employers specify for a master's-level degree in 39 percent of job openings for artificial intelligence professionals in the last 12 months (i.e., 4,697 of 12,108 job postings). Similarly, statewide employers specify for a bachelor's-level degree in 91 percent of postings for artificial intelligence professionals (i.e., 3,257 of 3,572 job postings) and a master's-level degree in 34 percent of postings (i.e., 1,214 of 3,572 job postings). Professionals who seek to advance to positions that require a master's-level degree can enroll in the proposed program to obtain an additional credential to gain an advantage in the job market.

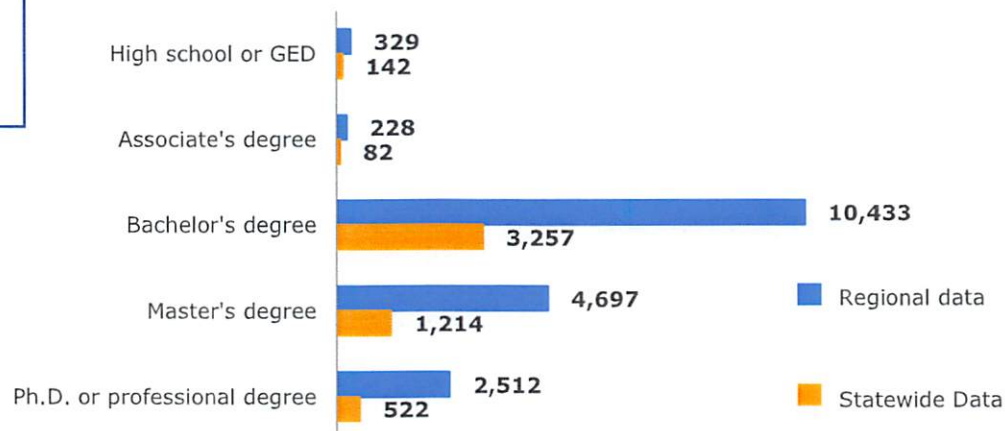

Employers may specify multiple levels of education in a single job posting, so employers may prefer a candidate with a master's-level degree in postings that also specify a bachelor's-level degree. For example, job postings for professionals with a bachelor's-level degree may identify a bachelor's-level degree as a requirement for employment but employers may prefer professionals with master's-level degrees. Additionally, artificial intelligence professionals who seek to move into more advanced roles can enroll in the artificial intelligence program to gain an additional credential and further training necessary for advancement. According to the BLS, professionals typically require a master's-level degree for employment as "computer and information research scientists."⁸

Administrators should note employers may specify multiple levels of education in one job posting, therefore, a single job posting may appear multiple times.

Advertised Education Level for Artificial Intelligence Professionals

Advertised Earnings

Feature Reported Earnings for Relevant Occupations in Marketing Materials to Convey Return on Investment to Prospective Students

Include information on the median hourly earnings and regional growth in employment for common occupations for master's-level artificial intelligence professionals to attract outcomes-focused students. The median earnings for the top five regional and statewide occupations for master's-level artificial intelligence professionals exceeds the median hourly income across all occupations in Florida. According to the BLS, Florida workers earn a median hourly income of \$16.07 per hour across all occupations.¹⁰ 'Computer and information research scientists' represents the top occupation for which regional employers seek master's-level artificial intelligence professionals and the second most common occupation for which statewide employers seek master's-level artificial intelligence professionals. 'Computer and information research scientists' earn a median of \$51.25 an hour in the region, and \$46.05 an hour statewide, approximately 3.2 and 2.9 times the median hourly statewide income for all occupations, respectively.¹¹

Earnings and Growth Projections in Top Regional and Statewide Occupations for Master's-Level Artificial Intelligence Professionals

Regional and Statewide Data¹²

Occupation	Sample Job Titles	Regional Median Hourly Earnings	Employment Growth 2016-2026
Computer and Information Research Scientists	Computer Scientist, Control System Computer Scientist, Computational Theory Scientist	\$51.25 (regional) \$46.05 (state)	+ 28.8% (regional) + 44.8% (state)
Software Developers, Applications	Application Integration Engineer, Applications Developer, Database Developer	\$44.65 (regional) \$42.32 (state)	+42.5% (regional) +45.1% (state)

Nationwide Completions

Growth in Nationwide Completions of Master's-Level Artificial Intelligence Programs Indicates Increased Student Interest and Potential for Program Development

Administrators should note **no statewide institution** reports completions of master's-level "artificial intelligence" programs (i.e., CIP code 11.0102) between the 2012-2013 and 2016-2017 academic years.

Nationwide completions of master's-level "artificial intelligence" programs (i.e., classification of instructional programs (CIP) code 11.0102) increased 127 percent between the 2012-2013 academic year and the 2016-2017 academic year (i.e., from 81 to 184). While reported completions of master's-level "artificial intelligence" programs decreased slightly between the 2014-2015 academic year and the 2015-2016

Statewide Undergraduate Completions of "Engineering" and "Computer and Information Science and Support Services" Programs

Statewide institutions reported 3,755 completions of bachelor's-level "computer and information science and support services" (i.e., CIP code 11) programs and 5,066 completions of bachelor's-level "engineering" (i.e., CIP code 14) programs for the 2016-2017 academic year. The total reported statewide completions with both CIP codes (i.e., 8,821 completions) indicates a large prospective student population in Florida. Target marketing efforts to students in these undergraduate programs to attract enrollments for a prospective master's-level artificial intelligence program.

academic year (i.e., from 140 completions to 128 completions), the overall growth in completions over the last five years of available data indicates increased student interest. Further, relevant master's-level completions increased 44 percent between the 2015-2016 and 2016-2017 academic years (i.e., from 128 to 184 completions).

Additionally, the number of nationwide institutions that report master's-level degree completions with the CIP code for "artificial intelligence" increased 33 percent between the 2012-2013 academic year and the 2016-2017 academic year (i.e., from six to eight institutions). However, no statewide institutions report completions of master's-level "artificial intelligence" programs during this period. This indicates a master's-level artificial intelligence program at **Florida Atlantic University** will face limited in-state competition. National completions of "artificial intelligence" programs at any degree level grew 104 percent from the 2012-2013 to 2016-2017 academic year (i.e., from 104 to 212 completions). For detailed information on national completions of "artificial intelligence" programs at all academic levels, see the Appendix.

Number of Nationwide Institutions that Report Completions of Master's-Level "Artificial Intelligence" Programs versus Number of Reported Degree Completions

Profiled Institutions

The Forum profiled graduate-level artificial intelligence programs at the following institutions:

A Guide to Institutions Profiled in this Brief¹

Institution	Location	Approximate Institutional Enrollment (Undergraduate/Total)	Carnegie Classification
Carnegie Mellon University	Mid-Atlantic	6,500 / 13,500	Doctoral Universities: Highest Research Activity
Georgia Institute of Technology	South	15,500 / 27,000	Doctoral Universities: Highest Research Activity
Northwestern University	Midwest	9,000 / 22,000	Doctoral Universities: Highest Research Activity
Stevens Institute of Technology	Mid-Atlantic	3,000 / 6,500	Doctoral Universities: Higher Research Activity
University of Pittsburg	Mid-Atlantic	19,000 / 28,500	Doctoral Universities: Highest Research Activity
Institution A	*	*	*
Institution B	*	*	*

The Forum does not provide information on **Institution A** or **Institution B** so the institutions may remain anonymous.

1) National Center for Education Statistic

2) Executive Overview

Develop an online or hybrid option in program delivery to compete with profiled programs and serve a broader student audience. Of profiled institutions, **Stevens Institute of Technology** and **Georgia Institute of Technology** offer master's-level artificial intelligence programs in both an online and on-campus format. Additionally, **Institution B** offers the graduate-level artificial intelligence certificate program online and via hybrid delivery, and **Institution A** offers the certificate program exclusively in a hybrid format. Other profiled institutions offer master's-level artificial intelligence programs exclusively on-campus. An online program can compete with profiled institutions and accommodate students with personal and professional commitments which make them unable to attend regular on-campus courses.

Form partnerships with employers with high demand for master's-level artificial intelligence professionals for collaborative projects and internship placement. **Carnegie Mellon University**, **Georgia Institute of Technology**, and **Northwestern University** highlight industry partnerships on master's-level artificial intelligence program webpages to attract potential students. Industry partners may offer collaborative project opportunities and internship placement opportunities for students enrolled in a master's-level artificial intelligence program. Industry partners highlighted on profiled program webpages include Amazon Web Services, Deloitte, and Microsoft. [EAB research](#) indicates administrators should form advisory boards with industry partners to advise program administrators in curriculum development and offer mentoring and capstone project opportunities for students.

Focus recruitment efforts on undergraduate engineering and computer science students to secure enrollments. **Northwestern University** primarily enrolls students with undergraduate degrees in engineering and computer science (i.e., 58 percent of the 2018 cohort) and no post-undergraduate work experience (i.e., 47 percent of the 2018 cohort). Students with post-undergraduate work experience typically enroll with two years' work experience (i.e., 21 percent of the 2018 cohort).

3) Competitive Landscape

Program Modality

Offer an On-Campus and Online Master's-Level Artificial Intelligence Program to Compete with Profiled Programs

Consider a master's-level artificial intelligence program with online and on-campus options to compete with profiled programs and serve a broader student audience. Students who seek a more traditional, on-campus program can enroll in an on-campus master's-level artificial intelligence program, while an online program can accommodate students with personal and professional commitments which make them unable to attend regular on-campus courses. Students at **Stevens Institute of**

Technology and **Georgia Institute of Technology** can complete the profiled master's-level artificial intelligence program both online and on-campus, and both **Institution B** and **Institution A** offer the profiled graduate certificate programs in a hybrid format. However, other profiled institutions offer programs exclusively on-campus.

Artificial Intelligence at Florida International University

Florida International University does not advertise a program in artificial intelligence at any degree level. However, the University's webpage for research and industry highlights research in artificial intelligence and big data. The list of relevant research topics include new machine learning and language processing, neural networks, and social media analytics. Additionally, artificial intelligence is listed as an "area of study" within the doctoral-level computer science program at Florida International University.

Modality of Profiled Master's-Level Artificial Intelligence Programs

Profiled Institutions

On-Campus

- Carnegie Mellon University
- Northwestern University
- University of Pittsburgh

Online/Hybrid

- Stevens Institute of Technology
- Georgia Institute of Technology
- Institution B
- Institution A

Program Characteristics

Partner with Private Companies that Work in Artificial Intelligence for Project Collaboration and Internship Placement

Profiled programs at **Carnegie Mellon University** and **Northwestern University** highlight industry partnerships, collaborative projects, and internship opportunities on program webpages. The webpage for the profiled program at Northwestern University includes a list of partners (e.g., Amazon Web Services, Deloitte, IBM, Microsoft) and information for companies interested in partnerships with the master's-level artificial intelligence program. Program administrators encourage prospective partners to hire master's-level artificial intelligence students for summer internships and collaborate on capstone projects to use new technologies in future business strategy. Further, the profiled program webpage at Carnegie Mellon University highlight four ways in which private companies can become involved with the master's-level artificial intelligence program. Private companies can sponsor a capstone project, offer an internship to master's-level artificial intelligence students, recruit students for jobs after graduation, and stay in touch with the program to increase awareness of developments in the field of artificial intelligence. Additionally, **Georgia Institute of Technology** advertises an optional internship with employers of artificial intelligence professionals. The graduate co-op/internship requires students to identify employers for internships and submit an application to a graduate program committee for approval. The profiled program website does not indicate whether the Institute maintains partnerships with employers or assists in internship placement.

EAB research indicates program administrators should encourage regional employers with the most demand for program graduates (e.g., master's-level artificial intelligence professionals) to join a program advisory board.¹ An advisory board allows employers to advise administrators on curriculum development and offer mentoring and capstone project opportunities for students. Partnerships through an advisory board encourage interactions with employers who may hire or promote program graduates, as administrators can demonstrate the program's alignment with industry expectations. Share labor market data with participating employers to demonstrate administrators' intent to prepare graduates for employer expectations and confirm an understanding of employers' unique needs. The Forum could not determine the extent to which profiled programs or employers provide funding to students who pursue internships.

Characteristics of Profiled Master's-Level Artificial Intelligence Programs

Profiled Institutions

Profiled Institution	Program Title	Admission Requirements	Tuition	Modality	Internship Opportunities	Department Housing
Carnegie Mellon University	Master of Science in Artificial Intelligence and Innovation	<ul style="list-style-type: none"> GPA of 3.0 or higher GRE score TOEFL score Official transcripts Current resume Statement of Purpose Three letters of recommendation 	\$47,470/ year	On-campus	Administrators encourage students to complete an internship between their first and second year. Companies perform on-campus interviews for internships (e.g., Apple).	School of Computer Science

Research Partnerships

Seek Partnerships with Government Agencies and Private Companies for Artificial Intelligence Research Funding

Carnegie Mellon University, Institution B, and Northwestern University identify public and private partnerships for research into artificial intelligence on program webpages. Carnegie Mellon University lists research partnerships on the Artificial Intelligence [homepage](#) with many private companies and government agencies, including NASA, the Department of Defense (DoD), Amazon, and Google. Collaborative research areas with partners include computer vision, human-computer interaction, and machine learning. However, the artificial intelligence webpage does not specify the extent to which partners provide funding for research on artificial intelligence. Institution B's webpage indicates members provide a pre-determined amount of unrestricted funding for three years to support research into artificial intelligence, but does not identify government agency funding for artificial intelligence research. Northwestern University reports Nvidia Corporation as the current sponsor of the [Northwestern University Deep Learning Lab](#), which focuses on research into the application of artificial intelligence to address societal problems. The research webpage for the McCormick School of Engineering and Applied Science at Northwestern University indicates 90 percent of research funding comes from government agencies and 10 percent from private companies, but does not specify funding by research project or identify sources of government funding.

The National Science Foundation (NSF) offers many programs that provide funding for [artificial intelligence research](#) (e.g., Early-concept Grants for Exploratory Research on Artificial Intelligence and Society, Information and Intelligent Systems (IIS): Core Program). For example, the Information and Intelligent Systems (IIS) program provides funds for three project classes. Small projects may receive up to \$500,000 total for up to three years, medium projects may receive between \$500,001 and \$1,200,000 total for up to four years, and large projects may receive between \$1,200,001 to \$3,000,000 total for up to five years. Previous recipients of this funding include the University of Colorado at Boulder, Johns Hopkins University, and the University of Maryland College Park. Administrators at **Florida Atlantic University** should consider applying to the available NSF programs to fund artificial intelligence research projects.

4) Student Recruitment

Student Enrollment and Demographics

Profiled Institutions Typically Enroll Students with Little or No Post-Undergraduate Work Experience

In the 2018 cohort of the master's-level artificial intelligence program at **Northwestern University**, 47 percent of enrolled students reported no previous work experience. However, students with prior work experience typically enroll with two years or less of post-undergraduate experience. Students that report one to two years of previous work

experience comprise 21 percent of enrolled students. Additionally, 16 percent of enrolled students report three to five years of experience, and 16 percent report more than five years of post-undergraduate work experience. Most students in the 2018 cohort at Northwestern University enrolled with an undergraduate degree in engineering and computer science (i.e., 58 percent). Other top majors include mathematics and statistics (i.e., 16 percent) and liberal arts degrees (i.e., 11 percent). Additionally, Northwestern University reports an average gender breakdown of approximately 90 percent men and 10 percent women. Similarly, Data USA reports men account for 79.1 percent of all national completions of artificial intelligence programs at any degree level from 2014 to 2016.² Additionally India, China, and the Philippines constitute the most common countries of origin for non-US students earning degrees in artificial intelligence.³ For additional demographic information for the top two occupations for artificial intelligence professionals refer to the Appendix. The profiled program at Northwestern University enrolls approximately 40 students per cohort. The Forum did not receive enrollment data from any other profiled program.

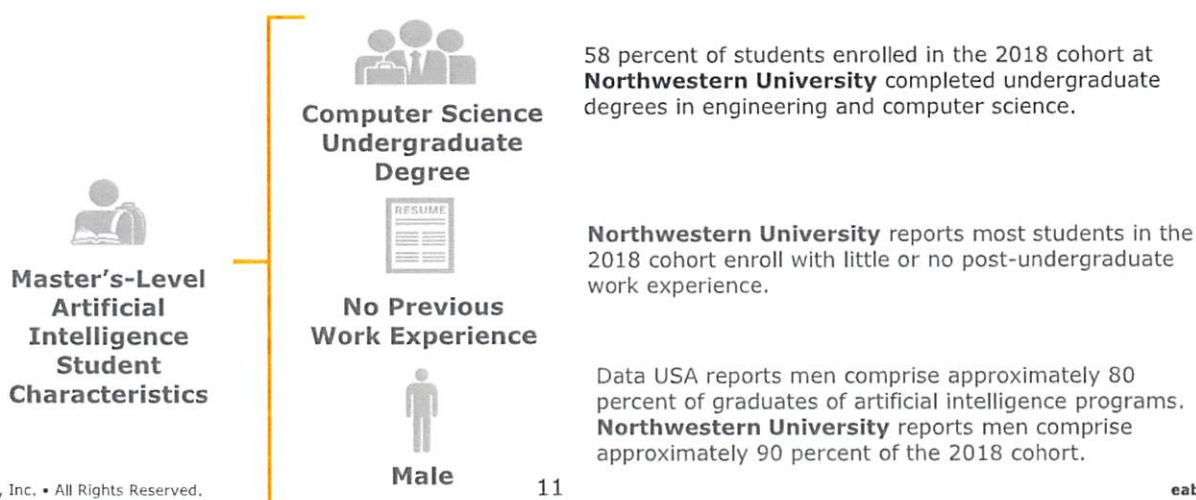

Career Opportunities in Artificial Intelligence

The profiled program webpage at **Stevens Institute of Technology** highlights the following potential careers for master's-level artificial intelligence program graduates:

- Artificial Intelligence Engineer
- Data Scientist
- R&D Engineer
- Machine Learning Engineer
- Data Engineer
- Analyst Engineer for Intelligent Networks

Common Characteristics of Students Enrolled in Profiled Master's-Level Artificial Intelligence Programs

Title

Florida Scientist

Scientific American

Database	Description
Abstracts in New Technology & Engineering (Proquest)	ANTE is an abstracting and indexing service monitoring publications from the U.K. and the U.S. Coverage includes new technologies such as information technology and computing, electronics, biotechnology, medical technology, as well as engineering (including construction, electrical and chemical engineering) and allied subject areas. Sources covered include periodicals, conference proceedings, technical reports, trade journal/newsletter items, patents, books, and press releases.
ACM Digital Library	The ACM Digital Library is a vast collection of citations and full text from ACM journal, magazine and newsletter articles. In addition, this resource provides access to transactions, conference proceedings and the ACM Guide to Computing Literature.
ACS (American Chemical Society) Journals	Articles relevant to chemistry and information in the life sciences.
American Institute of Physics (AIP) Journals	Provides access to full-text physics journal articles.
American Society for Mechanical Engineers (ASME) Journals	Provides access to mechanical engineering journals.
Applied Science & Business Periodicals Retrospective: 1913-1983	This resource contains citations to more than 4.5 million articles from nearly 1,700 periodicals. From the rise and fall of drugs to the business of oil to the emergence of the global economy, this resource offers a rich account of technological advances, business strategies, company profiles, iconic executives and scientists, and much more.
Applied Science & Technology Source	Includes Applied Science & Technology Full Text, Applied Science & Technology Index Retrospective and additional content. This database offers a diverse array of full-text and indexed content that covers the full spectrum of the applied sciences and computing disciplines from acoustics to aeronautics, and neural networks to nuclear engineering.
Biotechnology Research Abstracts	This database provides citations and abstracts to research articles on biotechnology (medical, agricultural, and environmental) and bioengineering.
Compendex (Engineering Village)	Compendex is the most comprehensive interdisciplinary engineering database in the world. It contains over 8 million records and references over 5,000 international engineering sources including journal, conference, and trade publications.
Computer and Information Systems Abstracts	Comprehensive database of the research and applications in the field.
Computer Database	This database provides access to computer-related product introductions, news, and reviews in areas such as hardware, software, electronics, engineering, communications, and the application of technology.
Electronics & Communications Abstracts	Research in the field of electronics and communications from over 600 different sources.
Emerald eJournals Premier	Emerald eJournals Premier provides access to all current content and selected archive material for all Emerald eJournals. Subjects include engineering, computing & technology, and management.
Engineered Materials Abstracts	Begun in 1986, Engineered Materials Abstracts is an electronic database containing Ceramics, Composites and Polymers subfiles. Sources covered include over 3,000 periodicals, conference proceedings, technical reports, trade journal/newsletter items, patents, books, and press releases.

History of Science, Technology, and Medicine	Contains records describing journal articles, conference proceedings, books, book reviews, and dissertations in the history of science, technology, medicine and allied historical fields. Citations reflect the contents of more than 1,000 journals, and partial contents of several hundred more.
IEEE Xplore:IEEE/IEL Electronic Library	Includes access to the abstract records and full text articles published since 1988 with select content published since 1893 from: IEEE journals, transactions, and magazines, including early access documents; IEEE conference proceedings; IET journals; IET conference proceedings; IEEE published standards and redline versions; and IEEE Standards Dictionary Online.
INSPEC	Includes Physics Abstracts, Computer and Control Abstracts, and Electrical and Electronics Abstracts. The largest English language file of bibliographic information and abstracts on the world's output of published works in physics, electrical engineering and electronics, computing, and information technology. Covers scientific and technical journals and conference proceedings. Includes some books, reports, and dissertations.
Inspec Archive	The Inspec Archive provides access to historical scientific records in the fields of physics, electrical engineering, electronics computing and control engineering. With the digitizing of the entire collection of Science Abstracts Journals, which are the precursors to the Inspec database, librarians, academics and students are provided access to over 873,000 abstract records spanning the years 1898 through 1968.
IOPscience	Provides access to scientific, medical and technical journals hosted by IOP (Institute of Physics)
Materials Business File	Materials Business File focuses on industry news, international trade data, government regulations and management issues related to the metals and materials industries.
Materials Science & Engineering Database (Proquest)	The ProQuest Engineering Collection contains engineering related full-text articles, granular access to millions of figures and tables within articles, and the entire range of bibliographic records from the CSA Engineering Research Database, a comprehensive index to world literature on technological and engineering innovations.
MathSciNet (AMS)	MathSciNet (EBSCOhost) 1940-present
METADEx	A comprehensive source for information on metals and alloys: their properties, manufacturing, applications, and development.
Morgan & Claypool Synthesis Digital Library of Engineering & Computer Science	SYNTHESIS is an information service for engineering and computer science. The basic component of the collection is the Lecture, an electronic book that synthesizes an important research or development topic, and is authored by a prominent contributor to the field.
Risk Abstracts	Risk Abstracts encompasses risk arising from industrial, technological, environmental, and other sources, with an emphasis on assessment and management of risk.
SciFinder	Provides comprehensive chemical and related scientific information including journal articles, patents, chemical reactions, and chemical regulatory data.
SciTech Collection (ProQuest)	This collection covers science and technology research, combining full-text journals with detailed indexing of global literature on natural sciences, engineering and technology.
Solid State and Superconductivity Abstracts	Presents global coverage on all aspects of solid state and superconductivity technology.

SPIE Digital Library	The SPIE Digital Library is an online database of scientific and technical publications representing the world's largest collection of research information in Optics and Photonics. The Digital Library contains the Proceedings of the Society and its journals.
Toxicology Abstracts	Toxicology Abstracts covers issues from social poisons and substance abuse to natural toxins, from legislation and recommended standards to environmental issues.
TOXLINE	Provides access to information in all areas of toxicology, including chemicals and pharmaceuticals, pesticides, environmental pollutants, and mutagens and teratogens.
Web of Science	Three unique citation databases which allow searching cited references as well as traditional searches independently or in combination: Science Citation Index Expanded, Social Sciences Citation Index, and Arts and Humanities Citation Index.
